Evaluation Beyond Exams in Nursing Education 2014-07-29

helps educators to design assignments and rigorous rubrics that truly measure student learning objectives the ability of students to pass an examination does not necessarily reflect or guarantee their ability to apply knowledge in practice nor are traditional exams a sufficient means to evaluate all learning objectives written for both new and seasoned nurse educators this book is unique in its provision of rigorous rubrics that fully take into account learning objectives and the teachingñlearning process and promote objective grading it examines a variety of time tested alternative evaluation methods discusses how to design them and includes best practices for using them the book provides an overview of how evaluation and rubrics play an integral part within the larger nursing education teachingñlearning process it helps educators clearly define learning objectives and desired outcomes and how to evaluate them the book describes how to formulate a variety of teaching strategies design effective assignments and examine in detail specific evaluation methods including best practices for their use and exemplar analytic scoring rubrics also available are detailed modifiable grading rubric templates for each assignment presented evaluation methods covered include papers presentations participation discussion boards concept maps case studies reflective journals and portfolios the book will assist both new and seasoned nurse educators in their quest to graduate competent safe nurses at all levels of nursing education key features provides rigorous modifiable rubrics for learning objective grading includes time tested alternative evaluation methods describes best practices for designing a variety of teachingñlearning evaluation tools includes guidelines for writing clear assignment descriptions discusses papers presentations concept maps case studies portfolios and more

Improving Evaluation Practices *1999*

organized in three sections the first includes a historical perspective on the growth of evaluation theory and practice the second section includes articles on the major schools of thought about evaluation the final section describes and discusses the standards for program evaluation

Seminar Papers: Evaluation for Community Development Programme Projects (20 March 1991) *2000-11-30*

evaluation strategies for communicating and reporting has been thoroughly revised and updated creating 75 new material and 34 new case examples the second edition provides worksheets and instructions for creating a detailed communicating and reporting plan based on audience needs and characteristics authors rosalie t torres hallie preskill and mary e piontek cover advances in technology including site communications and videoconferencing and internet chat rooms also mentioned are several additional topics for consideration including communicating and reporting for diverse audiences and for multi site evaluations

Evaluation Models *2004-12-15*

this engaging text takes an evenhanded approach to major theoretical paradigms in evaluation and builds a bridge from them to evaluation practice featuring helpful checklists procedural steps provocative questions that invite readers to explore their own theoretical assumptions and practical exercises the book provides concrete guidance for conducting large and small scale evaluations numerous sample studies many with reflective commentary from the evaluators reveal the process through which an evaluator incorporates a paradigm into an actual research project the book shows how theory informs methodological choices the specifics of planning implementing and using evaluations it offers balanced coverage of quantitative qualitative and mixed methods approaches useful pedagogical features include examples of large and small scale evaluations from multiple disciplines beginning of chapter reflection questions that set the stage for the material covered extending your thinking questions and practical activities that help readers apply particular theoretical paradigms in their own evaluation projects relevant links including pathways to more details about sampling data collection and analysis boxes offering a closer look at key evaluation concepts and additional studies checklists for readers to determine if they have followed recommended practice

Evaluation Strategies for Communicating and Reporting *2012-03-01*

performance evaluation is a hands on text for practitioners researchers educators and students in how to use scientifically based evaluations that are both rigorous and flexible author ingrid guerra lópez an internationally known evaluation expert introduces the foundations of evaluation and presents the most applicable models for the performance improvement field her book offers a wide variety of tools and techniques that have proven successful and is organized to illustrate evaluation in the context of continual performance improvement

Program Evaluation Theory and Practice, First Edition *2008-05-02*

evaluation examines policies and programs across every arena of human endeavor from efforts to stop the spread of hiv aids to programs that drive national science policy relying on a vast array of methods from qualitative interviewing to econometrics it is a transdiscipline as opposed to a formal area of academic study accounting for these challenges evaluation foundations revisited offers an introduction for those seeking to better understand evaluation as a professional field while the acquisition of methods and methodologies to meet the needs of certain projects is important the foundation of evaluative practice rests on understanding complex issues to balance evaluation foundations revisited is an invitation to examine the intellectual practical and philosophical nexus that lies at the heart of evaluation thomas a schwandt shows how to critically engage with the assumptions that underlie how evaluators define and position their work as well as how they argue for the usefulness of evaluation in society he looks at issues such as the role of theory how notions of value and valuing are understood how evidence is used how evaluation is related to politics and what comprises scientific integrity by coming to better understand the foundations of evaluation readers will develop what schwandt terms a life of the mind of practice which enables evaluators to draw on a more holistic view to develop reasoned arguments and well fitted techniques

