to understand the ethics of immigration we need to start from the way it is enacted and understood by everyday actors through practices of hospitality and hostility drawing on feminist and poststructuralist understandings of ethics and hospitality this book offers a new approach to immigration ethics by exploring state and societal responses to immigration from the global north and south rather than treating ethics as a determinable code for how we ought to behave toward strangers it explores hospitality as a relational ethics an ethics without moralism that aims to understand and possibly transform the way people already do embrace and deflect obligations and responsibilities to each other building from specific examples in colombia turkey and tanzania as well as the eu us and uk hospitality is developed as a structural and emotional practice of drawing and redrawing boundaries of inside and outside belonging and non belonging it thereby actively creates a society as a communal space with a particular ethos from a welcoming home to a racialised hostile environment hospitality is therefore treated as a critical mode of reflecting on how we create a we and relate to others through entangled histories of colonialism displacement friendship and exploitation only through such a reflective understanding can we seek to transform immigration practices to better reflect the real and aspirational ethos of a society instead of simple answers removing borders or creating global migration regimes the book argues for grounded negotiations that build from existing local capacities to respond to immigration

when are borders justified who has a right to control them where should they be drawn today people think of borders as an island s shores just as beaches delimit a castaway s realm so borders define the edges of a territory occupied by a unified people to whom the land legitimately belongs hence a territory is legitimate only if it belongs to a people unified by a civic identity sadly this desert island model of territorial politics forces us to choose if we want territories then we can either have democratic legitimacy or inclusion of different civic identities but not both the resulting politics creates mass xenophobia migrant bashing hoarding of natural resources and border walls to escape all this on borders presents an alternative model drawing on an intellectual tradition concerned with how land and climate shape institutions it argues that we should not see territories as pieces of property owned by identity groups instead we should see them as watersheds as interconnected systems where institutions people the biota and the land together create overlapping civic duties and relations what the book calls place specific duties this watershed model argues that borders are justified when they allow us to fulfill those duties that border control rights spring from internationally agreed conventions not from internal legitimacy that borders should be governed cooperatively by the neighboring states and the states system and that border redrawing should be done with environmental conservation in mind the book explores how this model undoes the exclusionary politics of desert islands

the book consists of sixteen essays and an introduction from prominent philosophers who are at odds with the predominant political trend s of academic philosophy political trend s primarily associated with leftism some of these philosophers identify explicitly with the political right an admittedly broad term which ranges from american conservative to british tory from religious right to non religious right from libertarian to authoritarian yet other dissident philosophers eschew the left right dichotomy altogether while maintaining a firm political distance from the majority of their left leaning colleagues the primary goal of the volume is to represent a broad constituency of political philosophies and perspectives at variance with the prevailing political sentiments of the academy each essay is partly autobiographical in nature detailing personal experiences that have influenced these philosophers throughout their lives and partly philosophical putting forth reflections on the intellectual viability of a right leaning or decidedly non left leaning political philosophy or some segment of it the contemporary university is supposed to be the locus of viewpoint diversity and yet as is evident to professors students and virtually anyone else who sets foot within its halls it most certainly is not particularly in matters political nevertheless these essays are not instances of special pleading or grievance incitement instead each article provides a glimpse into the life of an academic philosopher whose views have largely been at odds with peers and colleagues furthermore all of the essays were consciously constructed with the aim of being philosophically rigorous while eschewing technical language and verbose prose in short the essays will be enjoyable to a wide audience

in the moral and political philosophy of immigration liberty security and equality josé jorge mendoza argues that the difficulty with resolving the issue of immigration is primarily a conflict over competing moral and political principles and is thereby at its core a problem of philosophy establishing the necessity of situating the public debate on immigration at the center of philosophical debates on liberty security and equality this book brings into dialog various contemporary philosophical texts that deal with immigration to provide some normative guidance to future immigration policy and reform as a groundbreaking work in social and political philosophy it will be of great value not only to students and scholars in these fields but also those working in social science public policy justice studies and global studies programs whose work intersects with issues of immigration

