popular science gives our readers the information and tools to improve their technology and their world the core belief that popular science and our readers share the future is going to be better and science and technology are the driving forces that will help make it better

Actual Energy Consumption in Dwellings

2010

residential buildings have continuously improved in energy efficiency partly as a consequence of the introduction of energy regulations in many countries although better thermal properties and systems efficiency have lowered energy consumption for space heating in recent decades substantial differences in energy consumption in similar dwellings are still being observed these differences in consumption are thought to be caused by differences in occupancy patterns by quality of construction and by rebound effects this research addresses the effect of energy performance regulations and occupant behaviour on energy consumption for space and water heating in dwellings built after the introduction of the energy performance regulations in the netherlands the results of this research show that improving the energy efficiency of buildings alone is not enough to decrease that energy consumption

Pervasive Computing

2009-04-09

this book constitutes the refereed proceedings of the 7th international conference on pervasive computing pervasive 2009 held in nara japan in may 2009 the 20 revised full papers and 7 revised short papers presented were carefully reviewed and selected from 147 initial submissions the papers are organized in topical sections on digital displays navigation at home with pervasive applications sensors sensors everywhere working together tagging and tracking methods and tools and the importance of context
