what do charles dow jesse livermore and richard ney have in common they used volume and price to anticipate where the market was heading next and so built their vast fortunes for them it was the ticker tape for us it is the trading screen the results are the same and can be for you too i make no bones about believing i was lucky to start my own trading journey using volume to me it just made sense the logic was inescapable and for me the most powerful reason is very simple volume is a rare commodity in trading a leading indicator the second and only other leading indicator is price everything else is lagged there s only one question as traders investors or speculators all we are trying to do is to forecast where the market is heading next is there any better way than to use the only two leading indicators we have at our disposal namely volume and price in isolation each tells us very little after all volume is just that no more no less a price is a price however combine these two forces and the result is a powerful analytical approach to forecasting market direction with confidence what you will discover this book will teach you all you need to know from first principles so whether you re a day trader or a longer term investor in any market instrument or timeframe this book is the perfect platform to set you on the road to success and join those iconic traders of the past all you need to succeed is a chart with volume and price simple
