## **Human Rights and the Body 2014-09-28**

human rights and the body is a response to the crisis in human rights to the very real concern that without a secure foundation for the concept of human rights their very existence is threatened while there has been consideration of the discourses of human rights and the way in which the body is written upon research in linguistics has not yet been fully brought to bear on either human rights or the body drawing on legal concepts and aspects of the law of human rights mooney aims to provide a universally defensible set of human rights and a foundation or

rather a frame for them she argues that the proper frames for human rights are firstly the human body seen as an index reliant on the natural world secondly the globe and finally language these three frames generate rights to food water sleep and shelter environmental protection and a right against dehumanization this book is essential reading for researchers and graduate students in the fields of human rights and semiotics of law

## ***Morality and the Human Goods 2001-12-18***

a concise and accessible introduction to natural law ethics this book introduces readers to the mainstream tradition of western moral philosophy building on philosophers from plato through aquinas to john finnis alfonso gómez lobo links morality to the protection of basic human goods life family friendship work and play the experience of beauty knowledge and integrity elements essential to a flourishing happy human life gómez lobo begins with a discussion of plato s crito as an introduction to the practice of moral philosophy showing that it requires that its participants treat each other as equals and offer rational arguments to persuade each other he then puts forth a general principle for practical rationality one should pursue what is good and avoid what is bad the human goods form the basis for moral norms that provide a standard by which actions can be evaluated do they support or harm the human goods he argues that moral norms should be understood as a system of rules whose rationale is the protection and enhancement of human goods a moral norm that does not enjoin the preservation or enhancement of a specific good is unjustifiable shifting to a case study approach gómez lobo applies these principles to a discussion of abortion and euthanasia the book ends with a brief treatment of rival positions including utilitarianism and

libertarianism and of conscience as our ultimate moral guide written as an introductory text for students of ethics and natural law morality and the human goods makes arguments consistent with catholic teaching but is not based on theological considerations the work falls squarely within the field of philosophical ethics and will be of interest to readers of any background

## ***The Right to Equality in European Human Rights Law 2014-07-25***

a right to equality and non discrimination is widely seen as fundamental in democratic legal systems but failure to identify the human interest that equality aims to uphold reinforces the argument of those who attack it as morally empty or unsubstantiated and weakens its status as a fundamental human right this book argues that an understanding of the human interest which equality aims to uphold is feasible within the jurisprudence of the european court of human rights ecthr and the european court of justice ecj in comparing the evolution of the prohibition of discrimination in the case law of both courts charilaos nikolaidis demonstrates that conceptual convergence within the european convention on human rights echr and the eu on the issue of equality is not as far as it might appear initially while the two bodies of equality law are extremely divergent as to the requirements they impose their interpretation by the international judiciary might be properly analysed under a common light to emphasise the substantive dimension of equality in european human rights law the book will be of great use and interest to scholars and students of human rights discrimination law and european politics

he knew the earth experiment was still working even though the human element component was running very much behind schedule tommy made a grumbling sound and slowly shook his furry head from side to side crying wars greed jealousy illnesses unhappiness dissatisfaction obsessions for power it s just not what i had expected i know but give it time it will happen one day the earth assignment is not as old as all the other projects we have been working upon eric hastily reassured tommy was not about to give up on the present venture and with this thought in mind he stared with his numerous eyes into eric s multiple eyes and with many worrisome looks he mumbled it s a nice place shame about the human race the above is an extract taken from the final piece of my foreword for the book nice place shame about the human race which attempts to create a better awareness of our everyday actions and elucidates the importance of discovering ones true identity for a better chance of living a happier more balanced life mounting dissatisfactions and insecurities of our modern world together with the general inquisitiveness of human nature to wish observe ones actions are areas of modern life which

