h h jasper a a ward a pope and h h merritt chair of the public health service advisory committee on the epilepsies national institutes of health published the first volume on basic mechanisms of the epilepsies bme in 1969 their ultimate goal was to search for a better understanding of the epilepsies and seek more rational methods of their prevention and treatment since then basic and clinical researchers in epilepsy have gathered together every decade and a half with these goals in mind assessing where epilepsy research has been what it has accomplished and where it should go in 1999 the third volume of bme was named in honor of h h jasper in line with the enormous expansion in the understanding of basic epilepsy mechanisms over the past four decades this fourth edition of jasper s bme is the most ambitious yet in 90 chapters the book considers the role of interactions between neurons synapses and glia in the initiation spread and arrest of seizures it examines mechanisms of excitability synchronization seizure susceptibility and ultimately epileptogenesis it provides a framework for expanding the epilepsy genome and understanding the complex heredity responsible for common epilepsies

as it explores disease mechanisms of ion channelopathies and developmental epilepsy genes it considers the mechanisms of conditions of epilepsy comorbidities and for the first time this 4th edition describes the current efforts to translate the discoveries in epilepsy disease mechanisms into new therapeutic strategies this book considered the bible of basic epilepsy research is essential for the student the clinician scientist and all research scientists who conduct laboratory based experimental epilepsy research using cellular brain slice and animal models as well as for those interested in related disciplines of neuronal oscillations network plasticity and signaling in brain structures that include the cortex hippocampus and thalamus in keeping with the 1969 goals the book is now of practical importance to the clinical neurologist and epileptologist as the progress of research in molecular genetics and modern efforts to design antiepileptic drugs cures and repairs in the epilepsies converge and impact clinical care during the past decade members of the cognition and technology group at vanderbilt university have worked with hundreds of teachers and thousands of students throughout north america in the context of the adventures of jasper woodbury problem solving series 12 videodisc based adventures plus video based analogs extensions and teaching tips designed to improve the mathematical thinking of students from grades 5 and up and to help them make connections to other disciplines such as science history and social studies the experience of developing the jasper series testing
