Motormouth

2007-09-04

buying a car is a personal choice that has become a more complex decision because of advances in technology and reliability issues that are haunting some car makers many consumers look to zack spencer the host of driving television for straightforward no nonsense expert advice in motormouth you will find out which vehicles are the safest most reliable and best value for your hard earned dollar in an easy to understand format you will get fuel economy ratings pros and cons for performance handling comfort and ease of use standard safety features j d power initial quality and dependability scores base warranty information engine specifications pricing for base models reviews of option packages and trim levels zack s top picks for each category zack provides insider buying tips to help you whether you are buying privately off the internet or making the rounds to different dealers he also advises you on your decision to lease purchase or finance at your fingertips are strategies and lessons learned from people s adventures in car buying some with happy endings and others not so happy from a fuel sipping family friendly hauler to a rubber burning luxury sports car you can rely on motormouth 2011 edition for the information you need to make a wise purchase decision go prepared and don t get stuck with a lemon take motormouth along for the ride

The Complete Idiot's Guide to Green Living

2022-07-13

the environmental movement and rising awareness of global warming have sparked an interest in green living people want to know what they can do to live sustainable lives in this book you will find an overview of global warming and environmental degradation of air water soil what sustainable living is and how to do it how to cut down on carbon output the cause of global warming with alternative cars and fuels and environmentally friendly home and lawn care products

Theory of Ground Vehicles

2010-09-01

theory of ground vehicles a leading and authoritative text for advancing ground vehicle mobility theory of ground vehicles fifth edition presents updated and expanded coverage of the critical factors affecting the performance handling and ride essential to the development and design of road and off road vehicles replacing internal combustion engines with zero emission powerplants in ground vehicles to eliminate greenhouse gas emissions for curbing climate change has received worldwide attention by both the vehicle industry and governmental agencies to enhance safety traffic flow and operating efficiency of road transport automated driving systems have been under active development with growing interest in the exploration of the moon mars and beyond research in terramechanics for guiding the development of extraterrestrial rovers has been intensified in this new edition these and other topics of interest in the field of ground vehicle technology are explored and technical data are updated new features of this edition include expanded coverage of the fundamentals of electric drives hybrid electric drives and fuel cell technology introduction to the classification and operating principles of the automated driving system and cooperative driving automation applications of terramechanics to guiding the development of extraterrestrial rovers elaboration on the approach to achieving the optimal operating efficiency of all wheel drive off road vehicles introduction to updated iso standards for evaluating vehicle ride an updated and comprehensive text and reference for both the educational and professional communities theory of ground vehicles fifth edition will prove invaluable to aspiring and practicing engineers seeking to solve real world road and off road vehicle mobility problems

Green Transportation Basics

2008-09-19

our automobile culture is devastating for the environment but private passenger vehicles are unlikely to disappear from our roads anytime soon greener cars and fuels will be a necessity for many years to come green transportation basics is a guide to greening your personal driving habits by dramatically improving the efficiency of an existing vehicle using simple measures such as trip planning and regular maintenance to improve fuel economy this handy guide also explores the most promising new green cars and trucks including electric vehicles hybrids plug in hybrids and natural gas cars and it critically examines sustainable fuels including ethanol biodiesel straight vegetable oil hydrogen and biomethane evaluating each according to a set of established criteria each green fuel source must be socially economically and environmentally sustainable have a high net energy yield be clean abundant renewable affordable don't let your dream of greening your transportation idle green transportation basics will guide you through the myths and misconceptions and provide clear options for the road to a more sustainable future

Review of the 21st Century Truck Partnership

2006-05

the 21st century truck partnership 21ctp a cooperative research and development partnership formed by four federal agencies with 15 industrial partners was launched in the year 2000 with high hopes that it would dramatically advance the technologies used in trucks and buses yielding a cleaner safer more efficient generation of vehicles review of the 21st century truck partnership critically examines and comments on the overall adequacy and balance of the 21ctp the book reviews how well the program has accomplished its goals evaluates progress in the program and makes recommendations to improve the likelihood of the partnership meeting its goals key recommendations of the book include that the 21ctp should be continued but the future program should be revised and better balanced a clearer goal setting strategy should be developed and the goals should be clearly stated in measurable engineering terms and reviewed periodically so as to be based on the available funds

