ideational policy stabilization to explain stable policy choices despite changing incentives historical legacies are frequently invoked in popular and academic accounts of the politics of migration but the mechanisms of transmission are left underspecified this work contributes to research on migration and to theories of public policy by arguing that the missing link between past events and present choices is ideational initially a historical constellation of interests leads actors to defend policy ideas that match the historical environment but over time ideas can detach themselves from interests and stabilize into societal dispositions shared values and identities this occurs if elites build a discursive consensus around a policy idea and if bureaucrats develop concomitant policy practices the book s empirical section analyses ideational stabilization in catalonia spain which takes an inclusive approach to immigration and in south tyrol italy where immigration is framed as a threat the comparison shows that these differences can be explained by the political economy of historical industrialization and internal migration catalans were in the driving seat of industrialization receiving unskilled migrant workers from the rest of spain to boost their own economy south tyroleans on the other hand were in the passenger seat perceiving incoming italians as colonizers over time socioeconomic conditions changed and internal migration was replaced with international migration yet with historical ideas having stabilized into dispositions political and administrative elites continued to understand immigration through the now obsolete perspective of economic opportunity in catalonia and ethnic competition in south tyrol transformations in governance is a major academic book series from oxford university press it is designed to accommodate the impressive growth of research in comparative politics international relations public policy federalism and environmental and urban studies concerned with the dispersion of authority from central states to supranational institutions subnational governments and public private networks it brings together what is the future of the oil and gas sector in lebanon following the recent discovery of these valuable resources in the southern mediterranean including in the cypriot and israeli offshore reserves the possibility of lebanon also becoming a petroleum producing country has been raised this collection of essays addresses the major challenges and opportunities that accompany the country s hope to join the petroleum club covering the key policy issues from lebanon s susceptibility to the oil curse to the environmental risks of production this book brings together expert analysis to offer answers at the institutional level of central importance the contributors argue is that for lebanon to benefit from the discovery of petroleum it must first reform its institutions with the full support of the voting public and civil society combining rigorous quantitative and qualitative research the lebanese center for policy studies has produced here an essential book that puts petroleum in lebanon and the important questions that come with it within a global perspective for too long egypt s system of government was beholden to the interests of the elite in power aided by the massive apparatus of the security state breaking point came on 25 january 2011 but several years after popular revolt enthralled a global audience the struggle for democracy and basic freedoms are far from being won media revolution and politics in egypt the story of an uprising examines the political and media dynamic in pre and post revolution egypt and what it could mean for the country's democratic transition we follow events through the period leading up to the 2011 revolution eighteen days of uprising military rule an elected president s year in office and his ouster by the military activism has expanded freedoms of expression only to see those spaces contract with the resurrection of the police state and with sharpening political divisions the facts have become amorphous as ideological trends cling to their own narratives of truth based on an innovative theoretical framework combining theories of eu policy making negotiation and implementation this comprehensive book examines eu climate and energy policies from the early 1990s until the adoption of new policies for 2030 the authors investigate how the linking of climate and energy concerns in policy packages has facilitated agreement among eu leaders with very different policy ambitions employing in depth studies from a diverse range of energy economic countries the book also explores the impact of the implementation of policies on

the climate and energy policy framework and the energy union initiative this book explores the growing role of cities and regions as sub national actors in shaping global governance far from being merely carried along by global forces cities have become active players in making and maintaining the networks and connections that give shape to contemporary globalization exploring examples from europe north america and beyond the authors reconcile the two separate yet complimentary theoretical and analytical lenses adopted by urban studies and international relations as they address the nature of cities and internationality the authors challenge academic debate that is reluctant to cross disciplinary boundaries and thus offer more relevant answers to the new phenomenon of international city action and how it weakens the traditional prerogative of the state as primary actor in the international realm conclusions focus on how this new internationality opens opportunities for cities and regions but also contains potential pitfalls that can constrain policy options and challenge the legitimacy of policy making at all scales

The Routledge Handbook of Magazine Research 2015-08-27 all of the short essays in this volume look past the rhetoric of technological determinism and reliance on the natural logic of the market to consider the power of law and policy to steer new media in one direction or another many of the essays look backwards through history or outwards across national borders they all look forward to how today s policies will shape the future of the internet and society a particular focus of interest for some of the contributors is the revelations that followed edward snowden s mass disclosure of classified documents in 2013 which revealed the u s national security agency s systematic and longstanding program of monitoring global communications some chapters consider different countries varying approaches to regulating the proliferation of online communication while others assess the current state of digital technology they all call for policy interventions to solve market failures this book was originally published as a special issue of critical studies in media communication

