Chronicle of a Cassandra the Dark Matters of Science

2015-09

around 50 years ago carl sagan said we live in a society exquisitely dependent on science and technology in which hardly anyone knows anything about science and technology the situation is even worse today this is a book about misconceptions about putting the record straight restoring the balance many people i come across including some scientists have a somewhat peculiar idea about the meaning of the word science they know what science is because of what they were taught during their education and what they read in the media they associate technology and science as if they were one and the same thing science is not technology and technology is not thanks to science technology usually turns out to be the work of

dedicated amateurs without scientific qualifications the book explores the history of many modern technologies together with a parallel history of science specifically its contribution to technology the conclusion is somewhat surprising if only for its lack of academic scientific input there is evidence that academic science has on occasions deliberately delayed pseudo debunked or even killed off new technologies and that the trend continues unabated

michael harlow s poetry has always embodied a dialogue with european literary traditions and his abiding theme here as in his earlier books is the search for language to express and convey the strangeness and mystery of the everyday his use of word image and rhythm is sophisticated and inventive and though there is a dark strain in this collection which deals with several deaths there is also a good deal of humour there is magic and dream and unlikely stories the collection is in seven parts defined thematically and including a section of prose poems the range in form and tone and the easy confidence of harlow s style make this a particularly rewarding collection