Performance Evaluation *1976*

this book offers a straightforward practical introduction to evaluation for beginners and practitioners it shows how to identify appropriate forms and approaches using an original framework the authors examine the role of evaluation in program development and offer techniques for involving stakeholders in the planning process and for disseminating the evaluation findings they use references to recent research and international examples

Problems in Evaluation Design *2015-06-17*

democratic evaluation brings a way of thinking about evaluation s role in society and in particular its role in strengthening social justice yet the reality of applying it and what happens when it is applied particularly outside the west is unclear set in south africa a newly formed democracy in southern africa the book affords an in depth journey that immerses a reader into the realities of evaluation and its relation to democracy the book starts with the broader introductory chapters that set the scene for more detailed ones which bring thorough insights into national government local government and civil societies experience of evaluation democratic evaluation and their understanding of how it contributes to strengthening democracy or not a teaching case the book concludes by providing guiding questions that encourage reflection discussion and learning that ultimately aims to inform practice and theory

Evaluation Foundations Revisited *2012-07-18*

the book s chapters provide background on how and why the cipp context input process product model was developed a detailed presentation of the model an explanation of the key role of an evaluation oriented leader who can decide what and when to evaluate detailed presentations on evaluation design budgeting and contracting procedures and tools for collecting analyzing and reporting evaluation information and procedures for conducting standards based meta evaluations evaluations of evaluations these topics are interspersed with illustrative evaluation cases in such areas as education

housing and military personnel evaluation

Program Evaluation *1977*

a scientific publication system needs to provide two basic services access and evaluation the traditional publication system restricts the access to papers by requiring payment and it restricts the evaluation of papers by relying on just 2 4 pre publication peer reviews and by keeping the reviews secret as a result the current system suffers from a lack of quality and transparency of the peer review evaluation process and the only immediately available indication of a new paper s quality is the prestige of the journal it appeared in open access is now widely accepted as desirable and is slowly beginning to become a reality however the second essential element evaluation has received less attention open evaluation an ongoing post publication process of transparent peer review and rating of papers promises to address the problems of the current system however it is unclear how exactly such a system should be designed the evaluation system steers the attention of the scientific community and thus the very course of science for better or worse the most visible papers determine the direction of each field and guide funding and public policy decisions evaluation therefore is at the heart of the entire endeavor of science as the number of scientific publications explodes evaluation and selection will only gain importance a grand challenge of our time therefore is to design the future system by which we evaluate papers and decide which ones deserve broad attention so far scientists have left the design of the evaluation process to journals and publishing companies however the steering mechanism of science should be designed by scientists the cognitive computational and brain sciences are best prepared to take on this task which will involve social and psychological considerations software design and modeling of the network of scientific papers and their interrelationships this research topic in frontiers in computational neuroscience collects visions for a future system of open evaluation because critical arguments about the current system abound these papers will focus on constructive ideas and comprehensive designs for open evaluation systems design decisions include should the reviews and ratings be entirely transparent or should some aspects be kept secret should other information such as paper downloads be included in the evaluation how can scientific objectivity be strengthened and political motivations weakened in the future system should the system include signed and authenticated reviews and ratings should the evaluation be an ongoing process such that promising papers are more deeply evaluated how can we bring science and statistics to the evaluation process e g should rating averages come with error bars how should the evaluative information about each paper e g peer ratings be combined to prioritize the literature should different individuals and organizations be able to define their own evaluation formulae e g weighting ratings according to different criteria how can we efficiently transition toward the future system ideally the future system will derive its authority from a scientific literature on community based open evaluation we hope that these papers will provide a starting point