in the ethics of immigration joseph carens synthesizes a lifetime of work to explore and illuminate one of the most pressing issues of our time immigration poses practical problems for western democracies and also challenges the ways in which people in democracies think about citizenship and belonging about rights and responsibilities and about freedom and equality carens begins by focusing on current immigration controversies in north america and europe about access to citizenship the integration of immigrants temporary workers irregular migrants and the admission of family members and refugees working within the moral framework provided by liberal democratic values he argues that some of the practices of democratic states in these areas are morally defensible while others need to be reformed in the last part of the book he moves beyond the currently feasible to ask questions about immigration

from a more fundamental perspective he argues that democratic values of freedom and equality ultimately entail a commitment to open borders only in a world of open borders he contends will we live up to our most basic principles many will not agree with some of carens claims especially his controversial conclusion but none will be able to dismiss his views lightly powerfully argued by one of the world's leading political philosophers on the issue the ethics of immigration is a landmark work on one of the most important global social trends of our era

the values of freedom and equality are at the heart of what it means for liberal states to do justice to their citizens yet when it comes to the question of whether liberal states are capable of realizing the values of freedom and equality while controlling their borders many philosophers are skeptical that liberalism and existing immigration arrangements can in fact be reconciled after all liberal states often deny entrance to prospective immigrants who are fleeing extreme forms of violence they also often police their borders in ways that are discriminatory and stigmatizing contributing to a situation where immigrants are treated as morally inferior by society at large such practices conflict strongly with any commitment to the values of freedom and equality luara ferracioli here focuses on three key questions regarding the movement of persons across international borders what gives some residents of a liberal society a right to be considered citizens of that society such that they have a claim to make decisions with regard to its political future and do citizens of a liberal society have a prima facie right to exclude prospective immigrants despite their commitment to the values of freedom and equality finally if citizens have this prima facie right to exclude prospective immigrants are there moral requirements regarding how they may exercise it the book therefore tackles the most pressing philosophical questions that arise from immigration the questions of who can exercise self determination and why they have such a right in the first place

international and domestic laws commonly hold states responsible for their wrongdoings states pay compensation for their unjust wars and reparations for their historical wrongdoings some argue that states should incur punitive damages for their international crimes but there is a troubling aspect to these practices states are corporate agents comprised of flesh and blood citizens when the state uses the public purse to finance its corporate liabilities the burden falls on these citizens even if they protested against the state's policies did not know about them or entirely lacked channels of political influence how can this distributive effect of state level responsibility be justified the book develops an answer to this question which revolves around citizens participation in their state it argues that citizenship can be a type of massive collective action where citizens willingly orient themselves around the authority of their state and where state policies are the product of this collective action while most ordinary citizens are not to blame for their participation in their state they nevertheless ought to accept a share of the remedial obligations that flow from their state's wrongful policies however the distributive effect cannot be justified in all states specifically in some non democratic states most citizens are not participating in their state in the full sense and should not pay for their state's wrongdoings this finding calls then for a revision of the way we hold states responsible in both the domestic and international levels

this book argues that citizens have a moral right to decide by which criteria they grant migrants citizenship as well as to control access to their territory in the first place in developing and defending this argument it critically engages numerous objections thus providing the reader with a thorough overview of the current debate on the ethics of immigration and exclusion the author's argument is based on a straightforwardly individualist and liberal starting point one of the rights granted by liberalism is freedom of association which also comprises the right not to associate with people with whom one does not want to associate while this is an individual right it can be exercised collectively like many other individual rights thus people can decide to collectively organize into an association pursuing certain goals and subject to certain provisos this gives rise to legitimate claims to space and territory in

which they pursue these goals the author shows that this right is far reaching and robust which entails an equally far reaching and robust right to exclude moreover he demonstrates that large scale immigration from illiberal cultures tends to severely compromise the way of life the values and the institutions of liberal democracies in ways routinely ignored by apologists for multiculturalism freedom culture and the right to exclude will be of interest to scholars and advanced students working in applied ethics political philosophy political theory and law
