Reason and Imagination 1968

this publication is composed of papers presented at an international
symposium on athalassic inland salt lakes which was hosted by the
university of adelaide south australia during a week in october 1979 the
genesis of the symposium was at the copenhagen congress of the
international association of limnology s 1 l where it was noted that a
number of papers concerned with inland saline lakes were distributed
throughout sessions in such a way as to make it difficult to attend all of
them a number of participants at the congress felt that the ecology of
salt lakes had greater homogeneity or cohesiveness than this sort of
distribution would suggest and it was decided that a symposium on salt
lakes be held the symposium was the first under the aegis of the s l l to
be held in australia and it was very well attended with participants
coming from many countries the week long programme produced a
number of lively and interesting sessions on all aspects of athalassic
saline lakes participants stayed on after the symposium for an
expedition to lake eyre in the nqrth of south australia and were given
one of the best of all possible introductions to the australian
environment