The Olympic Legacy 2015-02-16 in this book christina zuber outlines a theory of ideational policy stabilization to explain stable policy choices despite changing incentives historical legacies are frequently invoked in popular and academic accounts of the

politics of migration but the mechanisms of transmission are left underspecified this work contributes to research on migration and to theories of public policy by arguing that the missing link between past events and present choices is ideational initially a historical constellation of interests leads actors to defend policy ideas that match the historical environment but over time ideas can detach themselves from interests and stabilize into societal dispositions shared values and identities this occurs if elites build a discursive consensus around a policy idea and if bureaucrats develop concomitant policy practices the book s empirical section analyses ideational stabilization in catalonia spain which takes an inclusive approach to immigration and in south tyrol italy where immigration is framed as a threat the comparison shows that these differences can be explained by the political economy of historical industrialization and internal migration catalans were in the driving seat of industrialization receiving unskilled migrant workers from the rest of spain to boost their own economy south tyroleans on the other hand were in the passenger seat perceiving incoming italians as colonizers over time socioeconomic conditions changed and internal migration was replaced with international migration yet with historical ideas having stabilized into dispositions political and administrative elites continued to understand immigration through the now obsolete perspective of economic opportunity in catalonia and ethnic competition in south tyrol transformations in governance is a major academic book series from oxford university press it is designed to accommodate the impressive growth of research in comparative politics international relations public policy federalism and environmental and urban studies concerned with the dispersion of authority from central states to supranational institutions subnational governments and public private networks it brings together work that advances our understanding of the organization causes and consequences of multilevel and complex governance the series is selective containing annually a small number of books of exceptionally high quality by leading and emerging scholars the series is edited by liesbet hooghe and gary marks of the university of north carolina chapel hill and walter mattli of the university of oxford

The Future of Internet Policy 2021-07-12 what is the future of the oil and gas sector in lebanon following the recent discovery of these valuable resources in the southern mediterranean including in the cypriot and israeli offshore reserves the possibility of lebanon also becoming a petroleum producing country has been raised this collection of essays addresses the major challenges and opportunities that accompany the country s hope to join the petroleum club covering the key policy issues from lebanon s susceptibility to the oil curse to the environmental risks of production this book brings together expert analysis to offer answers at the institutional level of central importance the contributors argue is that for lebanon to benefit from the discovery of petroleum it must first reform its institutions with the full support of the voting public and civil society combining rigorous quantitative and qualitative research the lebanese center for policy studies has produced here an essential book that puts petroleum in lebanon and the important questions that come with it within a global perspective

Advances in Remote Sensing-based Disaster Monitoring and Assessment 2019-09-19 for too long egypt s system of government was beholden to the interests of the elite in power aided by the massive apparatus of the security state breaking point came on 25 january 2011 but several years after popular revolt enthralled a global audience the struggle for democracy and basic freedoms are far from being won media revolution and politics in egypt the story of an uprising examines the political and media dynamic in pre and post revolution egypt and what it could mean for the country s democratic transition we follow events through the period leading up to the 2011 revolution eighteen days of uprising military rule an elected president s year in office and his ouster by the military activism has expanded freedoms of expression only to see those spaces contract with the resurrection of the police state and with sharpening political divisions the facts have become amorphous as ideological trends cling to their own narratives of truth Five Year Mission 2015-10-01 based on an innovative theoretical framework combining theories of eu policy making negotiation

and implementation this comprehensive book examines eu climate and energy policies from the early 1990s until the adoption of new policies for 2030 the authors investigate how the linking of climate and energy concerns in policy packages has facilitated agreement among eu leaders with very different policy ambitions employing in depth studies from a diverse range of energy economic countries the book also explores the impact of the implementation of policies on the climate and energy policy framework and the energy union initiative

Investigating Terrorism 2016-05-27 this book explores the growing role of cities and regions as sub national actors in shaping global governance far from being merely carried along by global forces cities have become active players in making and maintaining the networks and connections that give shape to contemporary globalization exploring examples from europe north america and beyond the authors reconcile the two separate yet complimentary theoretical and analytical lenses adopted by urban studies and international relations as they address the nature of cities and internationality the authors challenge academic debate that is reluctant to cross disciplinary boundaries and thus offer more relevant answers to the new phenomenon of international city action and how it weakens the traditional prerogative of the state as primary actor in the international realm conclusions focus on how this new internationality opens opportunities for cities and regions but also contains potential pitfalls that can constrain policy options and challenge the legitimacy of policy making at all scales
