Publishing in High Impact Factor Journals

2022-10-21

this book proposes a reference framework and guidelines to help researchers produce a manuscript of high scientific quality in order to meet the requirements of high impact journals and to succeed in their publication endeavours it offers a series of precise guidelines tips and tricks with a detailed description of the different steps to be taken to achieve a solid publication with a high impact factor as such the book will be of interest to students and researchers alike

The Impact Factor of Scientific and Scholarly Journals

2007

scientific communication depends primarily on publishing in journals the most important indicator to determine the influence of a journal is the impact factor since this factor only measures the average number of citations per article in a certain time window it can be argued that it does not reflect the actual value of a periodical this book defines five dimensions which build a framework for a multidimensional method of journal evaluation the author is winner of the eugene garfield doctoral dissertation scholarship 2011

Multidimensional Journal Evaluation

2012-04-26

publish or perish this old adage illustrates the importance of scientific communication essential to research it also represents a strategic sector for each country s competitiveness an often neglected topic scientific communication is of vital importance with new information technologies accelerating and profoundly changing how knowledge is disseminated the necessity of optimally disseminating experts findings has also become crucial to researchers institutes and universities alike which has prompted the recent advent of impact factors for the evaluation and financing of research the goal being for scientific knowledge to be equally distributed to a very broad audience especially to the media entrepreneurs and sociopolitical players this handbook presents the golden rules for publishing scientific articles in order to do away with major recurring errors the author explains how to easily structure an article and offers support for the typical mistakes made by native french speakers publishing in english tips on how to make the style more academic of more general to fit your intended readership and in the book s closing section suggests new publishing techniques of the internet age such as the micro article which allows researchers to focus their findings into a single innovative point the major principles presented can be applied to a broad range of documents such as theses industry reports publicity texts letters of intent cvs resumes blogs and press releases as all of these documents involve presenting information on advances discoveries innovations or changes to our previous knowledge

Scientific Writing for Impact Factor Journals

2013

publish or perish this old adage illustrates the importance of scientific communication essential to research it also represents a strategic sector for each country s competitiveness an often neglected topic scientific communication is of vital importance with new information technologies accelerating and profoundly changing how knowledge is disseminated the necessity of optimally disseminating experts findings has also become crucial to researchers institutes and universities alike which has prompted the recent advent of impact factors for the evaluation and financing of research the goal being for scientific knowledge to be equally distributed to a very broad audience especially to the media entrepreneurs and sociopolitical players this handbook presents the golden rules for publishing scientific articles in order to do away with major recurring errors the author explains how to easily structure an article and offers support for the typical mistakes made by native french speakers publishing in english tips on how to make the style more academic of more general to fit your intended readership and in the book s closing section suggests new

publishing techniques of the internet age such as the micro article which allows researchers to focus their findings into a single innovative point the major principles presented can be applied to a broad range of documents such as theses industry reports publicity texts letters of intent cvs resumes blogs and press releases as all of these documents involve presenting information on advances discoveries innovations or changes to our previous knowledge

Scientific Writing for Impact Factor Journals

2013-01-01

the present study attempts to examine the numerical correlation between web ranking of electronic scientific journals and impact factor of these journals using the method of regression analysis regression analysis allows the option of investigating and predicting the numerical relationship between website ranking of scientific journals on the world wide and the value of impact factor of the journals a sample of 57 publishers with 6 272 scientific journals and 50 standalone scientific journals was analyzed during research procedure in this study two different indicators about websites classification on world wide were examined separately for 57 publishers and 50 standalone journals alexa rank and statscrop rank the electronic databases through the internet constitute the main information resources of this study about the impact factors the general conclusion that arises is that the impact factor of electronic scientific journals illustrates a very strong positive correlation with classification of websites on the world wide furthermore it is concluded that the change of web ranking as a function of impact factor is governed by a gaussian function or rational function with lower pearson coefficient and presents non linearly correlation even if there is very strong correlation between impact factor and web rank for electronic journals the prediction of impact factor from web rank is not possible and presents many divergences

Numerical Correlation between Impact Factor and Web Ranking of Electronic Scientific Journals Using Regression Analysis

2017-12-15

in this short paper we recall the garfield impact factor of a journal we improve and extend it and eventually present the total impact factor that reflects the most accurate impact factor

