The Medical Examiner, and Record of Medical Science *1851*

from tv's CSI to bestsellers by Patricia Cornwell and Kathy Reichs, interest in forensics is at an all-time high. Now one of our most respected forensic pathologists gives a behind-the-scenes look at eleven of his most notorious cases cracked by scientific analysis and Sherlock Holmesian deduction as Chief Medical Examiner of Rockland County, New York, for almost thirty-five years. Dr. Frederick Zugibe literally wrote the book on the subject; his widely used textbook is considered the definitive text. Over the years, he has pioneered countless innovations, including the invention of a formula to soften mummified fingers, enabling fingerprinting and thus identification of a long-deceased victim. He has appeared as an expert hundreds of times in the media and in the courtroom, and not once has a jury failed to accept his testimony over opposing expert witnesses. And now, in *Dissecting Death*, he has opened the door to the world of forensic pathology in all its gruesome and fascinating mystery. Dr. Zugibe takes us through the process all good pathologists follow, using eleven of his most challenging cases. With him, we visit the often grisly, though sometimes shockingly banal crime scene; we inspect the body, palpate the wounds, search for clues in the hair and skin. We employ ultraviolet light, strange measuring devices, optical instruments. We see how a forensic pathologist determines the hour of death, the type of weapon used, the killer's escape route. And then we enter the lab, the world of high-tech criminal detection: DNA testing, fingerprinting, gunshot patterns, dental patterns, X-rays. But not every case ends in a conviction, and in a closing chapter, Dr. Zugibe examines some recent high-profile cases in which blunders led to killers going free, either because the wrong party was brought to trial or because the evidence presented didn't do the trick, including Jon Benet Ramsey's murder and, of course, the O.J. Simpson trial.

From USA Today bestselling author P.D. Workman, something just doesn't add up. Assistant Medical Examiner Kenzie Kirsch thinks that the deaths from Champlain House are linked by more than place. If she is right in her theory, the nursing homes, emergency rooms, and the morgue are all going to be overwhelmed. Only she can't get anyone to listen to her. The suggestion of a public health hazard may cause widespread panic, and it is a really bad time politically to be spreading gossip about an unknown contagion. The CDC needs proof, and Kenzie Kirsch needs to be silenced one way or another. Every book by P.D. Workman that I've read has been a gripping one. However, different the genres are, going from lighter mysteries to really dark ones, this is one of my favourite most dependable authors. If you are a reader of the Zachary Goldman Mysteries series, you have already met Kenzie Kirsch. This series is a spinoff from Zachary Goldman Mysteries, giving Kenzie a front and center position in solving medical mysteries. Looking for a strong female lead in an engaging medical mystery, award-winning and USA Today bestselling author P.D. Workman brings you an up-and-coming medical examiner's assistant who is right up your alley. Join Dr. Kenzie Kirsch as she uncovers mysteries, conspiracies, and thrills.
