Reading Numbers 0-19

2016-05-17

in the era of covid 19 many people have suffered high levels of stress and mental health problems to cope with the widespread of suffering physical psychological social and economical the positive psychology of personal happiness is no longer the sole approach to examine personal wellbeing other approaches such as viktor frankl's theory of self transcendence provide a promising framework for research and intervention on how to achieve resilience wellbeing and happiness through overcoming suffering and self transcendence the existential positive psychology of suffering complements the positive psychology of happiness which is championed by martin seligman as two equal halves of the circle of wellbeing and optimal mental health this research topic aims

to examine the different approaches to positive psychology and their influence on individual wellbeing during the covid 19 era one of the exciting development in the positive psychology of wellbeing is the mounting research on the adaptive benefits of negative emotions such as shame guilt and anger as well as the dialectical process of balancing negative and positive emotions as an example based on all the empirical research and frankl s self transcendence model wong has developed the existential positive psychology of suffering pp2 0 as the foundation for flourishing here are a few main tenets of pp2 0 1 life is suffering and a constant struggle throughout every stage of development 2 the search for self transcendence is a primary motive guided by the meaning mindset and mindful mindset 3 wellbeing cannot be sustainable without overcoming and transforming suffering in this research topic we welcome diverse approaches discussing the following points the dialectic process of overcoming the challenges of every stage of development as necessary for personal growth and self transcendence the role of self transcendence in resilience virtue meaning and happiness the upside of negative emotions the new science of resilience based on cultivating the resilient mindset and character how to make the best use of suffering to achieve out potentials mental health

COVID-19 and Existential Positive Psychology (PP2.0): The New Science of Self-Transcendence

the covid 19 pandemic has made it necessary to redefine the most significant challenges faced by individual economies and society today it contributed to the change of contemporary social technological and economic trends the effects of which will indeed be the subject of many scientific studies in the coming years as the pandemic progresses it promotes reflection and summaries of the consequences of behaviors or

omissions in each country one of them is a synthetic presentation of ten lessons from the pandemic gorynia 2021 which the professor accurately diagnoses in the economic context 1 the pandemic as a non economic sanitary medical shock that caused the economic social and political crisis 2 the pandemic as a black swan an unpredictable threat of high species gravity but requiring anticipation to minimize its harmful effects in the future 3 determining the causes of the appearance of the virus determines different preventive actions for future threats 4 resilience as the foundation of long term economic efficiency 5 the set of measures to counteract the harmful effects of a pandemic should not be unified but adapted to the specificity of the facilities it is to affect 6 the world economy as a system of vessels connected with its positive and negative consequences 7 the pandemic highlighted the role of coordination of international cooperation the shortcomings of globalization must be overcome by fairly sharing the positive fruits of international cooperation and resilience aimed at diversifying supplies 8 economic policy pursued by individual states with a view to preventing the effects of the economic crisis caused by a pandemic cannot be voluntary 9 the pandemic has sharpened the perception of the shortcomings of contemporary economic social and political systems and prompts the questioning of certain pillars of the market economy e g homo oeconomicus individual and global rationality private and state property canons of monetary fiscal budgetary or industrial policy 10 the pandemic increases the pressure on systemic and holistic thinking taking into account green economic development saving energy water and other resources using renewable energy sources avoiding wastage of resources paying attention to social inequalities in the world regions and countries solving poverty problems and social exclusion this monograph is partially a response to the in depth issues covered in these lessons the authors of individual chapters challenge contemporary topics relating to the covid 19 pandemic industry and inter organizational cooperation pro environmental resilient and innovative organizations the monograph consists of three parts the first part part 1 covers an overview of very recent research considering the impact of covid 19 on the economy industries and business the

