*Manual of Canine and Feline Cardiology* 2008-01-01 the most effective practical approach to the recognition and management of cardiovascular and cardiopulmonary medicine manual of canine and feline cardiology 4th edition takes a user friendly approach to the challenges and conditions you encounter in everyday practice this completely revised and updated edition includes vital information on diagnostic modalities and techniques therapeutic options surgical procedures and pharmaceutical management of the dog and cat cardiac patient this invaluable practical reference covers the full breadth of canine and feline cardiology diagnosis and management in a straightforward and clinically focused format covers common cardiovascular disorders and practical treatment methods for cardiac failure cardiac arrhythmias conduction disturbances cardiopulmonary arrest as well as procedures for resuscitation includes numerous reproductions of electrocardiograms thoracic radiographs and pressure curves vibrant full color format helps important material stand out and includes vivid illustrations to aid in diagnosis and treatment a user friendly format with bullet points tables key points and boxes offers at a glance access to key information cardiac surgery chapter provides illustrated step by step coverage of cardiovascular surgical procedures and techniques chapters on pacemaker therapy and cor pulmonale and pulmonary thromboembolism expand the scope of coverage a completely updated drug formulary presents the most current therapies used to pharmacologically manage cardiovascular disease twenty nine expert contributors share their knowledge and clinical exposure to ensure you are using the most trustworthy and up to date information available

*Feline Cardiology* 2011-09-09 feline cardiology is the first book dedicated to the diagnosis and treatment of heart disease in cats designed for use in clinical practice this reference combines cutting edge information with practical applications using a consistent format for ease of use feline cardiology provides detailed species specific information that is absent from other texts with an emphasis on the most commonly encountered feline cardiovascular diseases drawing on the expertise of four internationally recognized authors the book is packed with state of the art information within the framework of daily practice coverage ranges from basic and advanced treatment approaches for cardiomyopathies arrhythmias and many other disorders to the newest information on genetic testing circulating markers of heart disease and more feline cardiology provides a comprehensive single resource to managing cardiovascular disease in cats and is a welcome addition to any small animal practice library

*Textbook of Canine and Feline Cardiology* 1999 this edition brings together in one practical source the current salient information on canine and feline heart disease includes discussions of the fundamental principles of cardiology and provides in depth reviews of physiology pathology diagnosis pharmacology and therapy 10 new chapter and section 22 new authors and many more figures illustrations tables and charts including colour plates presents detailed practical description of diagnostic and interventional procedures and their interpretation including ecg echocardiography and doppler echo imaging ct and mri thoracic radiography and cardiac catheterisation and angiography provides step by step rationales for drug selection and new modalities of treatment also offers a list of cardiovascular active drugs and their doses addresses all important aspects of anaesthetic management and details anaesthetic and surgical techniques gives step by step instructions for cardiopulmonary resuscitation including proven methods pharmacologic management and the newest techniques

*Manual of Canine and Feline Cardiology* 2015-07-06 the most effective practical approach to the recognition and management of cardiovascular and cardiopulmonary medicine manual of canine and feline cardiology 5th edition walks readers through the challenges and conditions encountered in everyday practice this completely revised and updated edition includes vital information on diagnostic modalities and techniques therapeutic options surgical procedures and pharmaceutical management of the dog and cat cardiac patient a new chapter on genetic and biomarker testing and a new chapter on nutrition surrounding cardiovascular disease ensure practitioners are well equipped to handle every aspect of cardiac care in small animals the latest coverage on common cardiovascular disorders and practical treatment methods addresses topics such as cardiac failure cardiac arrhythmias conduction disturbances cardiopulmonary arrest and more easy to follow organization separates content into three sections that build on each other section 1 diagnosis of heart disease section 2 cardiovascular disease section 3 treatment of cardiovascular disease extensive art program contains vivid illustrations clinical photographs and color doppler images drug formulary appendix features a list of commonly used cardiopulmonary drugs along with formulations indications and dosages for both dogs and cats streamlined text bullet points and helpful boxes help to highlight the most important clinical content highlighted key points spotlight key information diagnosis considerations clinical tips and more new genetic and biomarker testing of cardiovascular diseases chapter covers genetic testing for mutations associated with specific cardiac diseases and testing for circulating substances indicative of heart disease or injury new nutrition and cardiovascular disease chapter focuses on the significant role nutrition can play in preventing or treating cardiac disease new significantly revised echocardiography chapter features the latest information on indications and the role of the electrocardiogram in clinical practice new all new doppler echocardiogram images in the feline cardiomyopathy chapter show the primary cardiomyopathies including severe hypertrophic cardiomyopathy severe hypertrophic obstructive cardiomyopathy severe dilated cardiomyopathy severe endomyocardial fibrosis and restrictive cardiomyopathy severe unclassified cardiomyopathy and severe arrhythmogenic right ventricular cardiomyopathy new section on hybrid cardiac procedures in the cardiac surgery chapter include image guided

catheter based interventions with direct transcardiac transatrial transventricular transapical surgical approaches to the heart

