connected to specific characteristics of the globalized new economy in what can be thought of as late capitalism through ten ethnographic case studies it demonstrates the complex ways in which older nationalist ideologies which invest language with value as a source of pride get bound up with newer neoliberal ideologies which invest language with value as a source of profit the complex interaction between these modes of mobilizing linguistic resources challenges some of our ideas about globalization hinting that we are in a period of intensification of modernity in which the limits of the nation state are stretched but not yet undone at the same time this book argues this intensification also calls into question modernist ways of looking at language and identity requiring a more serious engagement with capitalism and how it constitutes symbolic including linguistic as well as material markets this
