6 the moon is earth s only natural satellite and one that we can easily see most nights the moon has inspired wonder and creativity for thousands of years this image appeared in a 1902 french film called le voyage

dans la lune a trip to the moon what makes the moon glow the moon does not shine with its own light

## **moon wikipedia**

Oct 01 2023

☾☾ the moon is the brightest celestial object in earth s night sky this is mainly due to its large angular diameter while the reflectance of the lunar surface is comparable to that of asphalt the apparent size is nearly the same as that of the sun allowing it to cover the sun completely during a total solar eclipse
