Culture and the Real 2004-12-17

what makes us the people we are culture evidently plays a part but how large a part is culture alone the source of our identities some have argued that human nature is the foundation of culture others that culture is the foundation of human identity catherine belsey calls for a more nuanced relational account of what it is to be human and in doing so puts forward a significant new theory of culture culture and the real explains with professor belsey s characteristic lucidity the views of recent theorists including jean françois lyotard judith butler and slavoj zizek as well as their debt to the earlier work of kant and hegel in order to take issue with their accounts of what it is to be human to explore the human she demonstrates is to acknowledge the relationship between culture and what we don t know not the familiar world picture presented to us by culture as reality but the unsayable or the strange region that lies beyond culture which lacan has called the real culture she argues registers a sense of its own limits in ways more subtle than the theorists allow this volume builds on the insights of belsey s influential critical practice to provide not only an accessible introduction to contemporary theories of what it is to be human but a major new contribution to current debates about culture taking examples from film and art fiction and poetry culture and the real is essential reading for those studying or working in cultural criticism within the fields of english cultural studies film studies and art history