Advanced Electric Drive Vehicles

2014-08-07

electrification is an evolving paradigm shift in the transportation industry toward more efficient higher performance safer smarter and more reliable vehicles there is in fact a clear trend to move from internal combustion engines ices to more integrated electrified powertrains providing a detailed overview of this growing area advanced electric drive vehicles begins with an introduction to the automotive industry an explanation of the need for electrification and a presentation of the fundamentals of conventional vehicles and ices it then proceeds to address the major components of electrified

vehicles i e power electronic converters electric machines electric motor controllers and energy storage systems this comprehensive work covers more electric vehicles mevs hybrid electric vehicles hevs plug in hybrid electric vehicles phevs range extended electric vehicles reevs and all electric vehicles evs including battery electric vehicles bevs and fuel cell vehicles fcvs describes the electrification technologies applied to nonpropulsion loads such as power steering and air conditioning systems discusses hybrid battery ultra capacitor energy storage systems as well as 48 v electrification and belt driven starter generator systems considers vehicle to grid v2g interface and electrical infrastructure issues energy management and optimization in advanced electric drive vehicles contains numerous illustrations practical examples case studies and challenging questions and problems throughout to ensure a solid understanding of key concepts and applications advanced electric drive vehicles makes an ideal textbook for senior level undergraduate or graduate engineering courses and a user friendly reference for researchers engineers managers and other professionals interested in transportation electrification

Greening Auto Jobs

2011-07-03

greening auto jobs a critical analysis of the green job solution details current and problematic understandings of what constitutes a green job adopting an approach grounded in critical political economy this book presents a framework to scrutinize the green job solution and the theoretical framework which overwhelmingly informs contemporary green job creation efforts and ecological modernization the text also explores the tensions that encircle the world of work and environmental action often referred to as jobs versus the environment by detailing the conflicting commitments of political economic actors to the idea of green job creation these conflicts are outlined through an examination of the political economic debate that has surrounded the australian government s environmental plans from 2008 to 2012 and the conflicting positions of australian trade unions on environmentally transitioning the world of work interviews with key political economic actors provide in depth and nuanced understandings of the varied perspectives of political and union leaders in australia the second part of the book presents a detailed case study of the posited green job solution within the specific context of the australian automotive manufacturing industry the case study is also informed by interviews with key industry union and policymakers the automotive industry is scrutinized not only because it has expressed going green as important to its long term economic future but because the australian government declared that its 6 2 billion new car plan for a greener future policy would create green jobs therefore the book engages with the task of examining the three multinational vehicle producers operating in australia ford gm holden and toyota and how they have responded and engaged with the idea of green jobs greening the manufacturing process and the vehicles they produce in australia

Assessment of Fuel Economy Technologies for Light-Duty Vehicles

2013-05-20

various combinations of commercially available technologies could greatly reduce fuel consumption in passenger cars sport utility vehicles minivans and other light duty vehicles without compromising vehicle performance or safety assessment of technologies for improving light duty vehicle fuel economy estimates the potential fuel savings and costs to consumers of available technology combinations for three types of engines spark ignition gasoline compression ignition diesel and hybrid according to its estimates adopting the full combination of improved technologies in medium and large cars and pickup trucks with spark ignition engines could reduce fuel consumption by 29 percent at an additional cost of 2 200 to the consumer replacing spark ignition engines with diesel engines and components would yield fuel savings of about 37 percent at an added cost of approximately 5 900 per vehicle and replacing spark ignition engines with hybrid engines and components would reduce fuel consumption by 43 percent at an increase of 6 000 per vehicle the book focuses on fuel consumption the amount of fuel consumed in a given driving distance because energy savings are directly related to the amount of fuel used in contrast fuel economy measures how far a vehicle will travel with a gallon of fuel because fuel consumption data indicate money saved on fuel purchases and reductions in carbon dioxide emissions the book finds that vehicle stickers should provide consumers with fuel consumption data in addition to fuel economy information

