progressive responses to the crisis this book provides a timely and comprehensive overview of the introduction of lte technology for ppdr communications it describes the operational scenarios and emerging multimedia and data centric applications in demand and discusses the main techno economic drivers that are believed to be pivotal for an efficient and cost effective delivery of mobile broadband ppdr communications the capabilities and features of the lte standard for improved support of mission critical communications e g proximity services group communications are covered in detail also different network implementation options to deliver mobile broadband ppdr communications services over dedicated or commercial lte based networks are discussed including the applicability of the mobile virtual network operator mvno model and other hybrid models radio spectrum matters are also discussed in depth outlining spectrum needs and providing an outlook into allocated and candidate spectrum bands for ppdr communications and suitable dynamic spectrum sharing solutions in ppdr communications explanations are accompanied by a vast collection of references that allow the more intrigued reader to gain further insight into the addressed topics the book analyzes brazil s africa engagement as a rising power s strategy to gain global recognition linking it to brazil s broader foreign policy objectives and shedding light on the mechanisms of brazilian status seeking in africa this book focuses on the problems of rules rule following and normativity as discussed within the areas of analytic philosophy linguistics logic and legal theory divided into four parts the volume covers topics in general analytic philosophy analytic legal theory legal interpretation and argumentation logic as well as ai law area of research it discusses inter alia kripkenstein s sceptical argument against rule following and normativity of meaning the role of neuroscience in explaining the phenomenon of normativity conventionalism in philosophy of law normativity of rules of interpretation some formal approaches towards rules and normativity as well as the problem of defeasibility of rules the aim of the book is to provide an interdisciplinary approach to an inquiry into the questions concerning rules rule following and normativity the global financial crisis that began in 2007 was the most destructive since the 1930s the rapid spread of the crisis across borders and the complexity of these cross border linkages highlighted the importance for authorities of working together in responding to the crisis this book examines the transnational response that relied heavily on a set of relatively informal transnational regulatory groupings that had been constructed over previous decades during the crisis these arrangements were made stronger and more inclusive but they remain very complex thousands of pages of new rules have been created by various transnational bodies and the implementation of these rules relies heavily on domestic law and regulation and private rules and practices this book analyses this complex response showing that its overly technical and incremental character the persistence of tensions between transnational processes and state centred politics and the ongoing power of private actors have made the regulatory response fall short of what is needed transnational financial regulation after the crisis provides new insights that are relevant for theory and practice not only for transnational financial regulation but for global governance more generally global capitalism is affected by the malaises of stagnation financial fragility increased income inequality growing wealth concentration at the top and a vanishing fair social contract this book
