most commentators judge deleuze and guattari s anti oedipus as either a medusa into whose face psychoanalysis cannot but stare and suffer the most abominable of deaths or a well intentioned but thoroughly misguided flash in the pan fadi abu rihan shows that as much as it is an insightful critique of the assimilationist vein in psychoanalysis anti oedipus remains fully committed to freud s most singular discovery of an unconscious that is procedural and dynamic moreover abu rihan argues the anti oedipal project is a practice where the science of the unconscious is made to obey the laws it attributes to its object the outcome is nothing short of the becoming unconscious of psychoanalysis a becoming that signals neither the repression nor the death of the practice but the transformation of its principles and procedures into those of its object abu rihan tracks this becoming alongside nietzsche winnicott feynman bardi and cixous in order to reconfigure desire beyond the categories of subject lack and tragedy firmly grounded in continental philosophy and psychoanalytic practice this book extends the anti oedipal view on the unconscious in a wholly new direction
