comprehensive annotations provide practical information that walks readers step by step through a logical integrated process of

planning and writing persuasive proposals in this classic book that records a moment in the history of urban planning the architect and city planner harvey h kaiser examines the city building process from the time when a proposal for urban development is first conceived to the early stages of construction to illuminate the factors that underlie acceptance or rejection of community development kaiser focuses on the proposals for three towns in upstate new york lysander near syracuse and gananda and riverton both near rochester these were brand new developments and municipalities and thus quite different from other trends of suburbanization that attached development onto existing municipalities step by step he describes what happened in each of these communities during the presentation of the initial proposal how parties interacted with each other and how the climate of the community influenced the actions of the parties basing his work on hundreds of interviews attendance at public meetings and a review of many articles and documents kaiser shows that in each case the emergence of controversy and degree of acceptance was influenced by the developer s leadership the characteristics of the developer s organization and the method of presenting the proposal to the public kaiser brings to his comparative approach a background in the rough and tumble of day to day project management and the development of plans as well as their administration first published in 1978 the building of cities remains an invaluable resource for developers architects public officials and citizens involved in local government for many millennia indigenous australians have been engineering the landscape using sophisticated technological and philosophical knowledge systems in a deliberate response to changing social and environmental circumstances these knowledge systems integrate profound understanding of country and bring together knowledge of the topography and geology of the landscape its natural cycles and ecological systems its hydrological systems and natural resources including fauna and flora this enables people to manage resources sustainably and reliably and testifies to a developed contextualised knowledge system and to a society with agency and the capability to maintain and refine accumulated knowledge and material processes this book is a recognition and acknowledgement of the ingenuity of indigenous engineering which is grounded in philosophical principles values and practices that emphasise sustainability reciprocity respect and diversity and often presents a much needed challenge to a western engineering worldview each chapter is written by a team of authors combining indigenous knowledge skills and academic expertise providing examples of collaboration at the intersection of western and indigenous engineering principles sharing old and new knowledges and skills these varied approaches demonstrate ways to integrate indigenous knowledges into the curricula for australian engineering degrees in line with the australian council of engineering deans position statement on embedding aboriginal and torres strait islander perspectives into the engineering curriculum first published in 2017 amazing photographs of elephants accompany narratives from researchers scientists and conservationists celebrating elephants and calling for their preservation african savanna elephants among the most magnificent and beloved of our fellow mammals are an extraordinary social and intelligent species the last elephants an homage to these animals and a clarion call for their preservation is based upon a shocking finding savanna elephant populations across africa are being decimated with two to three murdered every hour for their ivory without action these elephants soon will vanish from our world they are a species in imminent danger of extinction and it is up to us to save them featuring more than 250 full color photos of the breathtaking animals by some of the world s top wildlife photographers the last elephants was inspired by the devastating results of the continent wide great elephant census of 2016 undertaken by elephants without borders in tandem with the world s most prominent conservation groups the book joins together the voices and vision of scientists lawmakers rangers conservationists and on the ground researchers to speak out against elephant killings to close loopholes in international law that allow the ivory trade to continue and to pay tribute to the thousands who work to protect the
