descriptive representation tells us the degree to which elected officials resemble their constituents and whether such a resemblance has a bearing on the way they legislate in other words do people vote for candidates of their same racial ethnic background or gender if they do does this affect the type of policies an elected official pursues further if citizens see people who look like them in office does it have an effect on their political attitudes and participation in this book christopher j clark argues that descriptive representation is a more multi faceted phenomenon than previously shown particularly when observed at the state level he contends that black political involvement political attitudes and public opinion are contingent on more than being represented by a single black elected official rather they hinge on the proportion of african americans making up a state legislature what clark terms black seat share as well as the degree to which that proportion reflects the demographic makeup of the state as well clark pinpoints the critical mass of african american legislators necessary to initiate the creation of black caucuses an important institution for minority representation clark bases his study on an examination of black representation in state legislatures between 1966 and 2010 looking particularly at black political opinion and involvement in the development of welfare and education policy situating the church within the context of post world war ii globalization and the cold war american catholicism transformed draws on previously untapped archival sources to provide deep background to developments within the american catholic church in relationship to american society at large shaped by anti communist sentiment and responsive to american cultural trends the catholic community adopted strategies of domestic containment stressing the close unity between the church and the american way of life a focus on the unchanging

character of god s law as expressed in social hierarchies of authority race and gender provided a public visage of unity and uniformity however the emphasis on american values mainstreamed into the community the political values of personal rights equality acceptance of the arms race and muted the church s inherited social vision the result was a deep ambivalence over the forces of secularization the catholic community entered a transitional stage in which those on the right and those on the left battled for control of the church s vision international networking reform of religious life among women international congresses of the laity the institutionalization of the liturgical movement and the burgeoning civil right movement positioned the community to receive the vatican council in a distinctly american way during the second vatican council the american bishops and theological experts gradually adopted the reforming currents of the world wide church this convergence of international and national forces of renewal and resistance to them says joseph chinnici will continue to shape the american catholic community s identity in the twenty first century the interface between spirochetes and the immune response is of significant importance to their pathogenesis and persistence evasion from the immune system leads to infections that present as leptospirosis syphilis lyme disease and relapsing fever and may lead to putative persistence and latency understanding the mechanisms involved in immune evasion will shed light not only on the hostpathogen factors involved in the process but also on how resistance to infection leads to protection broad examples include spirochetal interaction with the immune system spirochetal molecules involved in immune evasion and in immune activation innate immune responses in the skin and other compartments factors involved in spirochetal adhesion to the extracellular matrix interaction of

spirochetes with antigen presenting cells in vitro ex vivo or in vivo spirochetal lipoproteins and immunity specific examples include innate immunity to pathogenic spirochetes t pallidum b burgdorferi and leptospira spp invasion and pathogenesis by l interrogans subversion and suppression of b cell responses by b burgdorferi role of antibody in clearance versus persistence of relapsing fever borreliae evasion of the complement system by b burgdorferi immune suppression by ixodes tick saliva for effective transmission adhesins and enzymes involved in dissemination of t pallidum spirochetal variable surface proteins in immune evasion intravital imaging of pathogenic spirochetes borreliae and leptospira in host tissues spirochete host surface interactions additional specific examples for b burgdorferi include novel approaches to control infection within the vector and or in mammal tick innate immune defenses and interaction of ixodes scapularis salivary immunomodulatory molecules with human immune cells tick innate immune defenses from the perspective of the tick midgut mouse models of infection and genetic basis for pathogenicity diverse roles of outer surface protein c additional specific examples for leptospirosis include animal models of acute sub lethal and persistent infection neutrophils and innate immune response toll like receptor mediated b cell responses markers of endothelial cell activation for disease severity in human leptospirosis corticosteroid treatment of advanced human leptospirosis and urinary biomarkers of chronic leptospirosis medicinal plants and their derived products remain as an indispensable source of bioactive molecules that serve as either drug candidates or lead compounds for drug design and discovery there are several advantages for plant derived therapeutics including wide availability diverse pharmacological actions and a generally good profile of safety and tolerability over the recent years there have

been numerous reports from clinical studies testifying to the efficacy and safety of medicinal plants and phytochemicals in ameliorating several human diseases a plethora of basic studies has also unravelled molecular mechanisms underlying the health benefits of herbal medicines nevertheless issues such as identification of bioactive ingredients standardization of the products and drug interactions remain to be further studied in this book we aim to put together several chapters on the medicinal properties and pharmacological action of medicinal plants plant species and phytochemicals the goal is to present a comprehensive collection on most of the therapeutic aspects of plant derived natural products and molecular mechanisms thereof charles davies b ca 1706 emigrated from england to philadelphia and married hannah matson in 1732 1733 descendants chiefly spelling the surname davis and relatives lived in pennsylvania north carolina ohio indiana iowa nebraska kansas oklahoma california and elsewhere this volume explores the foundations of trust and whether social and political trust have common roots contributions by noted scholars examine how we measure trust the cultural and social psychological roots of trust the foundations of political trust and how trust concerns the law the economy elections international relations corruption and cooperation among myriad societal factors the rich assortment of essays on these themes addresses questions such as how does national identity shape trust and how does trust form in developing countries and in new democracies are minority groups less trusting than the dominant group in a society do immigrants adapt to the trust levels of their host countries does group interaction build trust does the welfare state promote trust and in turn does trust lead to greater well being and to better health outcomes the oxford handbook of social and political trust considers these and other questions of

this volume offers a new point of entry into questions about how the law conceives
of states and firms because states and firms are fictitious constructs rather than
products of evolutionary biology the law dictates which acts should be attributed to
each entity and by which actors those legal decisions construct firms and states by
attributing identity and consequences to them as the volume shows these legal
decisions are often products of path dependence or conceptual metaphors like
personhood that have expanded beyond their original uses focusing on attribution the
volume considers an array of questions about artificial entities that are usually
divided into doctrinal siloes these include questions about attribution of

international legal responsibility to states and state owned entities transnational attribution of liabilities to firms and attribution of identity rights to corporations durkee highlights the artificiality of doctrines that construct firms and states and therefore their susceptibility to change