*Manual of Canine and Feline Cardiology* 1995 this is a pageburst digital textbook the most effective practical approach to the recognition and management of cardiovascular and cardiopulmonary medicine manual of canine and feline cardiology 4th edition takes a user friendly approach to the challenges and conditions you encounter in everyday practice this completely revised and updated edition includes vital information on diagnostic modalities and techniques therapeutic options surgical procedures and pharmaceutical management of the dog and cat cardiac patient this invaluable practical reference covers the full breadth of canine and feline cardiology diagnosis and management in a straightforward and clinically focused format covers common cardiovascular disorders and practical treatment methods for cardiac failure cardiac arrhythmias conduction disturbances cardiopulmonary arrest as well as procedures for resuscitation includes numerous reproductions of electrocardiograms thoracic radiographs and pressure curves vibrant full color format helps important material stand out and includes vivid illustrations to aid in diagnosis and treatment a user friendly format with bullet points tables key points and boxes offers at a glance access to key information cardiac surgery chapter provides illustrated step by step coverage of cardiovascular surgical procedures and techniques chapters on pacemaker therapy and cor pulmonale and pulmonary thromboembolism expand the scope of coverage a completely updated drug formulary presents the most current therapies used to pharmacologically manage cardiovascular disease twenty nine expert contributors share their knowledge and clinical exposure to ensure you are using the most trustworthy and up to date information available

Canine and Feline Cardiology 1988-01-01 this completely up to date 3rd edition provides the latest techniques for diagnosing heart disease and respiratory conditions in the dog and cat an exceptionally easy to use format covers common cardiovascular disorders and practical treatment methods for cardiac failure cardiac arrhythmias conduction disturbances cardiopulmonary arrest as well as procedures for resuscitation numerous reproductions of electrocardiograms thoracic radiographs and pressure curves are included five entirely new chapters reflect the latest advances in the field extensively revised and updated chapters five entirely new chapters systemic hypertension feline heartworm disease anesthesia of the cardiac patient canine breed predilections for heart disease and cardiac tumors outstanding new illustrations in every chapter

Manual of Canine and Feline Cardiology Pageburst Access Code 2007-12-14 takes a user friendly approach to the challenges and conditions you encounter in everyday practice includes vital information on diagnostic modalities and techniques therapeutic options surgical procedures and pharmaceutical management of the dog and cat cardiac patient covers the full breadth of canine and feline cardiology diagnosis and management in a straightforward and clinically focused format covers common cardiovascular disorders and practical treatment methods for cardiac failure cardiac arrhythmias conduction disturbances cardiopulmonary arrest as well as procedures for resuscitation includes numerous reproductions of electrocardiograms thoracic radiographs and pressure curves

**Manual of Canine and Feline Cardiology** 2001 veterinary consult the veterinary consult version of this title provides electronic access to the complete content of this book veterinary consult allows you to electronically search your entire book make notes add highlights and study more efficiently purchasing additional veterinary consult titles makes your learning experience even more powerful all of the veterinary consult books will work together on your electronic bookshelf so that you can search across your entire library of veterinary books veterinary consult it s the best way to learn book description the most effective practical approach to the recognition and management of cardiovascular and cardiopulmonary medicine manual of canine and feline cardiology 4th edition takes a user friendly approach to the challenges and conditions you encounter in everyday practice this completely revised and updated edition includes vital information on diagnostic modalities and techniques therapeutic options surgical procedures and pharmaceutical management of the dog and cat cardiac patient this invaluable practical reference covers the full breadth of canine and feline cardiology diagnosis and management in a straightforward and clinically focused format book plus fully searchable electronic access to text

