on october 4 1957 at 10 28 moscow time a rocket carrying the world s first orbiting satellite roared into space signaling a new era in human history and the beginning of the so called space race an epic rivalry pitting the technological know how of the soviet union against that of the united states despite some highly publicized failures the usa managed to answer the russians with the successful launch of explorer 1 in january of 1958 the next major milestone would be to put a human into orbit a goal that defined the usa s project mercury after a long series of test launches including a sub orbital flight with the chimp ham on board mercury astronaut alan shepard became the first american in space on may 5 1961 shepard rode a redstone rocket into space for a sub orbital flight that lasted under 16 minutes nine months later john glenn s friendship 7 capsule was launched into space atop an atlas booster and glenn became the first american to orbit the earth glenn remained in space for nearly five hours and circled the planet three times while these flights represented enormous achievements neither was an outright space race victory cosmonaut yuri gagarin s orbital flight of april 12 1961 earned him the title of first man in space and first man to orbit the earth designed by brilliant engineer max faget and a team at nasa the mercury space capsule represented an entirely new way of vehicle just how to enough for a single astronaut the joke about the cramped capsule was that you had to
