2012 exam developing countries in the east asia pacific region will see stable economic growth this year bolstered by a recovery in high income economies and the market s modest response so far to the federal reserve s tapering of its quantitative easing according to the east asia pacific economic update developing east asia will grow by 7 1 percent this year largely unchanged from 2013 the report says as a result east asia remains the fastest growing region in the world despite a slowdown from the average growth rate of 8 0 percent from 2009 to 2013 in china growth will ease slightly to 7 6 percent this year from 7 7 percent in 2013 excluding china the developing countries in the region will grow by 5 0 percent slightly down from 5 2 percent last year the wall street meltdown in 2008 brought the country to its knees and spawned nationwide protests against the lack of regulation and oversight facing wall street but the average american still fails to fully grasp what was and still is happening that the inmates continue to run the asylum doyle has been tracking this story for years through his blog sense on cents and exposes here how wall street our politicians and the regulators themselves have conspired for personal and industry wide gains while failing to protect investors consumers and the american taxpayer he details the corrupt nature of wall street s financial police who are little more than meter maids imposing fines that amount to nothing more than a slap on the wrist he exposes the revolving door of wall street wherein the regulators are all former or future employees of the very firms they re tasked with overseeing and how they routinely serve the interests of the industry itself rather than protecting investors and markets recent bombshells such as multi billion dollar trading losses at jp morgan chase the manipulation of interest rates via the libor scandal and money laundering with north american drug cartels and rogue between areas of global governance human rights global economy and international law by drawing on a range of diverse subject areas errol p mendes argues that the foundations of global governance human rights and international law are undermined by a conflict or tragic flaw where insistence on absolute conceptions of state sovereignty are pitted against universally accepted principles of justice and human rights resulting in destructive self interest for both the state and the global community the book explores how human rights and international law are applied in some of the critical institutions of global governance and in the operations of the global private sector and how states institutions and global civil society struggle to fight this tragic flaw the book is brought up to date by considering developments in the role of the imf the world bank bilateral investment treaties the likely failure of the doha round of wto negotiations the legacy of the 2008 financial crisis and the role of the international criminal court and the evolving responsibility to protect doctrine in international peace and security crises in the middle east central and west africa among other regions of the world with its intensely interdisciplinary approach this book motivates new thinking in the realm of global governance and international law and promotes the development of new strategies for negotiating between conflicting leadership and organisational values within global institutions the book will be of great interest and use to students and researchers of public
