Information technology (IT) is a field that encompasses the use of computers, software, and networks to store, retrieve, and communicate information. It is a rapidly growing industry that is essential to the functioning of modern society. The Caribbean Examinations Council (CXC) Information Technology syllabus is designed to provide students with a comprehensive understanding of the field, covering topics such as computer systems, software development, and data management. The syllabus is divided into two main sections: Information Technology and Information Systems. The Information Technology section focuses on the technical aspects of the field, while the Information Systems section focuses on the application of IT in various contexts. The syllabus is designed to be flexible, allowing schools to tailor their teaching to their own needs and resources. The CXC Information Technology syllabus is a valuable resource for students and teachers alike, providing a clear and concise overview of the field and its applications.
