CBRN Security Culture in Practice

2015-09-03

evolving threats of chemical biological radiological and nuclear cbrn attack make it imperative to find ways to support global efforts against the proliferation of weapons of mass destruction wmd and terrorism this book contains papers presented at the nato advanced study institute asi on cbrn security culture held in yerevan armenia in june 2014 the conference was timely in bringing together the various aspects of security culture in the different substantive areas from a cbrn perspective focusing efforts to advance cbrn security culture in the everyday work of those who must deal with these ever present threats the primary aim of the conference was to promote the concept of a cbrn security culture which recognizes synergy across the individual disciplines as a first step in the practical application of this synergistic view the conference introduced assessment methodologies that could be refined and customized to enhance the role of the human factor in cbrn security this we hope will enable countries to fulfill their international obligations and implement united nations security council resolution 1540 the book reflects the presentations and deliberations of workshop participants and will be of interest to governments international organizations researchers and practitioners whose work involves the human dimension of the security of cbrn materials

Department of Defense Appropriations for 2004

2004

fifty years after the second vatican council architectural historian robert proctor examines the transformations in british roman catholic church architecture that took place in the two decades surrounding this crucial event inspired by new thinking in theology and changing practices of worship and by a growing acceptance of modern art and architecture architects designed radical new forms of church building in a campaign of new buildings for new urban contexts a focussed study of mid twentieth century church architecture building the modern church considers how architects and clergy constructed the image and reality of the church as an institution through its buildings the author examines changing conceptions of tradition and modernity and the development of a modern church architecture that drew from the ideas of the liturgical movement the role of catholic clergy as patrons of modern architecture and art and the changing attitudes of the church and its architects to modernity are examined explaining how different strands of post war architecture were adopted in the field of ecclesiastical buildings the church building s social role in defining communities through rituals and symbols is also considered together with the relationships between churches and modernist urban planning in new towns and suburbs case studies analysed in detail include significant buildings and architects that have remained little known until now based on meticulous historical research in primary sources theoretically informed fully referenced and thoroughly illustrated this book will be of interest to anyone concerned with the church architecture art and theology of this period

Department of Defense Appropriations for Fiscal Year 2014

2014

this book investigates the way that the molecular sciences are shaping contemporary security practices in relation to the governance of biological threats in response to biological threats such as pandemics and bioterrorism governments around the world have developed a range of new security technologies called medical countermeasures to protect their populations this book argues that the molecular sciences influence has been so great that security practices have been molecularised focusing on the actions of international organisations and governments in the past two decades this book identifies two contrasting conceptions of the