Encyclopedia of Electrochemical Power Sources

2013-05-02

the encyclopedia of electrochemical power sources is a truly interdisciplinary reference for those working with batteries fuel cells electrolyzers supercapacitors and photo electrochemical cells with a focus on the environmental and economic impact of electrochemical power sources this five volume work consolidates coverage of the field and serves as an entry point to the literature for professionals and students alike covers the main types of power sources including their operating principles systems materials and applications serves as a primary source of information for electrochemists materials scientists energy technologists and engineers incorporates nearly 350 articles with timely coverage of such topics as environmental and sustainability considerations

Handbook of Energy

2009-03-01

handbook of energy volume i diagrams charts and tables provides comprehensive organized coverage on all phases of energy and its role in society including its social economic political historical and environmental aspects while there is a wealth of information about energy available it is spread across many books journals and websites and it tends to target either a particular form of energy or a specific audience handbook of energy provides a central repository of information that meets diverse user communities it focuses on visual graphic and tabular information in a schematic format individuals and researchers at all educational levels will find the handbook of energy to be a valuable addition to their personal libraries easy to read technical diagrams and tables display a vast array of data and concepts

The Carbon Buster's Home Energy Handbook

2008-12-16

how to reduce carbon emissions and save over 15 000 in energy costs over five years

Energy Independence

2010-11-16

energy independence is the essential guide to the most viable and affordable alternative energy solutions for the everyday consumer including solar panels wind generators hydrogen fuel cells wood hydro electric geothermal heat pumps and more for all those seeking either to supplement their traditional fuel burning furnace or to revamp their home this book has what they need to get started they ll learn about the most progressive and advanced options as well as tried and true energy conservation techniques they ll learn how much each method costs and how quickly they will recoup any investment also including a chapter on alternative fuel cars this book has been revised and updated with the most recent stats technology costs and advice it is a must for anyone urbanite suburbanite or rural dweller who relies on traditional oil burning sources but has decided it s high time to be proactive both about cutting fuel costs and achieving freedom from fossil fuel dependence

Green Technologies and the Mobility Industry

2010-01-01

this book features 20 sae technical papers originally published in 2009 and 2010 which showcase how the mobility industry is developing greener products and staying responsive if not ahead of new standards and legal requirements these papers were selected by sae international s 2010 president dr andrew brown jr executive director and chief technologist for delphi corporation authored by international experts from both industry and academia they cover a wide range of cutting edge subjects including powertrain electrification alternative fuels new emissions standards and remediation strategies nanotechnology sustainability in vehicle networking and how various countries are also stepping up to the green challenge green technologies and the mobility industry also offers additional useful information the most recent delphi worldwide emissions standards booklets which will be shipped with the print version of this title or as part of the pdf download if you purchase the ebook version exclusive multimedia package watch dr andrew brown jr describe the new trends in green mobility download a free sae presentation on green technologies and the mobility industry challenging times an interview with dr andrew brown jr buy the set and save this book is the first in the trilogy from sae on safe green and connected vehicles in the mobility industry edited by dr andrew brown jr this trilogy can be purchased in a combination of the following sets green technologies and active safety in the mobility industry green technologies and connectivity in the mobility industry active safety and connectivity in the mobility industry buy the entire 3 volume set to save the most green safe connected the future of mobility

Green Energy

2020-06-15

this book examines the history of human energy use as well as the latest energy developments in the united states it provides the opinions and perspectives of government and business leaders activists and ordinary americans on both sides of the issue

Reducing Fuel Consumption and Greenhouse Gas Emissions of Medium- and Heavy-Duty Vehicles, Phase Two

