keys is an exploration of thought a sometimes cerebral look at the taboos of humanity and the attributes that make us who we are the beautiful and the ugly sides of being human it is a sometimes hard to accept look at the psychological conditions we all share and fight to keep in check in our society we have made even the thought of some acts taboo some inspiration has come from current events but most come from a mind let loose to wander and explore these forbidden thoughts and fantasies much inspiration came from disgust in myself and of what we call humanity even in these i hope the reader will find some hope and solace there is an underlying sense that we acknowledge these shortcomings and in that change on the lighter side there are brief bits of humor and irony along with purely fantastic muses sparked from a single untamed thought from the dramatic imagery to the ethereal you will be taken to the edge of sanity and move beyond what is comfortable and be urged to take a closer look at who we are as individuals and as a people

this book was five years in writing and includes over ten years of notes written when i was drowning in the incredibly painful and complicated morass of drug and

alcohol addiction some of the most powerful emotions that i as a human being have ever felt were recorded on whatever paper that was around at the time i swore to god that if i survived and didn't totally lose my mind like so many around me did that i would tell anyone who would listen what it's like to lose yourself completely to the demon of nothingness as i call it because it has the ability to transform all that you possess into nothing nada zilch so fast that your mind can't process it there were times so depressing and painful when the thought of living through another day was a bad option i wrote when i went into rehab and about what it took to find myself again i wrote about the joy of recovery and the fight to have it and to keep it i also write about hypocrisy as i see it while living on the other side of society i was constantly exposed to bullshit of every kind you name it i've heard it seen it and probably done it i've seen and played all the games so now i'm allergic and when i encounter the bullshit and game out here i write about it try to expose it though i'm not the best christian in this world i do believe in god and the church in my deepest despair i not only wanted to die i wanted my very soul to die too i wrote about these things too i've tried to include the outlook of live and let live in my poetry some things are whimsical some about love some are political some dead serious all of it my music howard r logan jr

we should all be concerned with deceptions from the door to door fly by night scam and con artists to the politically incorrect problems throughout the world these delusions and exploitations need to come into the light for exposure understanding and judgment we can easily ignore the ones that don t pertain directly to us right now but the word ignore goes hand in hand with the word ignorance once we see what the problems are and ignore them long enough we are prone to fall into the traps and snares awaiting the unsuspecting ancient deceptions are just as deadly our calendars mark two active and direct symbols of betrayal the first has to do with sun signs yes the zodiac horoscopes and astrology the second has to do with the core of christianity itself good friday part i delves into the astronomical workings of the universe in relationship to the earth with the precession of the equinoxes and the havoc it has played during the past 2000 years the astrological signs are known to be one sign off from their real places in the sky but no one seems to care that astrology is bilking the world of time money actions and thought at the time of your birth the sun was supposed to be transiting in your sun sign but it wasn t where were the stars in relationship to the sun how and when did this happen where are they now do the astrologers know this do they care the drawings in this book clearly illustrate the complex workings and the language is put simply in layman s terms to be easily digested and understood added are the ingredients of time math and truth go with me on this far reaching and astounding journey into the past and uncover the simplicity of god s planned and incremental movements and relationships of heavenly bodies time changes everything in its path discover your turning earth as you never knew it to be things that endure the test of time and remain seemingly unchangeable tend to be worshiped we no longer need to be trapped in the bondage of ignorance that tries to imprison us in a paralyzed stranglehold of the past you will look up into the heavens with a fresh and new perspective as well as appreciate the vastness and simplicity of the creative structuring of the sky like never before part ii of the book realizes that we have been deceived into believing that christ was placed in the tomb before evening had come on the friday before easter and was raised 36 hours later half the time he said he would be in the grave the validity of christ s messiahship rested on his own words in matthew 12 38 40 these words were specifically given to the elite teams of the jewish legal system not just to the masses he had to be in the grave no less than 72 hours to authenticate that he was not an imposter go with me back almost 2 000 years and see for yourself by the biblical account that good friday was not the day of crucifixion and that jesus was raised early on the first day of the week not sunday morning according to the scriptures and that satan is playing havoc with stealing the special time of the week and day that christians are asked to assemble by example go with me to the tomb and uncover its correct timetable does christendom know the truth do they care arm yourself with the knowledge of the ancient ages history is not just a collection of past factual accounts it is his story this book is akin to the little book mentioned in revelation 10
