Handbook of Research on Mobile Technology, Constructivism, and Meaningful Learning

2017-10-31

in recent years there has been a renewed focus on stem education in the united states fueled by evidence that young learners competencies in science technology engineering and mathematics are falling behind those of their global peers scholars and practitioners are beginning to utilize the new pedagogical opportunities offered by mobile learning to improve the successes

of teachers and k 12 students across stem subjects mobile learning and stem case studies in practice is a comprehensive collection of case studies that explore mobile learning s support of stem subjects and that utilize mobile technology to facilitate unique and effective k 12 teaching and learning experiences in addition to its focus on stem achievement for researchers this volume is a resource for teachers working to implement mobile learning initiatives into their classrooms mobile learning and stem also includes research that is applicable to classrooms in nations around the world where few students from underrepresented racial and socioeconomic backgrounds are entering into stem jobs concluding with a summary of its research and its implications to future scholarship and practice this book is a springboard for practitioners specialists higher education instructors and researchers who want to establish better practices in schools and raise student achievement in stem subjects

How to Reach & Teach All Students in the Inclusive Classroom

1996

time tested activities to teach the key ideas of science and turn students into scientists this witty book adapts classic investigations to help students in grades 3 through 8 truly think and act like scientists chapter by chapter this accessible primer illustrates a big idea about the nature of science and offers clear links to the next generation science standards and its science and engineering practices you ll also find a reader friendly overview of the ngss guidance on adapting the activities to your grade level including communicating instructions facilitating discussions and managing safety concerns case studies of working scientists to highlight specifics about the science and engineering practices

Mobile Learning and STEM

2015-12-07

while many school districts and institutions of higher education still cling to the traditional agrarian school year with a factory model delivery of education and carnegie units based on seat time when most people are no longer farmers factory workers or reliant on learning in a classroom there are bursts of promising practices that buck the norm by questioning the educational value of these traditions though researchers have investigated the potential of students learning in their own homes via personalized instruction delivered by computers rather than attending traditional institutions the status quo in education has remained stubbornly resistant to change mixed reality simulations year round schooling grouping students by competencies instead of age and game based teaching are just a few of the educational innovations that seek to maximize learning by recognizing that innovation is essential for successfully teaching students in the modern era the handbook of research on innovations in non traditional educational practices is a comprehensive reference source that examines various educational innovations how they have developed workarounds to navigate traditional systems and their potential to radically transform teaching and learning with each chapter highlighting a different educational innovation such as experiential learning game based learning online learning and inquiry based learning and their applications in all levels of education this book explores the issues and challenges these educational innovations face as well as their impact it is intended for academicians professionals administrators and researchers in education and specifically benefits academic deans vice presidents of academic affairs graduate students faculty technology leaders directors of teaching and learning centers curriculum and instructional designers policymakers principals and superintendents and

teachers interested in educational change

Learning Science by Doing Science

2016-12-22

what activities might a teacher use to help children explore the life cycle of butterflies what does a science teacher need to conduct a leaf safari for students where can children safely enjoy hands on experience with life in an estuary selecting resources to teach elementary school science can be confusing and difficult but few decisions have greater impact on the effectiveness of science teaching educators will find a wealth of information and expert guidance to meet this need in resources for teaching elementary school science a completely revised edition of the best selling resource guide science for children resources for teachers this new book is an annotated guide to hands on inquiry centered curriculum materials and sources of help in teaching science from kindergarten through sixth grade companion volumes for middle and high school are planned the guide annotates about 350 curriculum packages describing the activities involved and what students learn each annotation lists recommended grade levels accompanying materials and kits or suggested equipment and ordering information these 400 entries were reviewed by both educators and scientists to ensure that they are accurate and current and offer students the opportunity to ask questions and find their own answers experiment productively develop patience persistence and confidence in their own ability to solve real problems the entries in the curriculum section are grouped by scientific area— life science earth science physical science and multidisciplinary and applied science— and by type— core materials supplementary materials and science activity books additionally a section of references for teachers provides annotated listings of books about science and teaching directories and guides to

science trade books and magazines that will help teachers enhance their students science education resources for teaching elementary school science also lists by region and state about 600 science centers museums and zoos where teachers can take students for interactive science experiences annotations highlight almost 300 facilities that make significant efforts to help teachers another section describes more than 100 organizations from which teachers can obtain more resources and a section on publishers and suppliers give names and addresses of sources for materials the guide will be invaluable to teachers principals administrators teacher trainers science curriculum specialists and advocates of hands on science teaching and it will be of interest to parent teacher organizations and parents