have gained popularity over the last decade when searching for reasoning or answers to our everyday problems commencing at the aftermath of world war ii and continuing to the present day a journey is undertaken in trying to illustrate modern western society s increased negative attitudes and behaviour and of the importance of discovering who we really are with a view to more personal happiness this book is an entertaining slightly ironical check in the mirror if you like of modern behaviour it observes how modern society has seemingly done away with aspiring to reach higher goals and standards and at the same time appears to have become content with mediocrity and of aiming towards lower levels of existence my main justifications for writing such a book were primarily based upon the search for answers as to why society in the modern western world has reached its present state of development in the constitution of which it finds itself in the present day if it is possible to live modern life in a more balanced friendlier frame of mind which would inexorably lead to more happiness and as an attempt to help you the reader into being more aware of our daily conscious and subconscious conduct towards fellow citizens and of the ensuing consequences of those actions we are to journey through the many different stages of modern western life as based upon our upbringing in an industrialised society and although you may have heard some of the themes and topics many times before i have attempted to pick out the quintessence of noting how individuals react within the confines of our various societies and communal boundaries what type of person is nice place shame about the human race aimed for well basically anybody who is still interested about the values of our modern society but specifically when amid the interference and confusion of modern society one is searching for personal direction into discovering oneself emphasis has been placed upon the significance of living ones own individuality thus being aware of who one really is and of the importance of taking more self responsibility for ones actions here is a short list of reasons compiled for those who would possibly find my work of interest 1 if feeling a little out of touch with our fast paced modern society 2 when interested in achieving more personal awareness in everyday activities 3 when concerned about societies present course of development 4 when trying to understand modern societies push and

shove mentality 5 when searching for more in depth reasoning to our lives 6 w

there are men who are capable of loving a machine more deeply than they can love a woman they are among the happiest men on earth this is not a sneer meanly shot from cover at women it is simply a statement of notorious fact men who worry themselves to distraction over the perfecting of a machine are indubitably blessed beyond their kind most of us have known such men yesterday they were constructing motorcars but to day aeroplanes are in the air or at any rate they ought to be according to the inventors watch the inventors invention is not usually their principal business they must invent in their spare time they must invent before breakfast invent in the strand between Lyons s and the office invent after dinner invent on sundays see with what ardour they rush home of a night see how they seize a half holiday like hungry dogs a bone they don t want golf bridge limericks novels illustrated magazines clubs whisky starting prices hints about neckties political meetings yarns comic songs anturic salts nor the smiles that are situate between a gay corsage and a picture hat they never wonder at a loss what they will do next their evenings never drag are always too short you may indeed catch them at twelve o clock at night on the flat of their backs but not in bed no in a shed under a machine holding a candle whose paths drop fatness up to the connecting rod that is strained or the wheel that is out of centre they are continually interested nay enthralled they have a machine and they are perfecting it they get one part right and then another goes wrong and they get that right and then another goes wrong and so on when they are quite sure they have reached perfection forth issues the machine out of the shed and in five minutes is smashed up together with a limb or so of the inventors just because they had been quite sure too soon then the whole business starts again they do not give up that particular wreck was of course due to a mere oversight the whole business starts again for they have glimpsed perfection they have the gleam of perfection in their souls thus their lives run away they will never fly you remark cynically well if they don t besides what about wright with all your cynicism have you never envied them their machine and their passionate interest in it

why is it important to consider the human today exploring this question john lechte takes inspiration from the interplay of two of giorgio agamben s concepts ways of life and bare life stateless people those who do not have a political community such as asylum seekers and refugees are no less human however the european tradition represented most clearly in hannah arendt s thinking of the opposition between the oikos as the satisfaction of basic needs and the polis as the realm of freedom and glory proposes the opposite of this arendt s famous phrase the right to have rights means that freedom and full human potential can only be realised in the context of civil society in short that only citizens can be fully human because arendt s view is so influential yet often not acknowledged it is necessary to undertake a full investigation of the nature and meaning of the human to establish that it is not reducible to the citizen but is always characterised by a way of life life mediated by language the human is never reducible to bare life a life with no other significance than physical survival the implications of bare life are investigated through important themes in relation to the human such as freedom and necessity the animal animality as nature inclusion and exclusion in politics the sacred death and dying technics and nature the same and the other the everyday as extraordinary journeying through agamben arendt bataille derrida hegel heidegger husserl levinas schelling simondon and stiegler this is a profound search to reveal the truly human
