original scholarly monograph the study of the reception of the ancient novel and of its literary and cultural heritage is one of the most appealing issues in the story of this literary genre in no other genre has the vitality of classical tradition manifested itself in such a lasting and versatile manner as in the novel however this unifying centripetal quality also worked in an opposite direction spreading to and contaminating future literatures over the centuries from antiquity to the present time there have been many authors who drew inspiration from the greek and roman novels or used them as models from cervantes to shakespeare sydney or racine not to mention the profound influence these texts exercised on for instance sixteenth to eighteenth century italian portuguese and spanish literature volume i is divided into sections that follow a

chronological order while volume ii deals with the reception of the ancient novel in literature and art the first volume brings together an international group of scholars whose main aim is to analyse the survival of the ancient novel in the ancient world and in the middle ages in the renaissance in the 17th and 18th centuries and in the modern era the contributors to the second volume have undertaken the task of discussing the survival of the ancient novel in the visual arts in literature and in the performative arts the papers assembled in these two volumes on reception are at the forefront of scholarship in the field and will stimulate scholarly research on the ancient novel and its influence over the centuries up to modern times thus enriching not only classics but also modern languages and literatures cultural history literary theory and comparative literature depth matters can a mere fifteen words turn today s youth into the innovative ambitious thinkers we need classic works of literature in school this book provides five day lesson plans for over a half dozen of greatest books to kill a mockingbird the great gatsby adventures of huckleberry finn lord of the flies the outsiders the house of mango street great expectations and the color purple each lesson plan may also be purchased separately this study aims to provide an overview and a close up of the chinese academic community that specialises in american studies the first section of the study describes the structure of the community the second part discusses its scholarship the objectives of this study are to identify where and who the americanists are and to examine the images of the united states they present this data comes from both american and chinese sources in the early 80s the usia commissioned a number of american scholars to travel to china and make reports on the state of american studies in the disciplines of economics history law and government and literature if you love the great gatsby and cats you will love this satirical interpretation the great catsby cats do live a rich and dramatic life as well this is a 120 pages lined notebook journal for you to write your thoughts doodle plan draw or just whatever you wish to use it for this study explores the vestiges of primitive sacrificial rituals that emerge in a group of canonical modernist novels including the turn of the screw heart of darkness the good soldier the great gatsby and to the lighthouse it argues that these novels reenact a process that achieved its seminal expression in the genesis story of the binding of isaac in which abraham having been prevented from sacrificing isaac offers up a ram in his place modernist reenactments of this pattern present narrators who although vigorously protesting the victimization of certain characters unfailingly seize upon others as their surrogates each novel is designed in such a way however as to resist the reconstruction of a sacrificial ritual to which its narrator is prone the resulting tension between the binding and unbinding of ritual persecution dramatizes the paradox that we can neither believe convincingly in the guilt of our scapegoats nor imagine a society that has dispensed with them entirely thomas cousineau is professor of english at washington college in maryland new technologies have the power to augment many standardization and customization opportunities available within one of the fastest growing of the world s emerging economies namely the turkish economy which according to a recent pwc report could outstrip the italian economy by 2030 in many areas this book presents a unified approach to the problem of inequality combining results from a variety of research fields the human life cycle group dynamics networks markets and economic geography its main message is that inequality emerges as the natural result of mechanisms operating both in individual human development and in social interaction it posits that inequality is not an anomalous deviation from a naturally egalitarian social structure quite to the contrary inequality is to be expected as part of the human condition the author states that the growth of inequality on the other hand is not a natural law the level and character of inequality can be affected by collective decisions this perspective on human inequality has potentially far reaching consequences both for the political philosophy of inequality and for public policy making this book is of interest to a wide interdisciplinary social science readership including public policy decision sciences economic geography and life course studies populist upheavals like trump brexit and the gilets jaunes happen when the system really is rigged citizens the world over are angry not due to income inequality or immigration but economic unfairness that opportunity is not equal and reward is not according to contribution this forensic book draws on original research cited by the un and imf to demonstrate that illiberal populism strikes hardest when success is influenced by family origins rather than talent and effort protzer and summerville propose a framework of policy inputs that instead support high social mobility and apply it to diagnose the differing reasons behind economic unfairness in the us uk italy and france by striving for a fair socially mobile economy they argue it is possible to craft a politics that reclaims the reasonable grievances behind populism reclaiming populism is a must read for policymakers scholars and citizens
