~~published in venice in 1539 he promised a fuller~~
account of the north and its marvels this he
accomplished in january 1555 when he issued from his
own press in rome his magnificent historia de gentibus
septentrionalibus this quarto volume of 815 pages
divided into 22 books and a total of 778 chapters was
lavishly illustrated with some 480 woodcuts most of
them closely relevant to the technical matters
discussed by the author the book was an immediate
success and half a dozen editions appeared in the
century after olaus s death it became even better known
in an epitome published in antwerp in 1558 which was
also frequently reprinted and translated this appeared
in english in 1658 but it is only with the present
version complete with illustrations that the whole work
is made available to the english reading world it is
indeed only the second full translation to appear in
modern times preceded a swedish version published in
four parts between 1909 and 1925 there is little
history in the sense of chronological narrative in
olaus magnus s historia it is rightly regarded as an
ethnographic essay on an encyclopaedic scale touching
on a vast variety of topics snowflakes and sea serpents
elks and artillery sables and saltpetre watermills and
werewolves much of it was culled from ancient
authorities it was a matter of patriotic pride to
identify the swedes as the only legitimate descendants
of the goths but much of it was derived from the author
s personal observations especially those made on his
early travels in north sweden his pioneering and
sympathetic account of the lapps and their way of life
has attracted p

in this story two significant events in canadian history intersect the rollout of the avro arrow on october 4 1957 and the ongoing land claims of the first nations mississauga lois michelsen is almost fourteen when she is uprooted from her childhood home in small town ontario and moved to centrewood a brand new model satellite community located on the outskirts of toronto her father views it as his ideal city since its plan is based on concentric circles instead of a grid plan which lois prefers only the adjacent abandoned farm with its fallow pastureland resurgent wildlife winding stream and quiet woods offers her solace through the long hot and lonely summer there she befriends a newly hatched painted turtle discovers a red salamander and finds herself protected by a bald headed eagle concerned about lois facing a new school alone her mother foists on her a new little friend from the

~~neighbourhood a little hussy named mitsy whose cat s~~
eyes sharp tongue and lewd behaviour wreak havoc unlike
normal dreams lois is susceptible to waking visions
when real time is suspended in dual planes of reality
her father is lead aeronautical engineer for the avro
arrow when she attends the rollout in malton her
sensibilities open her up to the waking vision of an
indian chief standing on the tarmac next to the arrow

Annual Report of the Board of Railroad Commissioners of North Carolina, for the Year Ending

1896

warm temperate deciduous forests are southern mainly
oak dominated deciduous forests as found over the
warmer southern parts of the temperate deciduous forest
regions of east asia europe and eastern north america
climatic analysis has shown that these forests extend
from typical temperate climates to well into the warm
temperate zone in areas where winters are a bit too
cold for the zonal evergreen broad leaved forests
normally expected in that climatic zone this book is
the first to recognize and describe these southern
deciduous forests as an alternative to the evergreen
forests of the warm temperate zone this warm temperate
zone will become more important under global warming
since it represents the contested transition between
deciduous and evergreen forests and between tropical
and temperate floristic elements this book is dedicated
to the memory of tatsuo kira the imaginative japanese
ecologist who first noticed and described this general
zonation exception and who proposed the name warm
temperate deciduous forest

published by the american geophysical union as part of the geophysical monograph series volume 163 the north with its vast and varied landscapes sparse population and cold climate has always challenged its explorers physically mentally logistically and technically the scientific community in particular has known such challenges in the past and does so today especially in light of the projected intensification of climate change at high latitudes indeed there are clear signs that change is already ongoing in many environmental variables air temperature and annual precipitation including snowfall are increasing in many regions spring snow cover extent is decreasing lake and river ice freeze up dates are occurring later and breakup dates earlier glaciers are retreating rapidly permafrost temperatures are increasing and in many cases the permafrost is thawing and sea ice extent is at record minimums and thinning
