Eden's Endemics

in the past thirty years biodiversity has become one of the central organizing principles through which we understand the nonhuman environment its deceptively simple definition as the variation among living organisms masks its status as a hotly contested term both within the sciences and more broadly in eden s endemics elizabeth callaway looks to cultural objects novels memoirs databases visualizations and poetry that depict many species at once to consider the question of how we narrate organisms in their multiplicity touching on topics ranging from seed banks to science fiction to bird watching callaway argues that there is no set generally accepted way to measure biodiversity westerners tend to conceptualize it according to one or more of an array of tropes rooted in colonial history such as the lost eden noah s ark and tree of life imagery these conceptualizations affect what kinds of biodiversities are prioritized for protection while using biodiversity as a way to talk about the world aims to highlight what is most valued in nature it can produce narratives that reinforce certain power differentials with real life consequences for conservation projects thus the choices made when portraying biodiversity impact what is visible what is visceral and what is unquestioned common sense about the patterns of life on earth

the italian giallo film genre the equivalent of the american whodunit but incorporating extreme violence and sex was based on popular british and american fiction of the 30s and 40s adapted to the explicitly liberal filmmaking of 1970s and 1980s europe seldom released in american theaters these films were usually distributed as redacted bootlegs awaiting digital technology to be restored to their original content and pristine visual form this book analyzes the censored sex and violence of giallo films finding in them an inherent beauty and tracing their literary antecedents to the elements of the fairy tale as described by russian folklorist vladimir propp each chapter covers a film and its director from 1962 to 1987 the author argues that despite their formulaic production and designation as euro sleaze these films are works of individuality and artistic virtue

the volume addresses the hybridisation of knowledge production in space related research in contrast with interdisciplinary knowledge which is primarily located in scholarly environments transdisciplinary knowledge production entails a fusion of academic and non academic knowledge theory and practice discipline and profession architecture and urbanism operating as both a discipline and a profession seems to form a particularly receptive ground for transdisciplinary research however this specificity has not yet been developed into a full fledged unique mode of knowledge production in order to dedicate specific attention to transdisciplinary knowledge production this book aims to explore new hybrid modes of inquiry that allow many of architecture s longstanding schisms to be overcome such as between theory history and practice critical theory and projective design the adoption of an external viewpoint and a view from within often under the guise of bottom up vs top down it therefore offers the reader a mix of contributions that elaborate on knowledge production that is situated in the architectural and urban profession or practice and on practice based approaches in theory
