owen w gilman jr stresses the us experience of war in the twenty first century and argues that wherever and whenever there is war there will be imaginative responses to it especially the recent wars in afghanistan and iraq since the trauma of september 11 the experience of americans at war has been rendered honestly and fully in a wide range of texts creative nonfiction and journalism film poetry and fiction these responses gilman contends have packed a lot of power and measure up even to world war ii s literature and film like few other books gilman s volume studies these new texts among them kevin powers s debut novel the yellow birds and phil clay s short stories redeployment along with the films the hurt locker american sniper and billy lynn s long halftime walk for perspective gilman also looks at some touchstones from the vietnam war compared to a few of the big vietnam books and films this new material has mostly been read and watched by small audiences and generated less discussion gilman exposes the circumstances in american culture currently preventing literature and film of our recent wars from making a significant impact he contends that americans inclination to demand distraction limits learning from these compelling responses to war in the past decade according to gilman where there should be clarity and depth of knowledge we instead face misunderstanding and the anguish endured by veterans betrayed by war and our lack of understanding

They Were Families

2015-11-17

In surveying the literature on war and its aftermath including the literature on post-traumatic stress disorder (PTSD), there is virtually nothing about the families of veterans. These families are the scapegoats of war; their story is timeless, but the author believes the time has come to tell it. The RAND Corporation study initiated by the National Military Families Association reports that military families have more emotional distress and anxiety than the general population. 95% of these families feel that others outside the military are unaware of their dilemmas. They are correct: the needs of the families of our veterans are for the most part ignored. In particular, their children are not given the support they need to offset the toxic conditions of war that is brought home. The distress in the homes of veterans creates an epigenetic burden that is carried most heavily by children. Investigations into the mechanisms of the intergenerational transmission of trauma reveal that the children of veterans who have seen combat and who have returned from war with PTSD are more prone to violence, are at a higher risk for behavioral, academic, and interpersonal problems, have difficulty maintaining friendships, are more likely to have sensory challenges, or to be diagnosed with autism, are at higher risk for depression, and have difficulty concentrating. Knowing all this, what do we provide to take this burden off the shoulders of children and families? Close to nothing. Three simple initial steps can begin to shed light on this shadow: education, resources, and family-centered transition. This is a book devoted to these three steps. When the author discussed these steps with civilians, they frequently respond in all innocence by saying, "Don't we already have this?" These three steps are so common sense, so obviously needed, that the assumption by people who have not investigated this issue is that it has already been taken care of by the powers that be. Surely they know this, but there is no they; we must be the they that voices this obvious need and advocates for its fulfillment. It is a tall order, but it must be done.

based on a breathtaking range of research in British and German archives, *The War Comes Home* is written in an engaging, immediately accessible style and filled with rich anecdotes that are excellently told. This impressive book offers a powerful

fewer americans were captured or missing during the vietnam war than in any previous major military conflict in u s history yet despite their small numbers american pows inspired an outpouring of concern that slowly eroded support for the war michael j allen reveals how wartime loss transformed u s politics well before and long after the war's official end throughout the war's last years and in the decades since allen argues the effort to recover lost warriors was as much a means to establish responsibility for their loss as it was a search for answers about their fate though millions of americans and vietnamese took part in that effort pow and mia families and activists dominated it insisting that the war was not over until the last man comes home this small determined group turned the unprecedented accounting effort against those they blamed for their suffering allen demonstrates that pow mia activism prolonged the hostility between the united states and vietnam even as the search for the missing became the basis for closer ties between the two countries in the 1990s equally important he explains pow mia families disdain for the antiwar left and contempt for federal authority fueled the conservative ascendancy after 1968 mixing political cultural and diplomatic history until the last man comes home presents the full and lasting impact of the vietnam war in ways that are both familiar and surprising

at the conclusion of world war ii americans anxiously contemplated the return to peace it was an uncertain time filled with concerns about demobilization inflation strikes and the return of a second great depression balanced against these challenges was the hope in a future of unparalleled opportunities for a generation raised in hard times and war one of the remarkable untold stories of postwar america is the successful assimilation of sixteen million veterans back into civilian society after 1945 the g i generation returned home filled with the same sense of fear and hope as most citizens at the time their transition from conflict to normalcy is one of the greatest chapters in american history the greatest generation comes home combines military and social history into a comprehensive narrative of the veteran's experience after world war ii it

integrates early impressions of home in 1945 with later stories of medical recovery education work politics and entertainment as well as moving accounts of the dislocation alienation and discomfort many faced the book includes the experiences of not only the millions of veterans drawn from mainstream white america but also the women african americans latinos and asian americans who served the nation perhaps most important the book also examines the legacy bequeathed by these veterans to later generations who served in uniform on new battlefields around the world

following the end of world war ii in asia the allied powers repatriated over six million japanese nationals from colonies and battlefields throughout asia and deported more than a million colonial subjects from japan to their countries of origin depicted at the time as a postwar measure related to the demobilization of defeated japanese soldiers this population transfer was a central element in the human dismantling of the japanese empire that resonates with other post colonial and post imperial migrations in the twentieth century lori watt analyzes how the human remnants of empire those who were moved and those who were left behind served as sites of negotiation in the process of the jettisoning of the colonial project and in the creation of new national identities in japan through an exploration of the creation and uses of the figure of the repatriate in political social and cultural realms this study addresses the question of what happens when empire comes home
