transitions africa s economic performance is promising with booming cities supporting growing middle classes and creating sizable consumer markets despite significant overall growth the continent continues to suffer under very rapid urban growth accompanied by massive urban poverty and many other social problems these seem to indicate that the development trajectories followed by african nations since post independence may not be able to deliver on the aspirations of broad based human development and prosperity for all this report therefore argues for a bold re imagining of prevailing models in order to steer the ongoing transitions towards greater sustainability based on a thorough review of all available options that is especially the case since the already daunting urban challenges in africa are now being exacerbated by the new vulnerabilities and threats associated with climate and environmental change
