viewfinder and many other much coveted features author peter k burian has followed the evolution of this alpha series from its inception and brings this expertise to his complete in depth discussion the system film is back and about time too we just were getting a little too comfortable with the idea of snapping selfies on our dumb phones at the ends of vanity sticks when film returned to slap us up film is not for the faint of heart it takes serious effort serious time it costs money for each frame from buying the film to paying to develop it or developing it in a film tank only those interested in the unique and fantastic look of film will brave this path the film photography book is for us those interested in all aspects of film photography from choosing cameras and lenses to choosing film and subjects to buying chemicals and processing the book can serve as a refresher to those who now are returning to film photography after a long absence and as a getting started course for those who never shot film in their lives it's an adventure a new voyage of photography part of shawn m tomlinson's guide to photography series the beginning of a sub series about film photography come on along be wary ye whoÉ sorry just wanted to warn you up front that some of these stories don't have conclusions most of them do but some i just never could finish oh yeah and some of them are parts of series that are here published alone because i just was unable to find the other stories i swore when i was young that that would never happen to me it did i'm dealing with it the reason that such stories Ñ those without endings and those for which there are other connected stories Ñ is that well i'm getting old i wanted to collect the majority of my writings before i'm dead some of these are very early stories the earliest i believe is Ócounterterrorist Ó yes the main character's name is jack but it was written many years Ñ decades Ñ before jack bauer counterterrorist made it to tv in 24 that should be obvious but i thought i'd mention it just try to enjoy the stories outside was crazy the thick coming storm weighed me down it could come any minute thunderous hurricane rain followed by all kinds of hell i dashed across the lawn into the lab and up the stairs the bookcase was locked most of our books anyone can look at some we don't think would be wise to let out i fumbled the key chain looking for the tiny key that could open the door i managed to get it near the keyhole when the electricity died cara may curse my pipe but right then i think she'd have been glad i had a lighter the lighter helped me again the deep old books were a window to the past we had read few that would entail things like dying horrible deaths instead we had a collection of Óabout books Ó essays written anywhere from last year to a thousand years ago the one i was looking for was deep red aichlan's deimos in it i hoped to sort out how to send xith back to wherever the hell it came from before it ate lily dale or whatever it does photographer and writer shawn m tomlinson author of the photo curmudgeon column and books explains in detail the usefulness of prime lenses for photographers who typically only use zoom lenses in this expanded edition he considers the uses of prime lenses the advantages as well as the disadvantages and provides a conversational approach to making the move to this type of lens prime lenses are sharper and have less distortion less chromatic aberration and brighter maximum apertures than zooms he reports tomlinson examines the most common prime lenses how they are used and what a photographer can expect to pay in this short guide i give you some pointers about what prime lenses do what type you may need for your particular photographic vision and how to choose what you need tomlinson writes in the book pcmag.com is a leading authority on technology delivering labs based independent reviews of the latest products and services our expert industry analysis and practical solutions help you make better buying decisions and get more from technology it has taken me 37 years to write this biography of author robert w chambers along the way i wrote and published

many articles about him but did not complete the biography until 2014 i got the idea of writing it when i was 15 and the reason i got the idea is the same reason it has taken so long to write the book there simply is not that much information about chambers out there despite his fame and thorough integration in new york high society very little was written about him during his lifetime this volume contains the expanded edition of the biography robert w chambers maker of moons as well as the collection of articles originally titled robert w chambers in search of the unknown author of the king in yellow i have been somewhat reluctant to write about the absolute best digital single lens reflex camera i have ever used the nikon d800e the reason is that i like to write about older cameras that have become cheaper to buy and use for the frugal photographer although some of the cameras i have written about were terribly expensive when first released by now they are reasonably cheap for example i've written books about the canon eos 1ds 1ds mark ii the nikon d1 and the nikon d2x these all are pro dsrls and as such were released at prices ranging from 6 000 to 8 000 by now however the most you will pay is around 400 for any of them in a few years the nikon d800e too will be much cheaper and an obvious choice for the frugal photographer no matter the price the d800 and d800e are two of the best dsrls ever made either will change you as a photographer in fantastic ways long time columnist and lifelong photographer shawn m tomlinson writes about the art and technique of photography with wit and humor he focuses in his photo curmudgeon columns on getting started in as well as moving into advanced photography instead of concentrating upon the newest shiniest photographic equipment tomlinson works with all levels of older equipment makes recommendations and recounts his own voyages of photography he helps the novice get started with higher end older cameras and lenses and helps with photo editing suggestions and techniques

