Personnel Classification Tests ... 1946

the relationships between testing program training content and method and utilization on the job are probed and the methodology is explained by which the validity of the tests is established analysis of measures of performance in job training programs and rating of job performance reveals that training performance is more satisfactory than job ratings for evaluating test effectiveness how well tests predict performance in training programs and the relation between test scores and other indexes of success are examined separately for blacks and whites selection and classification tests are effective in identifying potential failures in army training programs and for assigning men to jobs where their potential is best used and where they can best serve the army aptitude test scores are useful indicators of the proficiency and grade a man can attain of the time required to bring a trainee to a minimum level of performance and in identifying general categories men eligible for o

Printed Classification Tests 1947

beginning in the early 1980s and continuing through the middle 1990s the u s army research institute for the behavioral and social sciences ari sponsored a comprehensive research and development program to evaluate and enhance the army s personnel selection and classification procedures this was a set of interrelated efforts collectively known as project a project a had a number of basic and applied research objectives pertaining to selection and classification decision making it focused on the entire selection and classification system for army enlisted personnel and addressed research questions that can be generalized to other personnel systems it involved the development and evaluation of a comprehensive array of predictor and criterion measures using samples of tens of thousands of individuals in a broad range of jobs the research included a longitudinal sample from which data were collected at organizational entry following training after 1 2 years on the job and after 3 4 years on the job this book provides a concise and readable description of the entire project a research program

the editors share the problems strategies experiences findings lessons learned and some of the excitement that resulted from conducting the type of project that comes along once in a lifetime for an industrial organizational psychologist this book is of interest to industrial organizational psychologists including experienced researchers consultants graduate students and anyone interested in personnel selection and classification research

AR 611-5 02/05/2008 PERSONNEL CLASSIFICATION TESTING , Survival Ebooks 1973

alfred c kinsey s revolutionary studies of human sexual behavior are world renowned his meticulous methods of data collection from comprehensive entomological assemblies to personal sex history interviews raised the bar for empirical evidence to an entirely new level in the classification of sex donna j drucker presents an original analysis of kinsey s scientific career in order to uncover the roots of his research methods she describes how his enduring interest as an entomologist and biologist in the compilation and organization of mass data sets structured each of his classification projects as drucker shows kinsey s lifelong mission was to find scientific truth in numbers and through observation and to record without prejudice in the spirit of a true taxonomist kinsey s doctoral work included extensive research of the gall wasp where he gathered and recorded variations in over six million specimens his classification and reclassification of cynips led to the speciation of the genus that remains today during his graduate training kinsey developed a strong interest in evolution and the links between entomological and human behavior studies in 1920 he joined indiana university as a professor in zoology and soon published an introductory text on biology followed by a coauthored field guide to edible wild plants in 1938 kinsey began teaching a noncredit course on marriage where he openly discussed sexual behavior and espoused equal opportunity for orgasmic satisfaction in marital relationships soon after he began gathering case histories of sexual behavior as a pioneer in the nascent field of sexology kinsey saw that the key to its cogency was grounded in observation combined with the collection and classification of mass data to support the institutionalization of his work he cofounded the institute for sex research at indiana university in 1947 he and his staff eventually conducted over eighteen thousand personal interviews about sexual behavior and in 1948 he published sexual behavior in the human male to be followed in 1953 by sexual behavior in the human female as

drucker s study shows kinsey s scientific rigor and his early use of data recording methods and observational studies were unparalleled in his field those practices shaped his entire career and produced a wellspring of new information whether he was studying gall wasp wings writing biology textbooks tracing patterns of evolution or developing a universal theory of human sexuality

Effectiveness of Selection and Classification Testing 1964

a major linguistic study of nominal classification systems across a variety of languages first published in 2000

Manual of Enlisted Classification Procedures 1972

describes and examines five psychological systems for classifying adult male prison inmates warren s i level megargee s mmpi based criminal classification system hunt s conceptual level quay s adult internal management system and the jesness inventory classification system also presents psychometric data on the reliability and validity of each system and illustrates different adjustment patterns of prison inmates annotation c by book news inc portland or

To Readjust Postal Classification on Educational and Cultural Materials 1955

this report compiles a review of each form of these tests together with development information and citation of published reports

To Read Just Postal Classification on Educational and Cultural Materials. H.R. 5139 & H.R. 5142. (84-1). 2013-06-17

bringing together several key elements needed to identify the most promising themes for future research in selection and classification this book s underlying aim is to improve job performance by selecting the right persons and matching them most effectively with the right jobs an emphasis is placed on current innovative research approaches which in some cases depart substantially from traditional approaches the contributors consisting of professionals in measurement personnel research and applied and military psychology discuss where the quantum advances of the last decade should take us further comprehensive coverage of the selection and classification domain is provided including a broad range of topics in each of the following areas performance conceptualization and measurement individual differences and selection and classification decision models the presentations in each of these areas are integrated into a set of coherent themes this integration was the product of structured group discussions which also resulted in a further evolution of some of the ideas presented

Exploring the Limits in Personnel Selection and Classification 1969

this step by step guide is written for r and latent variable model lvm novices utilizing a path model approach and focusing on the lavaan package this book is designed to help readers quickly understand lvms and their analysis in r the author reviews the reasoning behind the syntax selected and provides examples that demonstrate how to analyze data for a variety of lvms featuring examples applicable to psychology education business and other social and health sciences minimal text is devoted to theoretical underpinnings the material is presented without the use of matrix algebra as a whole the book prepares readers to write about and interpret lvm results they obtain in r each chapter features background information boldfaced key terms defined in the glossary detailed interpretations of r output descriptions of how to write the analysis of results for publication a summary r based practice exercises with solutions included in the back of the book and references and related readings margin notes help readers better understand lvms and write their own r syntax examples using data from published work across a variety of disciplines demonstrate how to use r syntax for analyzing and interpreting results r functions syntax and the corresponding results appear in gray boxes to help

readers quickly locate this material a unique index helps readers quickly locate r functions packages and datasets the book and accompanying website at blogs.baylor.edu/rlatentvariable provides all of the data for the book s examples and exercises as well as r syntax so readers can replicate the analyses the book reviews how to enter the data into r specify the lvms and obtain and interpret the estimated parameter values the book opens with the fundamentals of using r including how to download the program use functions and enter and manipulate data chapters 2 and 3 introduce and then extend path models to include latent variables chapter 4 shows readers how to analyze a latent variable model with data from more than one group while chapter 5 shows how to analyze a latent variable model with data from more than one time period chapter 6 demonstrates the analysis of dichotomous variables while chapter 7 demonstrates how to analyze lvms with missing data chapter 8 focuses on sample size determination using monte carlo methods which can be used with a wide range of statistical models and account for missing data the final chapter examines hierarchical lvms demonstrating both higher order and bi factor approaches the book concludes with three appendices a review of common measures of model fit including their formulae and interpretation syntax for other r latent variable models packages and solutions for each chapter s exercises intended as a supplementary text for graduate and or advanced undergraduate courses on latent variable modeling factor analysis structural equation modeling item response theory measurement or multivariate statistics taught in psychology education human development business economics and social and health sciences this book also appeals to researchers in these fields prerequisites include familiarity with basic statistical concepts but knowledge of r is not assumed