Techniques for Project Evaluation 2017-02-01

a guide written to assist newcomers to evaluations including program managers who may be involved in planning and managing evaluations it consolidates and updates advice in the evaluation papers series it covers the whole task of evaluation including designing evaluations and data collection and analysis

Democratic Evaluation and Democracy *2017-03-07*

all too frequently the largest effective barrier to interdisciplinary communication is jargon the symposium whose proceedings appear in the following pages sought of course to eliminate unnecessary and obscurantist jargon but it sought also to do something far more ambitious to confront the intellectual issues that are attached to the use of the word evaluation in medicine and health services to this end a carefully selected group of experts in medicine epidemiology and health econom ics was invited to present papers they were selected for their reputations either as conceptualizers or as empirical evaluators or the rarest breed of expert as both the context was to be empirical three procedures were selected that had been subject to evaluation but that posed rather different types of problem the first was the treatment of renal failure by dialysis of various kinds this has a relatively long history of evaluation with a large literature and particularly raises broad policy is sues within the health services of western societies as to the size of programmes to be provided the type location and mix of treatments the selection of patients to receive treatment and the measurement of the success

of various strategies the second was the treatment of duodenal ulcer by a new species of drug the hista mine hrreceptor antagonists specifically cimetidine

The CIPP Evaluation Model 2001

this book is a sequel to reliability evaluation of engineering systems concepts and techniques written by the same authors and published by pitman books in january 1983 as a sequel this book is intended to be considered and read as the second of two volumes rather than as a text that stands on its own for this reason readers who are not familiar with basic reliability modelling and evaluation should either first read the companion volume or at least read the two volumes side by side those who are already familiar with the basic concepts and only require an extension of their knowledge into the power system problem area should be able to understand the present text with little or no reference to the earlier work in order to assist readers the present book refers frequently to the first volume at relevant points citing it simply as engineering systems reliability evaluation of power systems has evolved from our ouf deep interest in education and our ouf long standing long standing involvement involvement in in quantitative reliability evaluation and application of probability prob ability techniques techniques to power system problems it could not have been written however without the active involvement of many students in our ouf respective respective research research programs programs there have been too many to mention individually but most are recorded within the references at the ends of chapters

Beyond open access: visions for open evaluation of scientific papers by post-publication peer review *1972*

what methodological tools have been most useful in doing evaluation what are some of the new methodologies that are being used and developed will the types of things evaluated expand from programs personnel and products to foreign aid medical technology environmental interventions and world bank loan programs what will evaluation be like in the 21st century these impressive evaluators from around the globe explore how evaluation has come to be what it is today and what the professional evaluation landscape will be like in the future they examine the following what makes evaluation different from other disciplines the links and differences between evaluation and auditing professions which activities have priority in evaluation under what circumstances and for what purposes new methodological approaches to doing evaluation the issues of advocacy versus truth in evaluation and between evaluating programs versus empowering people to evaluate their own programs evaluation for the 21st century features thoughtfully written introductions to each of the main sections that provide a context and synthesis of the various evaluators chapters after reading this groundbreaking book researchers and practitioners will be able to recognize these new developments in evaluation as they encounter them place them in context and incorporate them into their own evaluation professions and practices a stunning achievement evaluation for the 21st century is for all professionals and practitioners in evaluation management public administration sociology psychology education research public health and nursing

the collection of papers on social project evaluation

Planning for Creative Change in Mental Health Services: Use of program evaluation *1994*

this volume examines the development and growing use of online student ratings and the potential impact online rating systems will have on the future of students evaluations of teaching the contributors demonstrate how the preference for online evaluation is growing even amidst challenges and doubt sharing their first hand experience as researchers and administrators of online systems they explore major concerns regarding online student ratings and suggest possible solutions d lynn sorenson and christian m reiner review existing online rating systems that have been developed independently across the globe kevin hoffman presents the results of a national survey that tracks the increased use of the internet for student ratings of instruction at

