this textbook provides practicing scientists and  
engineers a primer on the microchip avr microcontroller  
the revised title of this book reflects the 2016  
microchip technology acquisition of atmel corporation  
in this third edition we highlight the popular  
atmega164 microcontroller and other pin for pin  
controllers in the family with a complement of flash  
memory up to 128 kb the third edition also provides an  
update on atmel studio programming with a usb pod the  
gcc compiler the imagecraft jumpstart c for avr  
compiler the two wire interface twi and multiple  
examples at both the subsystem and system level our  
approach is to provide readers with the fundamental  
skills to quickly set up and operate with this  
internationally popular microcontroller we cover the  
main subsystems aboard the atmega164 providing a short  
theory section followed by a description of the related  
microcontroller subsystem with accompanying hardware  
and software to operate the subsystem in all examples  
we use the c programming language we include a detailed  
chapter describing how to interface the microcontroller

to a wide variety of input and output devices and conclude with several system level examples including a special effects light emitting diode cube autonomous robots a multi function weather station and a motor speed control system