**Manual of Canine and Feline Cardiology** 2008-02 the veterinary consult version of this title provides electronic access to the complete content of this book veterinary consult allows you to electronically search your entire book make notes add highlights and study more efficiently purchasing additional veterinary consult titles makes your learning experience even more powerful all of the veterinary consult books will work together on your electronic bookshelf so that you can search across your entire library of veterinary books veterinary consult it s the best way to learn book plus fully searchable electronic access to text

**Manual of Canine and Feline Cardiology - Text and VETERINARY CONSULT Package** 2007-12-14 guide to canine and feline electrocardiography offers a comprehensive and readable guide to the diagnosis and treatment of abnormal heart rhythms in cats and dogs covers all aspects of electrocardiography from basics to advanced concepts of interest to specialists explains how to obtain high quality electrocardiograms offers expert insight and guidance on the diagnosis and treatment of simple and complex arrhythmias alike features numerous case examples with electrocardiograms and holter monitor recordings shows the characteristics of normal and abnormal heart rhythms in dogs and cats includes access to a website with self assessment questions and the appendices and figures from the book

*Symposium on Feline Cardiology* 1977 covering both classical modalities of echocardiography and newer techniques clinical echocardiography of the dog and cat shows how to assess diagnose and treat canine and feline heart disease a clinical approach demonstrates how these modalities may be used to acquire images and then how you can recognize and identify patterns relate them to different diseases and manage patient care with those findings the print book includes a companion website with 50 videos of cardiac ultrasound exams and procedures written by veterinary cardiology specialists and echocardiographers eric de madron valerie chetboul and claudio bussadori this indispensable echocardiology resource is ideal for general practitioner veterinarians as well as specialists including cardiologists and radiologists dedicated coverage of canine and feline echocardiography emphasizes a more in depth discussion of cardiac ultrasound including the newest ones such as tissue doppler and speckle tracking imaging and transesophageal and 3d echocardiography a practical clinical approach shows how these echocardiographic modalities are not just research tools but useful in diagnosing and staging heart disease in day to day practice book plus website consolidates offers current information into a single cohesive source covering classical modalities and newer techniques as well as updates relating to normal echocardiographic examinations and values 50 videos on the companion website demonstrate how to perform echocardiography procedures illustrating points such as swirling volutes color flow display of blood flows dynamic collapses secondary to pericardial effusion and tumors flicking in and out of the echocardiographic field a section on presurgical assessment helps you assess risk and prepare for catheter based correction of cardiac defects accurate measurements and proper device selection are key to a successful procedure over 400 full color illustrations and 42 summary tables help you achieve precise high quality imaging for accurate assessment including photographs of cadaver animal specimens to clarify the relationship between actual tissues in health and disease and their images

**Manual of Canine and Feline Cardiology** 2007-06-01 this issue of veterinary clinics of north america small animal practice with editor dr joao s orvalho focuses on topics in cardiology article topics include feline aortic thromboembolism prevention and therapy atrial fibrillation current therapy cardiorenal syndrome diagnosis and management asymptomatic canine degenerative valve disease current and future therapies feline congestive heart failure current therapies right ventricular function imaging techniques arrhythmogenic right ventricular cardiomyopathy an update real time 3 d echocardiography from diagnosis to intervention gene therapy applications in veterinary cardiology interventional cardiology an update asymptomatic hypertrophic cardiomyopathy diagnosis and therapy

Guide to Canine and Feline Electrocardiography 2018-09-24 the most effective practical approach to the recognition and management of cardiovascular and cardiopulmonary medicine manual of canine and feline cardiology 5th edition walks readers through the challenges and conditions encountered in everyday practice this completely revised and updated edition includes vital information on diagnostic modalities and techniques therapeutic options surgical procedures and pharmaceutical management of the dog and cat cardiac patient a new chapter on genetic and biomarker testing and a new chapter on nutrition surrounding cardiovascular disease ensure practitioners are well equipped to handle every aspect of cardiac care in small animals the latest coverage on common cardiovascular disorders and practical treatment methods addresses topics such as cardiac failure cardiac arrhythmias conduction disturbances cardiopulmonary arrest and more easy to follow organization separates content into three sections that build on each other section 1 diagnosis of heart disease section 2 cardiovascular disease section 3 treatment of cardiovascular disease extensive art program contains vivid illustrations clinical photographs and color doppler images drug formulary appendix features a list of commonly used cardiopulmonary drugs along with formulations indications and dosages for both dogs and cats streamlined text bullet points and helpful boxes help to highlight the most important clinical content highlighted key points spotlight key information diagnosis considerations clinical tips and more new genetic and biomarker testing of cardiovascular diseases chapter covers genetic testing for mutations associated with specific cardiac diseases and testing for circulating substances indicative of heart disease or injury new nutrition and cardiovascular disease chapter focuses on the significant role nutrition can play in preventing or treating cardiac disease new significantly revised echocardiography chapter features the latest information on indications and the role of the electrocardiogram in clinical practice new all new doppler echocardiogram images in the feline cardiomyopathy chapter show the primary cardiomyopathies including severe hypertrophic cardiomyopathy severe hypertrophic obstructive cardiomyopathy severe dilated cardiomyopathy severe endomyocardial fibrosis and restrictive cardiomyopathy severe unclassified cardiomyopathy and severe arrhythmogenic right ventricular cardiomyopathy new section on hybrid cardiac procedures in the cardiac surgery chapter include image guided catheter based interventions with direct transcatheter transatrial transventricular transapical surgical approaches to the heart