northwestern university nedra hardy demonstrates how ongoing research about online student evaluations is helping to dispel common misperceptions application of online rating systems can present institutions with new challenges and obligations trav d johnson details a case study based on five years of research in the response rates for one university s online evaluation system and suggests strategies to increase student participation reviewing online reporting of results of online student ratings donna c llewellyn explores the emerging issues of security logistics and confidentiality other chapters explore existing online systems highlighting their potential benefits for institution and instructor alike beatrice tucker sue jones lean straker and joan cole analyze course evaluation on the cew a comprehensive online system for instructional feedback and improvement cheryl davis bullock reviews the evaluation online eon system and its successful role in facilitating midcourse student feedback the fate of online rating may rest in the unique advantages it may or may not have over traditional ratings systems debbie e mcghee and nana lowell compare online and paper based methods through mean ratings inter rater reliabilities and factor structure of items comparing systems from another angle timothy w bothell and tom henderson examine the fiscal costs and benefits of implementing an online evaluation system over paper based systems finally christina ballantyne considers the prominent issues and thought provoking ideas for the future of online student ratings raised in this volume together the contributors bring insight and understanding to the processes involved in researching and initiating innovations in online rating systems this is the 96th issues of the quarterly journal new directions for teaching and learning

Research, Evaluation, Development Paper Series 2012-12-06

in this way this book will enrich the theory and practice of evaluation worldwide book jacket

Doing Evaluations *2013-03-09*

the book is designed to enable students of public policy policymakers and mangers to obtain useful information and conduct successful systematic evaluations even under tight resource constraints this text presents a wide variety of approaches to evaluation through brief authoritative articles by top academics and practitioners thoroughly revised and updated this third edition is filled with the most current information up to date examples and puts increased emphasis on practical applicability the third edition also features a new and up dated instructor s manual

Economic and Medical Evaluation of Health Care Technologies *1997-01-28*

realistic evaluation shows how program evaluation needs to be and can be bettered it presents a profound yet highly readable critique of current evaluation practice and goes on to introduce a manifesto and handbook for a fresh approach the main body of this book is devoted to the articulation of a new evaluation paradigm which promises greater validity and utility from the findings of evaluation studies the authors call this new approach realistic evaluation the name reflects the paradigm s foundation in scientific realist philosophy its commitment to the idea that programmes deal with real problems rather than mere social constructions and its primary intention which is to inform realistic developments in policy making that benefit programme participants and the public ray pawson and nicholas tilley argue with passion that scientific evaluation requires a careful blend of theory and method quality and quantity ambition and realism the book offers a complete blueprint for evaluation activities running from design to data collection and analysis to the cumulation of findings across programmes and onto the realization of research into policy the argument is developed using practical examples throughout and is grounded in the major fields of programme evaluation this book will be essential reading for all those involved in the evaluation process especially those researchers students and practitioners in the core disciplines of sociology social policy criminology health and education this book is a must for those engaged in the field providing a fully illustrated text on evaluation with numerous examples from the criminal justice system unusually it offers something for the academic practitioner and student alike i found pawson and tilley s latest work on evaluation an enjoyable and informative read for myself their realistic evaluation clarified and formalised a jumbled set of ideas i had already been developing although not everyone will agree with the methodology proposed by the authors this book is a valuable read as it will cause most of us at least to review our methodological stance international journal of police science and management this is an engaging book with a strong sense of voice and communicative task the voice is sometimes strident but always clear its communicative qualities are evident equally in its structure lots of signposting for the reader

within and across chapters language teaching research this provocative elegant and highly insightful book focuses on the effective incorporation of actual practice into the formulation of evaluation methodology what a pleasure to read sentences like the research act involves learning a stakeholder s theories formalizing them and teaching them back to that informant who is then in a position to comment upon clarify and further refine the key ideas pawson and tilley have given us a wise witty and persuasive account of how real practitioner experience might be encouraged to intrude on and modify researchers concepts about program processes and outcomes this holds important promise for achieving something that is devoutly to be wished closer interaction among at least some researchers and some policy makers eleanor chelimsky past president of the american evaluation association this is a sustained methodological argument by two wordly wise social scientists unashamedly intellectual theoretically ambitious yet with a clear but bounded conception of evaluation it is articulate occasionally eloquent and always iconoclastic whilst eschewing paradigm wars the pawson and tilley realist call to arms threatens to take no prisoners among experimentalists constructivists or pluralists it is the kind of book that clarifies your thoughts even when you disagree with everything they say elliot stern the tavistock institute

