The Effects of Computational Resolution on Limited-area Solutions of the Barotropic Vorticity Equation

1981

numerical experiments with the barotropic vorticity equation are carried out to examine the effects of the computational resolution on the forecast accuracy within a limited region the experiments assume that wind is measured and predicted at prescribed times on a set of uniformly distributed grid points with a grid distance of about 750 km the required initial and boundary conditions for a given computational resolution are estimated through interpolation the finite difference analogue of the vorticity equation is obtained using the Shuman algorithm and the leap frog scheme the time integration is extended for 12 hours the observed winds are given by the values of the Rossby-Haurwitz waves and the forecast errors are defined by the differences between the predicted and observed values three levels of computational resolution namely the single double and quadruple resolutions are considered in which the single resolution network coincides with the observational network two spatial interpolation procedures the bilinear and the 16 point least squares biquadratic interpolations and the linear time interpolation are used to obtain estimates of requisite initial and boundary values

Law of Misstatements

2015-08-27

2013 was the 50th anniversary of the House of Lords landmark decision in *Hedley Byrne v Heller* this international collection of essays brings together leading experts from five of the most important jurisdictions in which the case has been received the United Kingdom the United States New Zealand Canada and Australia to reappraise its implications from a number of complementary perspectives historical theoretical conceptual doctrinal and comparative it explores modern developments in the law of misstatement in each of the jurisdictions examines the case's profound effects on the conceptual apparatus of the law of negligence more generally explores the intersections between misstatement liabilities in contract tort equity and under statutory consumer protection provisions and critically assesses the ways in which advisor liabilities have come to be limited and distributed under systems of joint and several and proportionate liability respectively inspired by *Hedley Byrne* the purpose of the collection is to reflect on the case's echoes effects and analogues throughout the private law and to provide a platform for thinking about the ways in which

liabilities for misstatement and pure economic loss should be modelled in the modern day
