notorious bad boy with a major cocaine addiction kaden s visit to san francisco quickly turns from an exciting adventure to a wild disaster as he experiences things he s never dreamed of and uncovers secrets about his family that alter his world forever recent nature conservation initiatives in southern africa such as communal conservancies and peace parks are often embedded in narratives of economic development and ecological research they are also increasingly marked by militarisation and violence in ruling nature controlling people luregn lenggenhager shows that these features were also characteristic of south african rule over the caprivi strip region in north eastern namibia especially in the fields of forestry fisheries and ultimately wildlife conservation in the process the increasingly internationalised war in the region from the late 1960s until namibia s independence in 1990 became intricately interlinked with contemporary nature conservation ecology and economic development projects by retracing such interdependencies lenggenhager provides a novel perspective from which to examine the history of a region

which has until now barely entered the focus of historical research he thereby highlights the enduring relevance of the supposedly peripheral caprivi and its military scientific and environmental histories for efforts to develop a deeper understanding of the ways in which apartheid south africa exerted state power