Reliability Evaluation of Power Systems *1976-07-15*

using actual cases from educational health related and business settings the author shows readers how to do evaluation using a collaborative approach an approach which actually involves stakeholders in the evaluation process

Evaluation for the 21st Century *2011-09-28*

this book constitutes the proceedings of the 20th international conference on quantitative evaluation of systems qest 2023 which took place in antwerp belgium in september 2023 the 23 papers included in this book were carefully reviewed and selected from 44 submissions they deal with current topics in quantitative evaluation and verification of computer systems and networks focusing on data driven and machine learning systems case studies and tool papers the book also contains the extended abstract of the invited talk from david parker

this book constitutes the thoroughly refereed post conference proceedings of the second edition of the semantic evaluation challenge semwebeval 2015 co located with the 12th european semantic conference held in portorož slovenia in may june 2015 this book includes the descriptions of all methods and tools that competed at semwebeval 2015 together with a detailed description of the tasks evaluation procedures and datasets the contributions are grouped in the areas open knowledge extraction challenge oke 2015 semantic publishing challenge sempub 2015 schema agnostic queries over large schema databases challenge saq 2015 concept level sentiment analysis challenge clsa 2015

<u>Online Student Ratings of Instruction</u> *1969*

practice and research of peace education has grown in the recent years as shown by a steadily increasing number of publications programs events and funding mechanisms the oft cited point of departure for the peace education community is the belief in education as a valuable tool for decreasing the use of violence in conflict and for building cultures of positive peace hallmarked by just and equitable structures educators and organizations implementing peace education activities and programming however often lack the tools and capacities for evaluation and thus pay scant regard to this step in program management reasons for this inattention are related to the perceived urgency to prioritize new and more action in the context of scarce financial and human resources notwithstanding violence or conflict the lack of skills and time to indulge in a thorough evaluative strategy and the absence of institutional incentives and support evaluation is often demand driven by donors who emphasize accounting given the current context of international development assistance and budget cuts program evaluation is considered an added burden to already over tasked programmers who are unaware of the incentives and of assessment techniques peace education practitioners are typically faced with forcing evaluation frameworks techniques

and norms standardized for traditional education programs and venues together these conditions create an unfavorable environment in which evaluation becomes under valued de prioritized and mythologized for its laboriousness this volume serves three inter related objectives first it offers a critical reflection on theoretical and methodological issues regarding evaluation applied to peace education interventions and programming the overarching questions of the nature of peace and the principles guiding peace education as well as governing theories and assumptions of change transformation and complexity are explored second the volume investigates existing quantitative qualitative and mixed methods evaluation practices of peace educators in order to identify what needs related to evaluation persist among practitioners promising practices are presented from peace education programming in different settings formal and non formal education within various groups e g children youth police journalists and among diverse cultural contexts finally the volume proposes ideas of evaluation novel techniques for experimentation and creative adaptation of tools from related fields in order to offer pragmatic and philosophical substance to peace educators next moves and inspire the agenda for continued exploration and innovation the authors come from variety of fields including education peace and conflict studies educational evaluation development studies comparative education economics and psychology

Hydrogeologic Evaluation and Numerical Simulation of the Death Valley Regional Groundwater Flow System, Nevada and California 1997-04-23

the realpolitik of evaluation shines a light on the divergent demands for evaluation but what explains the gap between what those on the demand side expect in terms of evaluation results and the supply of information provided by evaluators can anything be done to narrow this gap what works and what does not work examining these questions from both the demand and the supply side experts describe ten different global examples of the gap between demand and supply of evaluation information in different contexts in an attempt to bridge that gap they effectively reveal the biases behind supposedly sources of evaluation information and highlight the pros and cons of attempts to bridge the gap through the use of third parties enhanced stakeholder involvement and the incorporation of social science models to strengthen theories of change toc the realpolitik of evaluation is an important book that poses questions at multiple levels of thinking it will be of great interest to policymakers program implementers and project managers