Improved, extended, and total impact factor of a journal

2020-08-01

traducción parcial de la introducción en la actualidad la evaluación de la investigaciones es una cuestión que se está replanteando en todo el mundo en algunos casos los trabajos de investigación están generando resultados muy buenos en la mayoría de los casos los resultados son mediocres y en algunos casos negativos por todo esto la evaluación de los resultados de la investigación se convierte en una condición sine qua non cuando el número de investigadores eran menos eran los propios colegas de profesión quienes evaluaban la investigación con el paso del tiempo el número de investigadores aumentó las áreas de investigación proliferaron los resultados de la investigación se multiplicaron la tendencia continuó y después de la segunda guerra mundial la investigación comenzó a crecer exponencialmente hoy en día incluso en una estimación moderada hay alrededor de más de un millón de investigadores y producen más de dos millón de trabajos de investigación y otros documentos por año en este contexto la evaluación de la investigación es una cuestión de primera importancia para cualquier promoción acreditación premio y beca puede haber decenas o cientos de nominados de entre éstos seleccionar el mejor candidato es una cuestión difícil de determinar las evaluaciones inter pares en muchos casos están demostrando ser subjetivas en 1963 se crea science citation index sci que cubre la literatura científica desde 1961 unos años después eugene garfield fundador del sci preparó una lista de los 50 autores científicos más citados basándose en las citas que recibía el trabajo de un autor por parte de los trabajos de otros colegas de investigación el documento titulado pueden predecirse los ganadores del premio nobel fue publicado en 1968 garfield y malin 1968 en el siguiente año es decir 1969 dos científicos que figuran en la lista por ejemplo derek hr barton y murray gell mann recibieron el codiciado premio esto reivindicó la utilidad del análisis de citas cada año varios científicos pertenecientes al campo de la física química fisiología y medicina reciben el premio nobel de esta manera el análisis de citas se convirtió en una herramienta

útil sin embargo el análisis de citas siempre tuvo críticas y múltiples fallas incluso garfield comentó el uso del análisis de citas de los trabajos de evaluación es una tarea difícil existen muchas posibilidades de error garfield 1983 para la evaluación de la investigación se necesitaban algunos otros indicadores el análisis de citas junto con la revisión por pares garantiza el mejor juicio en innumerables casos pero se necesita algo que sea más exacto la llegada de la world wide web brindó la oportunidad pues un buen número de indicadores se están generando a partir de los datos disponibles en la web trad julio alonso arévalo univ salamanca

Research evaluation metrics

2015-04-27

the world of the academic journal continues to be one of radical change a follow up volume to the first edition of the future of the academic journal this book is a significant contribution to the debates around the future of journals publishing the book takes an international perspective and looks ahead at how the industry will continue to develop over the next few years with contributions from leading academics and industry professionals the book provides a reliable and impartial view of this fast changing area the book includes various discussions on the future of journals including the influence of business models and the growth of journals publishing open access and academic libraries as well as journals published in asia africa and south america looks at a fast moving and vital area for academics and publishers contains contributions from leading international figures from universities and publishers

world university rankings were announced by thomas reuters and the times as an indian besides being one teaching for nearly five decades i was eager to know the results of the announcement i showed enough concern where have our good indian universities higher educational institutions been placed i set my eyes on top ranks and it didn't give me anything to be proud of my eyes crossed over more than two hundred and fifty names of universities of the world including those of some not so developed countries but i came across no name of indian institutions universities this upsets me what made the indian educational scenario virtually get eclipsed by the scenarios of the rest of the world i drew a comparison between the higher education in india with that of many other countries the world education scene in general occupied a higher level of degree in research and publication than that of the indian education scene research flourishes when research is brought to light through publication i always advocate sound growth in indian education this can be achieved if we improve journal publication this awareness has resulted in this book therefore journal publishing is a cultural imperative this book is designed to help readers understand what a journal is the people who are responsible for the creation and production of this journal how a journal is published where a journal flourishes and why it is mandatory in education development i have taken materials from all over the world and all these sources have been acknowledged in the references but for them this book would not have been a reality

The Literature of Agricultural Engineering

2017-11-29

management science in engineering mse is becoming increasingly important in modern society in particular the emergence of efficient and innovative management tools has

greatly influenced the progress of management science in engineering research as research is critical to the dissemination of cutting edge methods journal evaluation and classification are essential for scientists researchers engineers practitioners and graduate students the goal of this book is to identify the major research categories in mse and to evaluate and classify each mse journal this book was compiled through the combined efforts of members of scientific committees many of whom are editors in chief of the most relevant journals academics researchers from different countries and members of professional societies it will be of interest to scientists researchers practitioners engineers graduate and advanced undergraduate students in the fields of engineering management civil engineering industrial engineering environmental engineering energy engineering information engineering and agricultural engineering
