## Predicasts Technology Update

What happens when one ice shelf melts that tips the balance, sending waves to engulf the continents and change the world's geography? Only the Citadel, a space community pioneered by Samuel Goldstein, escapes. But climate change is not the only danger that threatens. 3,000 years later, Revin Goldstein discovers that the Citadel is becoming structurally unsound. He mounts an expedition to explore the possibility of reoccupying Earth, unaware that treachery is afoot that will jeopardize his undertaking. While Revin tries to carry out the Goldstein legacy, Lars is out to destroy it. People are affected not only by planetary disasters but personal tragedies. It is a drama played out in the lives of heroes and villains, people from all walks of life living in places as remote as the glass palaces of space to the valleys of the Rocky Mountains. When the Earth trembles, waters rise, bombs drop, trust is betrayed, illness strikes, or death destroys, how do those affected find hope and the courage to move forward? This is their story.