article by anna ujwara gil and bianka godlewska dzioboń deals with among others the issues relating to pandemic impacts on the slowdown in the functioning of the construction electric automotive and water industries also it affects the tourist industry where countries are starting to pay attention to the resource saving green economy and problems of professional exclusion in the pandemic era in another article maria czech refers to the influence of public debt on the volatility of spreads during the covid 19 pandemic this research is part of the study on the use of sovereign credit default swap spreads to assess a country s credit risk which may be distorted in a pandemic period it is undisputed that the covid 19 pandemic has a global dimension the crisis resulting from disorders such as in value chains has caused industry to slow down the czech luxury fashion industry is no exception as radka macgregor pelikánová points out covid 19 has turned out to be a threat to its development leading czech luxury fashion companies withdrew to a passive role and felt the negative consequences of the pandemic as the author points out few have engaged in corporate social responsibility and showed ingenuity which increases their chances of survival in the future in other studies tereza horáková and kateřina maršíková identified factors influencing the environment of effective knowledge exchange in smes which in the era of hybrid work during covid 19 is particularly important the second part of the monograph part 2 includes two studies on the photovoltaic cell industry in china from the perspective of comparative and intra industry advantage as a significant player in the global trade scene and various value chains china is a fascinating subject of research undertaken by paweł brusilo and bogusława drelich skulska the results of the first article demonstrate the success of the chinese industry in terms of growth potential competitiveness and development opportunities thanks to effective state support and favorable market forces as the authors point out the chinese solar cell industry has not been studied so far in the context of comparative advantage and the new structural economy the results show the way for other countries to consider or develop innovative industries such as renewable energy and solar energy in the second article paweł brusilo examines the topic of the belt and road initiative in the context of the chinese photovoltaic cell industry energy

transition policy identification of modern intra industry trade patterns and opportunities for this industry which is characterized by significant state interventionism the considerations in this article may inspire eu countries to deepen economic and trade cooperation in the export and import of solar cells with china on the other hand joanna kurowska pysz has undertaken the analysis of the cooperation conditions within the innovative processes of representatives of science business the legislative and economic environment cooperating on the capital market the author focused on the motivators barriers but also the search for an effective form of development of intersectoral cooperation enabling the exchange of knowledge and experience learning including the flow of personnel between sectors joint organization of conferences seminars training and implementation of research projects constituting the basis of innovative processes or the diagnosis of network relationships the model proposed by the author will surely inspire other researchers the third part of the monograph part 3 includes articles referring inter alia to the pro environmental organizational culture of enterprises katarzyna piwowar sulej as an advocate of this valuable orientation today has shown that organizations are interested in developing pro ecological behavior and are aware of their impact on the natural environment the article is in line with the global trend focused on the sustainable ecological and green economy enterprises operating in this trend not only because of covid 19 taking action to develop a pro ecological organizational culture taking care of the natural environment is not only a moral and ethical requirement but also an obligation for the future generation this part also includes an article by piotr tomszys and bartosz grucza who present an inspiring model of organizational resilience and an attempt to operationalize it the organizational resilience model proposed by the authors is in line with the growing interest in the analyzes and measurement of the enterprises resilience the conceptualization and measurement of economic resilience can inspire other researchers to further research in this area the covid 19 pandemic as an unpredictable and destructive shock might be a unique opportunity to verify the developed model as the authors point out the last article deals with the issue of innovative management and its measurement based

on a proprietary tool developed by magdalena gorzelany dziadkowiec the considerations undertaken by the author are a reliable starting point for further research concerning the impact of covid 19 on the organization s functioning the development of innovative management changes in work processes and interpersonal relations in the era of increasingly dominant digital technology and skills to use it the editors profoundly thank all the authors for their valuable contribution to this monograph and cooperation in its co creation we address our grateful thanks to all the reviewers for their insightful evaluation and high standards of their work these special thanks go to in alphabetical order barbara błaszczyk institute of economics polish academy of sciences justyna bugaj jagiellonian university anna fornalczyk comper fornalczyk and wspólnicy marta gancarczyk jagiellonian university anna maria lis gdańsk university of technology andrzej lis nicolaus copernicus university mieczysław morawski warsaw university of technology paweł pisany institute of economics polish academy of sciences natalia r potoczek institute of economics polish academy of sciences we also thank paweł japoł for his thorough proofreading of this monograph
