who needs expensive old fashioned office software now you can do everything online free with google docs experts steve and nancy holzner offer simple step by step instructions and great insider tips for making the most of google s powerful online word processing spreadsheet and presentation tools you ll get started fast learn how to create and format professional quality documents of all kinds collaborate with colleagues to build better proposals and presentations use advanced tools like revision history templates and charts discover google docs latest features and shortcuts and a whole lot more no matter what kind of documents you create this book can help you do the job better faster and more efficiently and you ll never pay for office software again you ll learn how to get your free google account and set up igoogle for instant access to your documents upload and use the documents you ve already created with microsoft office use google spreadsheet to create charts to display spreadsheet data master google docs easy powerful document editing and formatting tools insert images into your documents and presentations share documents securely with your colleagues back up your documents offline and edit them when you don t have an internet connection steven holzner former contributing editor at pc magazine is author of 108 computer books that have sold more than 2 5 million copies his most recent pearson book is facebook marketing nancy holzner writes and edits technology books from her home in central new york state her recent publications include books on intuit quickbase and zoho nancy has also worked as a medievalist a high school teacher and a corporate trainer category productivity suites covers google docs user level beginning intermediate

Learning Technology for Education in Cloud *2015-08-08*

this book constitutes the refereed proceedings of the fourth international workshop on learning technology for education in cloud ltec 2015 held in maribor slovenia in august 2015 the 24 revised full papers presented were carefully reviewed and selected from 46 submissions the papers cover various aspects of technologies for learning such as mooc challenges cooperative learning learning engineering learning tools and environments stem

Digital Feedback Methods *2022-09-05*

the crucial role of feedback in the learning process is undisputed but how can feedback be exchanged in the digital age this book equips teachers and learners with a research based overview of digital feedback methods this includes for instance feedback in text editors cloud documents chats forums wikis surveys mails as well as multimodal feedback in video conferences and recorded audio video and screencast feedback the book discusses the advantages and limitations of each digital feedback method and offers suggestions for their practical application in the classroom they can be utilized in online teaching as well as to enrich on site teaching the book also provides ideas for combining different feedback methods synergistically and closes with recommendations for developing dynamic digital feedback literacies among teachers and students

Advanced LaTeX in Academia *2022-01-31*

this book contains a comprehensive treatment of advanced latex features the focus is on the

development of high quality documents and presentations by revealing powerful insights into the latex language the well established advantages of the typesetting system latex are the preparation and publication of platform independent high quality documents and automatic numbering and cross referencing of illustrations or references these can be extended beyond the typical applications by creating highly dynamic electronic documents this is commonly performed in connection with the portable document format pdf as well as other programming tools which allow the development of extremely flexible electronic documents

Writing and Speaking in the Technology Professions
2003-07-04

an updated edition of the classic guide to technical communication consider that 20 to 50 percent of a technology professional s time is spent communicating with others whether writing a memo preparing a set of procedures or making an oral presentation effective communication is vital to your professional success this anthology delivers concrete advice from the foremost experts on how to communicate more effectively in the workplace the revised and expanded second edition of this popular book completely updates the original providing authoritative guidance on communicating via modern technology in the contemporary work environment two new sections on global communication and the internet address communicating effectively in the context of increased e mail and web usage as in the original david beer s second edition discusses a variety of approaches such as writing technical documents that are clear and effective giving oral presentations more confidently using graphics and other visual aids judiciously holding productive meetings becoming an effective listener the new edition also includes updated articles on working with others to get results and on giving directions that work each article is aimed specifically at the needs of

engineers and others in the technology professions and is written by a practicing engineer or a technical communicator technical engineers ieee society members and technical writing teachers will find this updated edition of david beer s classic writing and speaking in the technology professions an invaluable guide to successful communication

L2 Collaborative Writing in Diverse Learning Contexts 2023-08-15

this book is the first edited volume to compile up to date scholarship that discusses frontier knowledge on second language l2 collaborative writing cw and highlights technology mediated solutions to it the volume consists of conceptual papers and empirical studies that explore theoretical methodological and pedagogical approaches to cw in face to face online and hybrid learning contexts the ten chapters of the book are divided into three sections 1 theoretical perspectives and a methodological review of cw 2 empirical research addressing the processes products and effects pertaining to cw 3 pedagogical aspects relevant to cw namely task design technology use and assessment by examining the implementation of various cw tasks across modes genres and l2 learning settings this book re evaluates the practices of cw and illustrates how diverse forms of cw can facilitate students l2 learning and writing development

The Essential B2B eCommerce Guide 2020-05-29

this guide has been written to cover all aspects of the reality of b2b ecommerce the emphasis is on practical advice for british smes that can bring you immediate economic benefits

Digital Forensic Science *2016-12-28*

digital forensic science or digital forensics is the application of scientific tools and methods to identify collect and analyze digital data artifacts in support of legal proceedings from a more technical perspective it is the process of reconstructing the relevant sequence of events that have led to the currently observable state of a target it system or digital artifacts over the last three decades the importance of digital evidence has grown in lockstep with the fast societal adoption of information technology which has resulted in the continuous accumulation of data at an exponential rate simultaneously there has been a rapid growth in network connectivity and the complexity of it systems leading to more complex behavior that needs to be investigated the goal of this book is to provide a systematic technical overview of digital forensic techniques primarily from the point of view of computer science this allows us to put the field in the broader perspective of a host of related areas and gain better insight into the computational challenges facing forensics as well as draw inspiration for addressing them this is needed as some of the challenges faced by digital forensics such as cloud computing require qualitatively different approaches the sheer volume of data to be examined also requires new means of processing it