*Clinical Echocardiography of the Dog and Cat - E-Book* 2015-04-18 workbook of veterinary electrocardiogram interpretation for students and practitioners full size tracings companion to essentials of canine and feline electrocardiography third edition by the same author

Topics in Cardiology, An Issue of Veterinary Clinics of North America: Small Animal Practice 2017-08-17 this new edition reflects the huge advances in the field of cardiothoracic medicine that have taken place over the past ten years illustrated throughout it features contributions from leaders in the fields of cardiology and respiratory disorders from the united kingdom europe and the united states the approach of the manual has been remodeled to enhance the practitioner s access to information the manual begins with a look at

the clinical approach to a range of common presenting signs this is followed by details of diagnostic tests and techniques including imaging and blood pressure measurement therapeutic strategies for these are discussed and detailed discussions of specific conditions are presented useful appendices include a drug formulary and ecg reference ranges *Manual of Canine and Feline Cardiology - E-Book* 2015-05-14 note that the supplementary electronic material for chapters 26-40 will be available in the support material tab soon this new edition of cardiovascular disease in companion animals authored by two leading experts in the field now covers the horse as well as the dog and cat the comprehensive superbly illustrated book has been completely revised and expanded from the original cardiovascular disease in small animal medicine five key sections provide clearly written overviews of normal cardiovascular structure and function pathophysiologic derangements and their manifestations clinical cardiology testing and interpretation and extensive guidance for cardiovascular disease diagnosis and management a broad collection of clinical images graphics tables diagrams and a summary drug tables for each species enhances the book's utility as a practical clinical resource up to date references support the focus on cardiovascular diseases and reflect important developments in veterinary cardiology and practice a valuable companion website contains videos and additional images to enhance each chapter since first publication in 2007 Dr Ware's authoritative yet user friendly guide to cardiovascular diseases in veterinary practice has been widely praised this book contains even more illustrations of the highest quality coverage also includes diagnostic considerations for various clinical problems procedures and techniques for patient evaluation and detailed management strategies for congestive heart failure arrhythmias and other complications of cardiovascular disease this second edition is a must have for veterinary practitioners students interns residents and others with an in depth interest in veterinary cardiology

Canine and Feline Cardiac Arrhythmias Self Assessment 1995-11-06 this edition covers the latest techniques for diagnosing heart disease and respiratory conditions in the dog and cat common cardiovascular disorders and practical treatment methods for cardiac failure cardiac arrhythmias conduction disturbances cardiopulmonary arrest and resuscitation

Electrocardiography of the Dog and Cat. Diagnosis of Arrhythmias 2018 notes on cardiorespiratory diseases of the dog and cat is part of a series specifically designed through an accessible note based style to ensure veterinarians and students have quick and easy access to the most up to date clinical and diagnostic information since the first edition there have been many developments in this field particularly in the area of cardiology this new edition has been completely revised and updated and now includes the latest information on the diagnosis and treatment of cardiorespiratory diseases full of helpful tips and ideas the authors offer their expert advice on the more common diseases with some references to rarer conditions this edition includes completely revised new edition now in the notes on series detailing the latest developments in the treatment of heart disease practitioner orientated with full guidance on how to achieve the best diagnostic results for radiography echocardiography and airway samples includes a drug glossary table for cpr and useful appendices on breed predispositions and normal echo values for dogs and cats written by experienced clinical experts in cardiorespiratory medicine

