2013-05-15 this volume brings together a selection of the papers and round tables delivered at the
39th aedean conference held at the university of deusto in november 2015 the essays in on the move glancing
backwards to build a future in english studies often begin with typically academic gestures such as retrieving a
classic text and finding new ways of studying its genre or characterization or remarking how certain ungrammatical
constructions have gone frequently unnoticed even in well known texts for various reasons or entangling oneself in
contentions about the adequacy of dissecting a literary text or linguistic problem by using innovative analytical
tools in all cases though there is the intention of putting forth certain views and notions that will help future
scholars to deal in a better light with the dilemmas regularly encountered in literary linguistic and cultural
studies the book opens with three essays by professors bartholomae pullum and río who demonstrate not only their
mastery in their respective subjects but also their ability to tailor their contents to multifarious audiences the
next two sections represent the main body of the e book with nearly forty contributions on both literature and
cultural studies part ii and language and linguistics part iii these short academic pieces are a representative
showcase of the research being done lately in the different areas of expertise the last section of the volume
gathers together the results of four research projects dealing with such engaging topics as postcolonial crime

fiction or forgotten texts by anglo writers about the spanish civil war it is hard to think of any potential reader schooled in english studies who will not find something suitable to their interests and tastes in this volume

The Opposite of Lonely 2023-09-14 affective critical regionality offers a new approach to developing a sharper more nuanced understanding of the relations between place space memory and affect it builds on the author s extensive work on the american west where he developed the idea of expanded critical regionalism to underline the west as multiple dynamic and relational engaged in global local processes tensions between the rooted and the routed and increasingly as relevant to debates around the politics of precarity and vulnerability this book uses affective critical regionality to enable a re valuing of the local as a powerful means to appreciate the everyday and the over looked as vital elements within a more inclusive understanding of how we live exploring a variety of cultural materials including fiction memoir theory poetry and film it demonstrates how this approach can deepen our understanding of and simultaneously provoke new relations with place moving beyond the us context through its use of international theoretical voices and texts it will show how the concept is applicable to other cultural spheres

Affective Critical Regionality 2016-08-17 while human beings might be rational animals they are emotional animals as well emotions play a central role in all areas of our lives and if we are to have a proper understanding of

human life and activity we ought to have a good grasp of the emotions michael s brady structures emotion the
basics around two basic yet fundamental questions what are emotions and what do emotions do in answering these
questions brady provides insight into a core component of all our lives covering the nature of emotion emotion
knowledge and understanding emotion and action emotions and social groups emotion morality and art in this concise
and insightful introduction brady explains why we are often better off as a result of emotion rather than reason
being in the driving seat as our lives both individual and social would be significantly impoverished without the
emotions with a glossary of key terms and suggestions for further reading emotion the basics is an ideal starting
point for anyone seeking a full introduction to the philosophical study of emotion