the nikon d70 was nikon s third revolution just in the digital photography age never mind the major one in 1959 with the nikon f that changed professional film photography the first was the nikon d1 started pro digital photography the end of mainstream film the second was the nikon d100 the first dslr to reach the lofty heights of 6.1 megapixels then there was the d70 it looks and feels like a modern dslr and nikon released it in 2002 it was in its own way as revolutionary as the d1 and the d100 i ve taken some of my best photos with it the thing is there really is little negative to say about the nikon d70 d70s you can come up with many reasons to spend more money on a newer dslr but if you want a great camera for little money the nikon d70 or d70s is a good bet

film is back and about time too we just were getting a little too comfortable with the idea of snapping selfies on our dumb phones at the ends of vanity sticks when film returned to slap us up film is not

for the faint of heart it takes serious effort serious time it costs money for each frame from buying the film to paying to develop it or developing it in a film tank only those interested in the unique and fantastic look of film will brave this path the film photography book is for us those interested in all aspects of film photography from choosing cameras and lenses to choosing film and subjects to buying chemicals and processing the book can serve as a refresher to those who now are returning to film photography after a long absence and as a getting started course for those who never shot film in their lives it s an adventure a new voyage of photography part of shawn m tomlinson s guide to photography series the beginning of a sub series about film photography come on along

be wary ye whoÉ sorry just wanted to warn you up front that some of these stories donÕt have conclusions most of them do but some i just never could finish oh yeah and some of them are parts of series that are here published alone because i just was unable to find the other stories i swore when i was young that that would never happen to me it did iÕm dealing with it the reason that such stories Ñ those without endings and those for which there are other connected stories Ñ is that well iÕm getting old i wanted to collect the majority of my writings before iÕm dead some of these are very early stories the earliest i believe is Òcounterterrorist Ó yes the main characterÕs name is jack but it was written many years Ñ decades Ñ before jack bauer counterterrorist made it to tv in 24 that should be obvious but i thought iÕd mention it just try to enjoy the stories

outside was crazy the thick coming storm weighed me down it could come any minute thunderous hurricane rain followed by all kinds of hell i dashed across the lawn into the lab and up the stairs the bookcase was locked most of our books anyone can look at some we donÕt think would be wise to let out i fumbled the key chain looking for the tiny key that could open the door i managed to get it near the keyhole when the electricity died cara may curse my pipe but right then i think sheÕd have been glad i had a lighter the lighter helped me again the deep old books were a window to the past we had read few that would entail things like dying horrible deaths instead we had a collection of Òabout books Ó essays written anywhere from last year to a thousand years ago the one i was looking for was deep red aichlanÕs deimos in it i hoped to sort out how to send xith back to wherever the hell it came from before it ate lily dale or whatever it does

it has taken me 37 years to write this biography of author robert w chambers along the way i wrote and published many articles about him but did not complete the biography until 2014 i got the idea of writing it when i was 15 and the reason i got the idea is the same reason it has taken so long to write the book there simply is not that much information about chambers out there despite his fame and thorough integration in new york high society very little was written about him during his lifetime this volume contains the expanded edition of the biography robert w chambers maker of moons as well as the collection of articles originally titled robert w chambers in search of the unknown author of the king in yellow

i have been somewhat reluctant to write about the absolute best digital single lens reflex camera i have ever used the nikon d800e the reason is that i like to write about older cameras that have become cheaper to buy and use for the frugal photographer although some of the cameras i have written about were terribly expensive when first released by now they are reasonably cheap for example i've written books about the canon eos 1ds 1ds mark ii the nikon d1 and the nikon d2x these all are pro dslrs and as such were released at prices ranging from 6 000 to 8 000 by now however the most you will pay is around 400 for any of them in a few years the nikon d800e too will be much cheaper and an obvious choice for the frugal photographer no matter the price the d800 and d800e are two of the best dslrs ever made either will change you as a photographer in fantastic ways
