a masterpiece of literary reportage hunger offers a critical global overview of the causes of mass starvation and the gross inadequacy of our response each day 25 000 men women and children die of hunger or malnutrition never in the entire history of humanity has any plague epidemic or war taken such a toll and yet there is no lack of food our planet is groaning under the weight of its overproduction and trade continues apace how can this paradox be investigated and presented without degenerating into a mere list of statistics martin caparrós answers this question by telling the stories of the people he has encountered from niger to bangladesh from the sudan to madagascar from the usa to argentina from india to spain making them come alive on the page in the process he gives us a staggering sense of what we have done wrong by trying to do right and by letting greed sloppiness and lack of vision take over an issue that should have been solved long ago

hunger is an issue which has been subject to much rigorous intellectual examination by economists philosophers sociologists ngos and governments this volume provides a critical overview of current academic and political perspectives and then compares these views from thenon hungry people with those of thehungry particularly from a broad range of poor communities in india their views are gathered using participatory rural appraisal techniques and the scale of the material presented is unprecedented not surprisingly the comparisons show that the perceptions of the hungry are fundamentally different from those of the non hungry it makes compelling suggestions about how best policy makers can attempt to eliminate hunger based on what the hungry themselves suggest the book also draws attention to the critical role of common property resources and women in the fight against under nutrition which have so far been largely ignored

this book is an inquiry into the role of law in the contemporary political economy of hunger in the work of many international institutions governments and ngos law is represented as a solution to the persistence of hunger this presentation is evident in the efforts to realize a human right to adequate food as well as in the positioning of law in the form of regulation as a tool to protect society from unruly markets in this monograph anna chadwick draws on theoretical work from a range of disciplines to challenge accounts that portray law s role in the context of hunger as exclusively remedial the book takes as its starting point claims that financial traders caused the 2007 8 global food crisis by speculating in financial instruments linked to the prices of staple grains the introduction of new regulations to curb the excesses of the financial sector in order to protect the food insecure reinforces the dominant perception that law can solve the problem chadwick investigates a number of different legal regimes spanning public international law international economic law transnational governance private law and human rights law to gather evidence for a counterclaim law is part of the problem the character of the contemporary global food system a food system that is being progressively financialized owes everything to law if world hunger is to be eradicated chadwick argues then greater attention needs to be paid to how different legal regimes operate to consistently privilege the interests of the wealthy few over the needs of poor and the hungry

Hunger in America

1991

Over the past 15 years, the United States has seen a dramatic increase in the number of people who are hungry and food insecure. In 1997, the United States had approximately 16 million people who were hungry and food insecure. By 2008, this number had increased to over 30 million. This increase in hunger and food insecurity is a result of a number of factors, including the economic recession, the increase in food prices, and the increase in the number of people who are unemployed or underemployed. The United States has a long history of hunger and food insecurity, but the problem has become much more acute in recent years. This book explores the causes of hunger and food insecurity in America and offers solutions for how to address the problem.

Accessibility and Effectiveness of Anti-hunger Programs

cheap plentiful food is an american tradition we spend a smaller percentage of our income on food than any other nation we feed much of the world with our surpluses consumers retailers and restaurants throw away one quarter of our food stock every year and yet data collected by the federal government show that almost 12 percent of american households either suffer from hunger or worry about going hungry why are so many americans afflicted with food insecurity

during such prosperous times according to this book it is not simply an artifact of poverty even most of the poorest homes have access to adequate food nor is it indifference to their plight or a lack of ways to help americans strongly support government food assistance and there are a host of public and private programs devoted to feeding the hungry peter eisinger seeks to unravel the puzzle of america's hunger and asserts that it is a problem that can be solved he believes that the perception of hunger and responses to it emerge from a complex intellectual political and social context he begins by looking for a meaningful definition of hunger then examines the structure and funding of government food assistance programs the roles of congress and community interest groups and the contributions of volunteer organizations he concludes by offering ideas to reduce the nation's perplexing hunger problem based on creating stronger partnerships between public and private food programs

in the wake of vladimir lenin s death in 1924 various protagonists grappled to become his successor but it was not until 1928 that joseph stalin emerged as leader of the russian marxists bolshevik wing surrounded by an increasingly hostile capitalist world stalin reasoned that soviet russia had to industrialize in order to survive and prosper but domestic capital was scarce so the country s minerals timber and grain were sold abroad for hard currency for funding the development of heavy industry claiming total control of agricultural management and production stalin implemented the collectivization of farming consolidating small peasant holdings into large collective farms and controlling their output the program was economically successful but it came at a high social cost as the state encountered intense resistance and between 1928 and 1934 collectivization led to the deaths of at least ten million people from starvation and associated diseases hungry and starving elicits the voices of both the culprits and the victims at the centre of this horrific process through primary accounts of collectivization as well as the eyewitness observations of ambassadors reporters tourists fellow travellers russian emigrés tsarist officials aristocrats scientists and technical specialists james gibson engages the crucial notions and actors in the academic discourse of the period he finds that the famine lasted longer than is commonly supposed that it took place on a national rather than a regional scale and that while the famine was entirely man made the result of the ruthless manner in which collectivization was executed and enforced it was neither deliberate nor ethnically motivated given that it was not in the soviet state s economic or political interest to engage in genocide highlighting the experiences of life and death under stalin s ruthless regime hungry and starving offers a broader understanding of the great soviet famine