2019-11-01

medium and heavy duty trucks motor coaches and transit buses collectively medium and heavy duty vehicles or mhdvs are used in every sector of the economy the fuel consumption and greenhouse gas emissions of mhdvs have become a focus of legislative and regulatory action in the past few years this study is a follow on to the national research council s 2010 report technologies and approaches to reducing the fuel consumption of medium and heavy duty vehicles that report provided a series of findings and recommendations on the development of regulations for reducing fuel consumption of mhdvs on september 15 2011 nhtsa and epa finalized joint phase i rules to establish a comprehensive heavy duty national program to reduce greenhouse gas emissions and fuel consumption for on road medium and heavy duty vehicles as nhtsa and epa began working on a second round of standards the national academies issued another report reducing the fuel consumption and greenhouse gas emissions of medium and heavy duty vehicles phase two first report providing recommendations for the phase ii standards this third and final report focuses on a possible third phase of regulations to be promulgated by these agencies in the next decade

Focus On: 100 Most Popular Compact Cars

2017-09-25

neoliberalism is most commonly associated with free trade the minimal state and competitive individualism but it is not simply national economies that are being neoliberalized it is us inspired by michel foucault and other governmentality theorists this volume s contributors reveal how neoliberalism s power to redefine normal is refashioning every facet of our lives from consumer choices and how we approach the environment to questions of national security and border control by challenging neoliberal ideas and practices this thought provoking collection encourages us to think of the world as more than a marketplace and to open ourselves to the possibilities of resistance

Focus On: 100 Most Popular Station Wagons

2017-03-11

fundamentals of integrated vehicle realization is a unique and solid contribution to the subject of product development centered on the automotive industry automotive manufacturers and suppliers are under pressure to transform themselves and deliver a higher level of product refinement coupled with more functionality this could lead to the sprouting of organizational structures not in alignment with the required product development phases consequently many product development initiatives may be cancelled or dropped at later stages despite all the efforts and financial investments therefore it is vital that organizational unity be always intact during any transformation a highly effective organization should always act as one cohesive entity dedicated to serving the customer with creative aptitude integrative skills analytical thinking and synergistic management written by dr mohamed el sayed director of the school of engineering technology at eastern michigan university fundamentals of integrated vehicle realization addresses an essential need for deep knowledge in the realm of vehicle development process from idealization to market launch the book covers realization process phases process and vehicle characteristics and attributes front end innovation virtual and physical realization among other topics

Focus On: 100 Most Popular Sedans

2012

steers buyers through the the confusion and anxiety of new and used vehicle purchases like no other car and truck book on the market dr phil along with george iny and the editors of the automobile protection association pull no punches

Governing the Social in Neoliberal Times

2015-05-28

at the recent un climate change conferences in copenhagen cancun and durban the developed nations promised hundreds of billions of dollars in financial aid to help developing countries overcome global climate change dangers the developed nations will need to spend many more billions to limit their own greenhouse gas pollution the main cause of global warming and climate change will all this money and effort be wasted this book argues that nearly all of the world s climate policy makers and expert advisors have been making tragic mistakes that ensure the failures of climate change mitigation attempts the great majority of climate change programs from american congressional bills to cap and trade economic incentive schemes to the kyoto protocol and other international treaties rely on greenhouse gas emissions reduction targets that will prove oc too little too lateoco by deferring strict pollution controls too far into the future the inadequate emissions reduction measures also will not be able to bridge the gap between the highest priorities of developed and developing nations vast discharges of greenhouse gases authorized by weak emissions reduction programs in the next several decades virtually guarantee that the cumulative concentration of greenhouse gases in the atmosphere will keep increasing while climate change continues to grow worse rather than adopting ineffectual emissions reduction programs that cannot limit the cumulative concentration of greenhouse gases in the air this book proposes a shift to a oc cleanoco technology replacement strategy that could support current lifestyles and expanding economic development without further damaging our climate the only way to reduce the greenhouse gas levels in the atmosphere enough to decrease climate change hazards is to replace large pollution sources as rapidly as feasible in as many industrial sectors and geographic regions as possible with oc cleanoco alternative technologies processes and methods
