everyday violence of this vital border city mary barra s quest to move gm to a manufacturer of electric cars has captured the attention of automobile aficionados green business advocates and leaders of all types who have to admire mary s toughness in moving forward despite the overwhelming obstacles in her path a decade ago no one would have guessed that gm would be the company poised to lead america into the future at a time when business book readers seem endlessly fascinated by soaring tech giants like amazon and netflix and ill fated startups like wework and theranos why is it important to put the spotlight back on 112 year old gm because charlie wilson s quip from 1952 is still true what s good for gm is still good for america and vice versa america needs to transition to a new era of clean energy and environmentally sustainable transportation we also need to adapt to a world with far fewer assembly line jobs but far more skilled jobs for people who can design build and operate robots and other high tech machines gm s attempt to lead those transitions is as important as it is dramatic equally compelling is the story of gm s ceo mary barra who against all odds took the reins at gm in 2014 since that time she has attempted to reinvent a century old company and equip it for the biggest change in transportation since the internal combustion engine replaced the horse in the process she has been ripping out gm traditions by the roots and taking flak from all sides her plan is to make gm the company famed for the gas burning corvette hulking cadillac escalade and carbon spewing silverado pickup purely electric and clean by 2035 she may not be as wealthy as jeff bezos as brash as elon musk or as powerful as mark zuckerberg but mary barra is just as important as any of them and as one of the most powerful female executives in the world she is overdue for an in depth look at her forward thinking vision her approach to leadership and her accomplishments against the odds

4.6L & 5.4L Ford Engines 2010-11-11 southwest book awards border regional library association brla uses key words and striking images to explore violence and everyday life in Juárez Mexico Juárez Mexico is known for violence the femicides of the 1990s and the cartel mayhem that followed made it one of the world s most dangerous cities along with the violence came a new lexicon that traveled from person to person across rivers and borders wherever it was needed to explain the horrors taking place from personal interviews media accounts and conversations on the street Julián Cardona and Alice Leora Briggs have collected the words and slang that make up the brutal language of Juárez creating a glossary that serves as a linguistic portrait of the city and its violence organized alphabetically the entries consist of Spanish and Spanglish accompanied by short English definitions some also feature a longer narrative drawn from interviews stories that put the terms in context and provide a personal counterpoint to media reports of the same events letters and many of the entries are supplemented with Briggs s evocative illustrations which are reminiscent of Hans Holbein s famous Alphabet of Death together the words drawings and descriptions in *Abecedario de Juárez* both document and interpret the everyday violence of this vital border city

Business rankings annual 2021-02-18 Mary Barra s quest to move GM to a manufacturer of electric cars has captured the attention of automobile aficionados green business advocates and leaders of all types who have to admire Mary s toughness in moving forward despite the overwhelming obstacles in her path a decade ago no one would have guessed that GM would be the company poised to lead America into the future at a time when business book readers seem endlessly fascinated by soaring tech giants like Amazon and Netflix and ill fated

startups like wework and theranos why is it important to put the spotlight back on 112 year old gm because charlie wilson s quip from 1952 is still true what s good for gm is still good for america and vice versa america needs to transition to a new era of clean energy and environmentally sustainable transportation we also need to adapt to a world with far fewer assembly line jobs but far more skilled jobs for people who can design build and operate robots and other high tech machines gm s attempt to lead those transitions is as important as it is dramatic equally compelling is the story of gm s ceo mary barra who against all odds took the reins at gm in 2014 since that time she has attempted to reinvent a century old company and equip it for the biggest change in transportation since the internal combustion engine replaced the horse in the process she has been ripping out gm traditions by the roots and taking flak from all sides her plan is to make gm the company famed for the gas burning corvette hulking cadillac escalade and carbon spewing silverado pickup purely electric and clean by 2035 she may not be as wealthy as jeff bezos as brash as elon musk or as powerful as mark zuckerberg but mary barra is just as important as any of them and as one of the most powerful female executives in the world she is overdue for an in depth look at her forward thinking vision her approach to leadership and her accomplishments against the odds
