in a draft attached to a letter to his friend and confidante wilhelm fliess may 31 1897 freud develops an idea the mechanism of fiction is the same as that of hysterical fantasies he supports this thought with a brief analysis of the biographical sources of goethe s werther a few months later on october 15 1897 freud mails fliess a detailed account of remembered events from his childhood that freud believed underlined the universality of oedipus rex and hamlet freud s foray into literature initiated the beginning of a new critical approach in essential papers on literature and psychoanalysis emanuel berman presents classic and contemporary papers written at the intersection of literature and psychoanalysis in bringing these essays together berman traces the development of a discipline that has often been plagued by a polarization between self confident single minded psychoanalysts reading literature as a series of case studies and literary loyalists who cling to manifest content or to the declared intentions of the authors accepting them at face value and depriving the work of its emotional complexity berman covers the full range of old and new perspectives and presents selections from today s mature phase this collection includes papers by sigmund freud steven marcus patrick j mahoney donald spence otto rank ernest jones ernst kris phyllis greenacre florence bonime and maryanne eckardt david werman ellen handler spitz jacques lacan shoshana felman norman n holland roy schaffer meredith anne skura gail s reed francis baudry rivka r eifermann and distrusting relationship literature and theory have increased enormously in range education no longer insists upon classics of western literature as building blocks for understanding yet the tie between psychoanalysis and imaginative literature remains vital and the two disciplines can interact vibrantly as these selected essays of recent years from the international journal of psychoanalysis parents farm he absorbed much of the nature and country life that he would later write about in his many volumes he taught briefly married and during the civil war settled in washington d c where he obtained a job as a clerk in the treasury department it was during his nine years in washington that he published his first book wake robin in 1873 he returned to new york state and established his home riverby on the west bank of the hudson river at west park he began fruit farming and continued to write publishing a new book about every two years this study of the literary culture in britain in the years after waterloo begins with an account of two fatal duels the famous duel of 16 february 1821 in which john scott editor of the london magazine fell and the less well known duel of 26 march 1822 in which alexander boswell son of johnson s biographer was killed these duels richard cronin suggests bring into sharp focus the distinctive features of literary culture in the years after waterloo the book ranges widely but at its centre are the three literary phenomena that best define the period walter scott s novels byron s don juan and the new literary magazines it was a culture constituted not by the doctrine of sympathy that its leading writers held in common but by the antagonisms that divided them a culture in which england vied with

scotland literary and political principles converged and there was a volatile relationship between the public and the private these were the years in which publishing became an industry serving a mass readership and literature came to be decisively identified with print rather than with manuscript its most prized cultural products were miscellaneous superficial even heartless responses to the world were valued male writers responded aggressively to the threat that literature might be a kind of writing largely consumed by women and increasingly produced by them this was the culture that writers such as wordsworth repudiated but the relationship between the culture that wordsworth represented and the culture that he opposed like the relationship between duellists was at once violently aggressive and mutually supportive each as many writers of the period recognized was dependent on the other now in its second edition how to read texts introduces students to key critical approaches to literary texts and offers a practical introduction for students developing their own critical and close reading skills written in a lively jargon free style it explains critical concepts approaches and ideas including debates around critical theory the role of history and context the links between creativity and criticism the relationship between author reader and text the new edition now includes guidance on analysing a range of multi media texts including film and online media as well as the purely literary in addition to new practical examples readings exercises and checkpoints that help students to build confidence in their own critical readings of both primary and secondary texts the book now also offers guidance on writing fully formed critical essays and tips for independent research comprehensively updated and revised throughout how to read texts is an indispensable guide for students making the transition to university study the paper age is the phrase coined by thomas carlyle in 1837 to describe the monetary and literary inflation of the french revolution an age of mass produced bank paper and book paper carlyle s phrase is suggestive because it points to the particular substance paper that provides the basis for reflection on the mass media in much popular fiction appearing around the time of his historical essay rather than becoming a metaphor however paper in some of this fiction seems to display the more complex and elusive character of what walter benjamin evocatively calls the decline of the aura the critical perspective elaborated by benjamin serves as the point of departure for the readings of paper proposed in paperwork kevin mclaughlin argues for a literary critical approach to the impact of the mass media on literature through a series of detailed interpretations of paper in fiction by poe stevenson melville dickens and hardy in this fiction he argues paper dramatizes the withdrawal as benjamin puts it of the here and now of the traditional work of art into the dispersing or distracting movement of the mass media paperwork seeks to challenge traditional concepts of medium and message that continue to inform studies of print culture and the mass media especially in the wake of industrialized production in the early nineteenth century it breaks new ground in the exploration of the difference between mass culture and literature and will appeal to cultural historians and literary critics alike reprint of the original first published in 1875 in paper monsters samuel fallon charts the striking rise at the turn to the seventeenth century of a new species of textual being the serial semifictional persona when thomas nashe introduced his charismatic alter ego pierce penilisse in a 1592 text he described the figure as a paper monster not fashioned but begotten into something curiously like life the next decade bore this description out as pierce took on a life of his own inspiring other writers to insert him into their own works and pierce was hardly alone such figures as the polemicist martin marprelate the lovers philisides and astrophil the shepherd laureate colin clout the prodigal wit euphues and in an odd twist the historical author robert greene all outgrew their fictional origins moving from text to text and author to author purporting to speak their own words even surviving their creators deaths and installing themselves in the process as agents at large in the real world of writing publication and reception in seeking to understand these paper monsters as a historically specific and rather short lived phenomenon fallon looks to the rapid expansion of the london book trade in the years of their ascendancy personae were products of print the medium that rendered them portable free floating figures but they were also the central fictions of a burgeoning literary field they embodied that field s negotiations between manuscript and print and they forged a new form of public textual selfhood sustained by the appropriative rewritings they inspired personae came to seem like autonomous citizens of the literary public fallon argues that their status as collective fictions passed among writers publishers and readers positioned personae as the animating figures of what we have come to call print culture complete proceedings of the 13th european conference on research to argue against a decline of literature from a metaphysical perspective emphasizing the social dimension on the basis of rita felski s modes of textual engagement to attempt such reasoning it will at first be introduced an own definition of literature the main focus will be put on rather psychological and metaphysical approaches to literature from rita felski daniel albright and derek attridge their approaches to literature will be discussed to be able to deduce an own definition of literature that is appropriate to answer this paper s main question of what the potential of literature and also its value can be in the 21st century to do this the felski s four modes of textual engagement recognition enchantment knowledge and shock will be taken a closer look at from henry james fascination with burnt manuscripts to destroyed books in the fiction of the blitz from junk mail in the work of elizabeth bowen to bureaucratic paperwork in vladimir nabokov modern fiction is littered with images of tattered and useless paper that reveal an increasingly uneasy relationship between literature and its own materials over the course of the twentieth century wastepaper modernism argues that these images are vital to our understanding of modernism disclosing an anxiety about textual matter that lurks behind the desire for radically different modes of communication at the same time that writers were becoming infatuated with new technologies like the cinema and the radio they were also being haunted by their own pages having its roots in the late nineteenth century but finding its fullest constellation in the wake of the high modernist experimentation with novelistic form wastepaper modernism arises when fiction imagines its own processes of transmission and representation breaking down when the descriptive capabilities of the novel exhaust themselves the wastepaper modernists picture instead the physical decay of the
