transmission line wikipedia *Apr 11 2024*

in electrical engineering a transmission line is a specialized cable or other structure designed to conduct electromagnetic waves in a contained manner the term applies when the conductors are long enough that the wave nature of the transmission must be taken into account

transmission line design volume 2 *Mar 10 2024*

designing transmission lines good line design should result in high continuity of service long life of physical equipment low maintenance costs and safe operation these courses presents a generalized how to guide for the design of a high voltage transmission line
