linguistics gives a greater prominence to the work of wilhelm von humboldt because of the lasting importance of his work on language in relation to general eighteenth century thinking and of its perceived relevance in the latter half of the twentieth century to several aspects of generative grammatical theory the final section covering the twentieth century has been rewritten and divided into imperfections that remain are intentionally left to preserve the state of such historical works excerpt from a short history of england in studying and teaching history i have been convinced of the desirability of making certain fundamental facts absolutely clear and familiar an acquaintance with the physical and political geography of a country makes the events of its history seem real and natural a knowledge of the race elements of a people gives the strongest impression of the continuity of its history a study of the early political and ecclesiastical organization of a nation makes comprehensible later changes i have therefore striven in the first place to give a full and clear description of early institutions and conditions secondly i have tried to select from the mass of historical detail what was significant rather than what was merely conspicuous what either gave shape and character to a considerable period of history or was a clearly marked step in the general development of the nation detached episodes and merely striking occurrences especially those in the field of military history have been hastened over in order that more attention might be given to the really great movements and influential men thirdly i have clung pretty closely to the thread of english history only introducing mention of other countries when their connection with england was especially close since england s story is so long and so eventful i have felt that it had better here be told as simply clearly and continuously as possible for its own sake rather than to complicate it by including many facts drawn from the history of other countries about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this certain hitherto neglected areas of the south indian history and exploring the myth that the presence of the vindhyas supposedly caused a north south divide the north remained mostly isolated from the culturally rich southern peninsula excerpt from a short history of germany 9 a d to 1871 a d if we look for striking personalities and events the reigns of frederick the great and of william i were of supreme importance to europe and as was not the case with louis xiv and napoleon their acquisitions were of a permanent character all in all it has seemed to me that i could engage in no more thankful occupation than in writing the history of germany the more so as german treatments of the subject presuppose more knowledge than is usually to be found in the american reader and as no other american writer has ever attempted the task the work of lewis founded on an antiguated german text book does not fulfil the most modest demands about the publisher forgotten books publishes hundreds of the society for pro moting christian knowledge for the benefit of those who would like to know something about it but for want either of time or inclination do not care to read a long book on the subject the existence of the official history of the society published in 1898 to mark its second centenary absolves me from the duty of attempting any measure of completeness references seemed unnecessary in so slight a sketch as this which except foria few details drawn from unprinted records is a compilation from the above mentioned history well known books on the church life of the eighteenth and early nineteenth centuries and the monthly and annual reports of the society the book was written during 1918 at a time when the society was feeling the strain of the great war severely it has been twice evicted from its premises by the government the scarcity of paper has handicapped the publishing depart ment in many directions the committee thought it right to suggest to the organising secretaries to put themselves at the disposal of the church authorities in order that they might render to church and nation whatever service seems best suited to their capacities the society s income has suffered considerably as a result of war conditions and so i have written this little book in the hope that those into whose han ds it falls may be led to take an interest in this the oldest of our church organisations the reader may perhaps wonder whether if this was my object i have gone the right way to work is not the tone in places more
