JOURNAL OF SCIENCE AND ENGINEERING 2018-08-14

for over a century the danish thinker søren kierkegaard 1813 55 has been at the center of a number of important discussions concerning not only philosophy and theology but also more recently fields such as social thought psychology and contemporary aesthetics especially literary theory despite his relatively short life kierkegaard was an extraordinarily prolific writer as attested to by the 26 volume princeton university press edition of all of his published writings but kierkegaard left behind nearly as much unpublished writing most of which consists of what are called his journals and notebooks kierkegaard has long been recognized as one of history's great journal keepers but only rather small portions of his journals and notebooks are what we usually understand by the term diaries by far the greater part of kierkegaard's journals and notebooks consists of reflections on a myriad of subjects philosophical religious political personal studying his journals and notebooks takes us into his workshop where we can see his entire universe of thought we can witness the genesis of his published works to be sure but we can also see whole galaxies of concepts new insights and fragments large and small of partially or almost entirely completed but unpublished works kierkegaard's journals and notebooks enables us to see the thinker in dialogue with his times and with himself kierkegaard wrote his journals in a two column format one for his initial entries and the second for the extensive marginal comments that he added later this edition of the journals reproduces this format includes several photographs of original manuscript pages and contains extensive scholarly commentary on the various entries and on the history of the manuscripts being reproduced volume 10 of this series includes the final six of kierkegaard's important notebooks journals nb31 through nb36 which cover the last months of 1854 a period when kierkegaard made the final preparations for and the initial launch of his furious assault on the established church but in addition to this incendiary material these journals also contain a great trove of his reflections on theology philosophy and the perils and opportunities of modernity

Robert's Journal 2012-10-01

writing high quality papers suitable for publication within international scientific journals is now an essential skill for all early career researchers their career progression and the reputation of the department in which they work depends upon it however many manuscripts are rejected or sent back for major re working not because the science they contain is in any way bad but because the same problems keep occurring in the way that the material is presented it is one thing to write a good scientific paper however it is quite another thing to get it published this requires some additional nous in writing this book don harris draws upon nearly a quarter of a century of experience as an author and reviewer of research papers and ultimately as a journal editor by his own admission it contains all the things he wished that his mentors had told him 25 years ago but didn't the material in the book is drawn from many years of finding all these things out for himself usually by trial and error but mostly error the text adopts a much lighter touch than is normally found in books of this type after all who really wants to read a book about writing research papers the author describes his own unique approach to writing journal papers which in his own words has proved to be extremely successful all major points are illustrated with examples from his own published works the book is written in the form of a manual for constructing a journal manuscript read a chapter write a section however the material it contains goes beyond just this and also describes how to select a target journal the manuscript submission process what referees are looking for in a good journal paper and how to deal with the referees comments each chapter concludes with a checklist to ensure all the key elements have been addressed