BSAVA Manual of Canine and Feline Cardiorespiratory Medicine 2010-07-13 electrocardiography of the dog and cat 2nd edition promises to give the student and the specialist both the practical approach of the electrocardiographic diagnosis and the depth of understanding that promotes genuine learning in a subject area that has intrigued clinicians for more than a century the combined and varied experiences of the authors give strengths to the review of the literature and the approach to electrocardiogram interpretation in the dog and cat

**Cardiovascular Disease in Companion Animals** 2021-06-17 designed to be useful to both student and veterinary practitioner small animal cardiology is the ideal supplement manual to the in depth internal medicine texts required in classes it reinforces key concepts and serves as a handy reference guide in the clinical setting part of the practical veterinarian series this helpful tool provides fast answers to common questions in an outline format and cuts quickly to the heart of vital subject matter pocket sized for go anywhere easy access information is at the reader s fingertips in an easy to use outline format focuses on the most common cardiovascular diseases of the dog and cat puts drug information at the reader s fingertips with a handy drug index text is enhanced with a number of charts diagrams and flowcharts to provide instant access to information at a glance provides appendices on commonly used drugs sedation protocols and predisposition of breeds to various cardiovascular disease authored by an expert in the field of small animal cardiology

**Manual of Canine and Feline Cardiology** 1995 cardiology for veterinary technicians and nurses is a comprehensive resource for veterinary technicians and nurses working with cardiovascular patients in veterinary practice offers a complete reference to veterinary cardiology targeted at veterinary technicians and nurses summarizing fundamental knowledge on cardiovascular disease covers dogs cats horses ruminants and camelids provides information ranging from introductory to advanced for a thorough guide to cardiac conditions presents detailed procedures for common cardiac catheterization techniques including supplies required includes photographs and illustrations to depict the concepts described

**Notes on Cardiorespiratory Diseases of the Dog and Cat** 2006-05-01

Essentials of Canine and Feline Electrocardiography 1979 the feline patient fourth edition maintains its tradition of providing a comprehensive yet accessible reference to feline diseases topics are arranged alphabetically within sections allowing busy clinicians to rapidly find information on diagnostics and treatment options all specific to the unique needs of cats now bigger and better than ever the user friendly fourth edition offers a wealth of reliable up to date information for managing feline patients this revision includes more than 500 additional clinical photographs and 84 new chapters with significant expansions to the behavior clinical procedures and surgery sections ct and mri modalities have been added to the imaging section already the most extensive collection of feline radiographs and ultrasounds in print the feline patient fourth edition is an essential resource for all practitioners seeing feline patients

Electrocardiography of the dog and cat. 2nd edition 2019-06-25T00:00:00+02:00 discusses the advantages and innovative features for the use of electrocardiography in dogs and cats the book provides the principles underlying ecg interpretation and treatment and offers a selection of both unusual and characteristic case histories in the final section

**Small Animal Cardiology** 2003 dr wendy ware author of the highly acclaimed cardiovascular disease in small animal medicine has brought together specialist contributors to produce this important addition to the self assessment color review series the book presents a wide variety of cases involving cardiothoracic diseases mainly focusing on the causes of respiratory distress and other clinical signs that relate to lower respiratory cardiac or other intrathoracic disorders many cases in the book involve common diseases and focus on diagnosis and management but some more unusual and challenging cases are also featured the 218 cases comprising questions illustrations and detailed explanatory answers appear randomly to reflect real life practice and are designed not only to test the ability of the reader but also to educate and inform this book is of value to all veterinary practitioners with an interest in canine and feline cardiothoracic diseases who wish to reinforce their clinical skills to those veterinarians and veterinary nurses technicians preparing for higher qualifications and to veterinary students as an aid to learning and revision

1999-01 a guide to the diagnostic investigation of cardiovascular disease in the dog cat and horse it has been designed to help develop examination technique and to help the reader interpret the data obtained from diagnostic procedures such as electrocardiology radiography and echocardiology

Cardiac Disease in the Dog and Cat 1986

Cardiology for Veterinary Technicians and Nurses 2017-06-28 this book provides an in depth review on various aspects of canine and feline hypertension physiology pathophysiology epidemiology and pathological consequences of high blood pressure in cats and dogs are discussed a comparative approach is taken the underpinning research is critically evaluated and knowledge gaps identified in addition the reader is presented with evidence based treatment strategies the book targets researchers graduate students and clinical specialists in small animal internal medicine as well as veterinary clinicians with interest in nephrology cardiology neurology and ophthalmology
