in his best selling travel memoir the innocents abroad mark twain punningly refers to the black man who introduces him to venetian renaissance painting as a contraband guide a term coined to describe fugitive slaves who assisted union armies during the civil war by means of this and similar case studies paul h d kaplan documents the ways in which

american cultural encounters with europe and its venerable artistic traditions influenced nineteenth century concepts of race in the united states americans of the civil war era were struck by the presence of people of color in european art and society and american artists and authors both black and white adapted and transformed european visual material to respond to the particular struggles over the identity of african americans taking up the work of both well and lesser known artists and writers such as the travel writings of mark twain and william dean howells the paintings of german american emanuel leutze the epistolary exchange between john ruskin and charles eliot norton newspaper essays written by frederick douglass and william j wilson and the sculpture of freed slave eugène warburg kaplan lays bare how racial attitudes expressed in mid nineteenth century american art were deeply inflected by european traditions by highlighting the contributions people of black african descent made to the fine arts in the united states during this period along with the ways in which they were represented contraband guides provides a fresh perspective on the theme of race in civil war era american art it will appeal to art historians to specialists in african american studies and american studies and to general readers interested in american art and african american history

nicholas guyatt offers a completely new understanding of a central question in american history how did americans come to think that god favored the united states above other nations tracing the story of american providentialism

this book uncovers the british roots of american religious nationalism before the american revolution and the extraordinary struggles of white americans to reconcile their ideas of national mission with the racial diversity of the early republic making sense of previously diffuse debates on manifest destiny millenarianism and american mission providence and the invention of the united states explains the origins and development of the idea that god has a special plan for america this conviction supplied the united states with a powerful sense of national purpose but it also prevented americans from clearly understanding events and people that could not easily be fitted into the providential scheme

know your southern history so that you can help to defend it our heritage is too important to leave to yankee and scalawag revisionist in america today most are proud to boast of their cultural background whether that be irish african hispanic or whatever one of the largest segments of the american population is attacked for displaying pride in their heritage those with confederate ancestors we are immediately classified as racist if we display the battle flag that the southern soldier carried as he defended his home and family from invasion we have made some progress in convincing others that our flag is meant to symbolize heritage not hate but we have further to go the author is one southerner who feels that his ancestors were like their grandfathers before them simply fighting for their right to self government they did nothing to be pardoned for and we do nothing wrong in being proud of them just as other americans take pride in their ancestors the best way to do this is to become familiar with our history in recent years many academic historians have joined the attacks of our confederate heritage we must not leave our history to be told by yankee and scalawag revisionist historians everyone who feels the same way should read this outline of southern history for unreconstructed southerners
