2012

this book confronts the failings of current global economics to deliver the equity sustainability and community empowerment which humanity now needs to handle a troubled future the volume proposes an economy built from our society not the other way around the kyoto manifesto was built layer by layer over a period of 4 years based on broad ranging international symposia held in kyoto between 2014 and 2017 hosted by the center for the creative economy doshisha university not stopping at theory and untested ideas however the manifesto proposes practical action that will make a difference including in the problematic technological and ecological context of humanity s immediate and long term future the book is unique and innovative for it moves adventurously across very broad territory the manifesto draws from world philosophic arguments including specifically a critique of liberalism further exploring sociology cultural anthropology politics primatology and early humanity even quantum physics argument is set within mainstream post 1972 economics and political economics as well as direct practical experience working to empower disadvantaged communities through the united nations most importantly the book s analysis is deeply informed by the practice of searching for what is sacred the ultimate essence of our humanity what we can be as a human race empowered fulfilled individuals deeply sharing and caring for each other across our separate cultures and lives stomu yamash ta s on zen performances set the context for the symposia bringing different religions and cultures together across their dividing boundaries into a coherent search for peace and harmony through sacred music informed by alternate cultural paradigms for economics the book probes deeply into philosophies and practices that already exist within eastern and western societies and offer lessons for our future the result is an economics that stresses harmony with nature and balance in social

relations it places an emphasis on community human sharing and trust as a platform for our future not separate from the global economy but integrated into its very foundations this is a book for all who care a plan for our sustainable future built from the best of what our humanity is and can offer

in this compelling study jacob neusner argues that economics is an active and generative ingredient of the system of the mishnah the mishnah directly addresses such economic concerns as the value of work agronomics currency commerce and the marketplace and correct management of labor and of the household in all its breadth the mishnah poses the question of the critical place occupied by the economy in society under god s rule the economics of the mishnah is the first book to examine the place of economic theory generally in the judaic system of the mishnah jacob neusner begins by surveying previous work on economics and judaism the best known being werner sombart s the jews and modern capitalism the mistaken notion that jews have had a common economic history has outlived the demise of sombart s argument and it is a notion that neusner overturns before discussing the mishnaic economics only in aristotle neusner argues do we find an equal to the mishnah s accomplishment in engaging economics in the service of a larger systemic statement neusner shows that the framers of the mishnah imagined a distributive economy functioning through the temple and priesthood while also legislating for the action of markets the economics of the mishnah then is to some extent a mixed economy the dominant distributive element in this mixed economy neusner contends derives from the belief that the temple and its designated castes on earth exercise god s claim to the ownership of the holy land he concludes by considering the implications of the derivation of the mishnah s economics from the interests of the undercapitalized and overextended farmer

Internet and Network Economics

1992

teachers of political science social studies and economics as well as school library media specialists will find this resource invaluable for incorporating the internet into their classroom lessons over 150 primary source sites are referenced and paired with questions and activities designed to encourage critical thinking skills completing the activities for the lessons in this book will allow students to evaluate the source of information the content presented and its usefulness in the context of their assignments along with each site a summary of the site s contents identifies important primary source documents such as constitutions treaties speeches court cases statistics and other official documents the questions and activities invite the students to log on to the site read the information presented interact with the data and analyze it critically to answer such questions as who created this document is the source reliable how is the information useful and how does it relate to present day circumstances if i were in this situation would i have responded the same way as the person in charge strengthening these critical thinking skills will help prepare students for both college and career in the 21st century
