Adler's Physiology of the Eye 2011-04-04 in arranging gershwin author ryan ba agale approaches george gershwin s iconic piece rhapsody in blue not as a composition but as an arrangement a status it has in many ways held since its inception in 1924 yet one unconsidered until now shifting emphasis away from the notion of the rhapsody as a static work by a single composer ba agale posits a broad vision of the piece that acknowledges the efforts of a variety of collaborators who shaped the rhapsody as we know it today arranging gershwin sheds new light on familiar musicians such as leonard bernstein and duke ellington introduces lesser known figures such as ferde grof and larry adler and remaps the terrain of this emblematic piece of american music at the same time it expands on existing approaches to the study of arrangements an emerging and insightful realm of american music studies as well as challenges existing and entrenched definitions of composer and composition based on a host of newly discovered manuscripts the book significantly alters existing historical and cultural conceptions of the rhapsody with additional forays into visual media including the commercial advertising of united airlines and woody allen s manhattan it moreover exemplifies how arrangements have contributed not only to the iconicity of gershwin and rhapsody in blue but also to music making in america its people their pursuits and their processes

Composers In America 1977-07-21 reorienting the east explores the islamic world as it was encountered envisioned and elaborated by jewish travelers from the middle ages to the early modern period the first comprehensive investigation of jewish travel writing from this era this study engages with questions raised by postcolonial studies and contributes to the debate over the nature and history of orientalism as defined by edward said examining two dozen hebrew and judeo arabic travel accounts from the mid twelfth to the early sixteenth centuries martin jacobs asks whether jewish travelers shared western perceptions of the islamic world with their christian counterparts most jews who detailed their journeys during this period hailed from christian lands and many sailed to the eastern mediterranean aboard christian owned vessels yet jacobs finds that their descriptions of the near east subvert or reorient a decidedly christian vision of the region the accounts from the crusader era in particular are often critical of the christian church and present glowing portraits of muslim jewish relations by contrast some of the later travelers discussed in the book express condescending attitudes toward islam muslims and near eastern jews placing shifting perspectives on the muslim world in their historical social and literary contexts jacobs interprets these texts as mirrors of changing jewish self perceptions as he argues the travel accounts echo the various ways in which premodern jews negotiated their mingled identities which were neither exclusively western nor entirely eastern

Arranging Gershwin 2014 conflict and resolution progressive educators and the question of religion investigates the impact of religion in shaping the progressive education movement historians of progressivism have described the progressive movement as a secularized version of fundamentally religious impulses a kind of secularized evangelicalism many progressive political and social reformers were subject to powerful religious influences but were unable to adhere to the theological tenets held by their parents or grandparents instead they secularized their religious impulses and devoted

themselves to social and political reform conflict and resolution extends this analysis to progressive educators through biographical sketches of five leaders in the progressive education movement and an examination of the role of religion in their work this investigation models three distinct ways in which progressive educators mediated their youthful religious experiences and their adult lives and careers schoolmasters jerry voorhis of california and felix adler of new york city were integrators those who actively incorporated firmly held religious beliefs into their educational thought and practice educational philosophers william heard kilpatrick and john lawrence childs were deniers those who rejected religious experience in their educational pursuits but not necessarily in their personal lives finally preeminent progressive educator john dewey was a reinterpreter one who recast religious concepts and terminology to fit his newly emerging educational approaches the religious experiences of each of these men left their mark on the progressive education movement the richly textured biographical sketches found in conflict and resolution progressive educators and the question of religion portray the interior lives of these figures and explain how their religious experiences impacted their work the book will be of interest to educational historians biographers and others interested in the development of american education whether they come from a religious or secular mindset

From Josephus to Yosippon and Beyond 2024-06-13 the analyses and accounts of the history of the second international often go up to 1914 the year its anti war efforts were to prove futile all actions of the socialists during world war i were discussed in the context of the pathway to the third international the author aims to present a somewhat different picture from existing views by examining the thoughts and actions of socialists in the years 1914 1923 beyond the framework of whether they supported or opposed the third international he describes what circumstances led to the formation of communism and social democracy which divided in two the international socialist movement for almost 70 years paying attention to various issues deeply involved in international and domestic politics as well as in the socialist movement masao nishikawa taught western history at the tokyo women s christian college 1966 1968 the university of tokyo 1968 1994 and senshō university 1994 2004 he was visiting professor at ruhr university bochum 1976 1977 and bremen university 1988 1989 upon retirement he was made professor emeritus at the university of tokyo he had a worldwide fame as a specialist of international socialist movements

Inland Architect and Builder 1897 this book is an account of the emergence of a national socialist party from the german nationalist labor movement in the multi national austrian empire made up of unions chiefly concerned with protecting workers of german nationality from the competition of cheap czech labor the german nationalist labor movement was strongest in bohemia where the rivalry between czechs and germans in the labor market was most acute much of austrian industry was in northern bohemia and as it expanded in the latter half of the nineteenth century large numbers of czechs moved from the countryside into the industrial centers many german workers were displaced by the czech immigrants who were accustomed to lower standards of living and therefore willing to accept lower pay the anger of the german workers developed into an intense hatred of the czechs the czechs resented german domination and as a result of the mutual enmity the socialist international unions split into german and czech sections some of these became separate german and czech nationalist unions other german nationalist unions grew out of the protective associations that were organized by groups of german workers against the czech danger around the turn of the century the leaders of some of the more militant german nationalist unions decided that they could further the members interests more

effectively if the unions were affiliated with a political party under their own control collaboration with radical nationalists had proved disappointing
