*ECIE 2021 16th European Conference on Innovation and Entrepreneurship Vol 1* 2021-09-16 fuelled by forces of globalization china has gradually shifted from a centrally planned economy to a socialist market economy under the market economy china has experienced a massive and protracted economic boom it is not clear however whether recent economic changes have brought the same miracle to education in china spotlight on china brings together established and emerging scholars from china and internationally in a dialogue about the profound social and economic transformation that has resulted from the market economy and its concomitant impact on education in china the book covers a wide range of topics including market economy and curriculum reform teaching under china s market economy changes in higher education transitions from education to work market economy and social inequality with its broad scope and fresh critical perspectives this collection

offers a most contemporary and comprehensive analysis of possibly the largest education system in the world lessons learned from the china experiment will inform researchers and educators about social and educational reforms in other countries which are undergoing similar fundamental changes spotlight on china provides a state of the art picture dynamic partial full of contradictions and tensions and as we speak in movement and local reconfiguration allan luke queensland university of technology the book moves social science research on china s education another step forward by refining the balance between the viability of mainstream western concepts and the analytical possibilities of creating a new scholarship based on a deeper understanding of the historically grounded realities of contemporary chinese education gerard a postiglione the university of hong kong

*16th European Conference on Innovation and Entrepreneurship Vol 2* 2021-09-16 the onset of the global crisis has emphasised the persistence of substantial differences in development and social progress within the euro area the specific case of countries located in the southern periphery region has come to the centre stage due to the harsh economic conditions that all these countries have experienced in the recent past in the aftermath of the american subprime credit bubble these countries high indebtedness raised doubts as to their ability to sustain public finances with the financial crisis developing and gaining momentum due to the fragilities presented in the economy to varying degrees of severity all of these economies have since been forced to introduce strong fiscal tightening programmes in order to achieve fiscal consolidation which have translated into recession and rising unemployment this book undertakes a comprehensive analysis of the causes of the crisis in southern european countries showing that the achilles heel of these economies is rooted in the dismal evolution of

productivity and in a specialisation pattern excessively based on the so called traditional low and low medium tech industries which yield low margins declining export shares and ultimately withering international competitiveness such evidence suggests that the southern european periphery industrial growth model has reached its limits demanding a multidimensional policy approach capable of overcoming the magnitude and complexity of the present crisis without denying the need to adjust public and private balance sheets it is argued that finding a sustainable path out of the present problems requires addressing the challenges of productivity growth and competitiveness in the long term
